SOLVIA

Your permit, step by step.

A screenshot guide for students, visitors and employees

Choose your journey

1 Students

Maria - Student

Choose a day pass or a term permit. Review the campus's published fee; some campuses have a free option.

2 Visitors / public

Pat - Public

Choose a day pass or a term permit. When the total is above $0, complete the PayPal Sandbox payment.

3 Employees

Elena - Employee

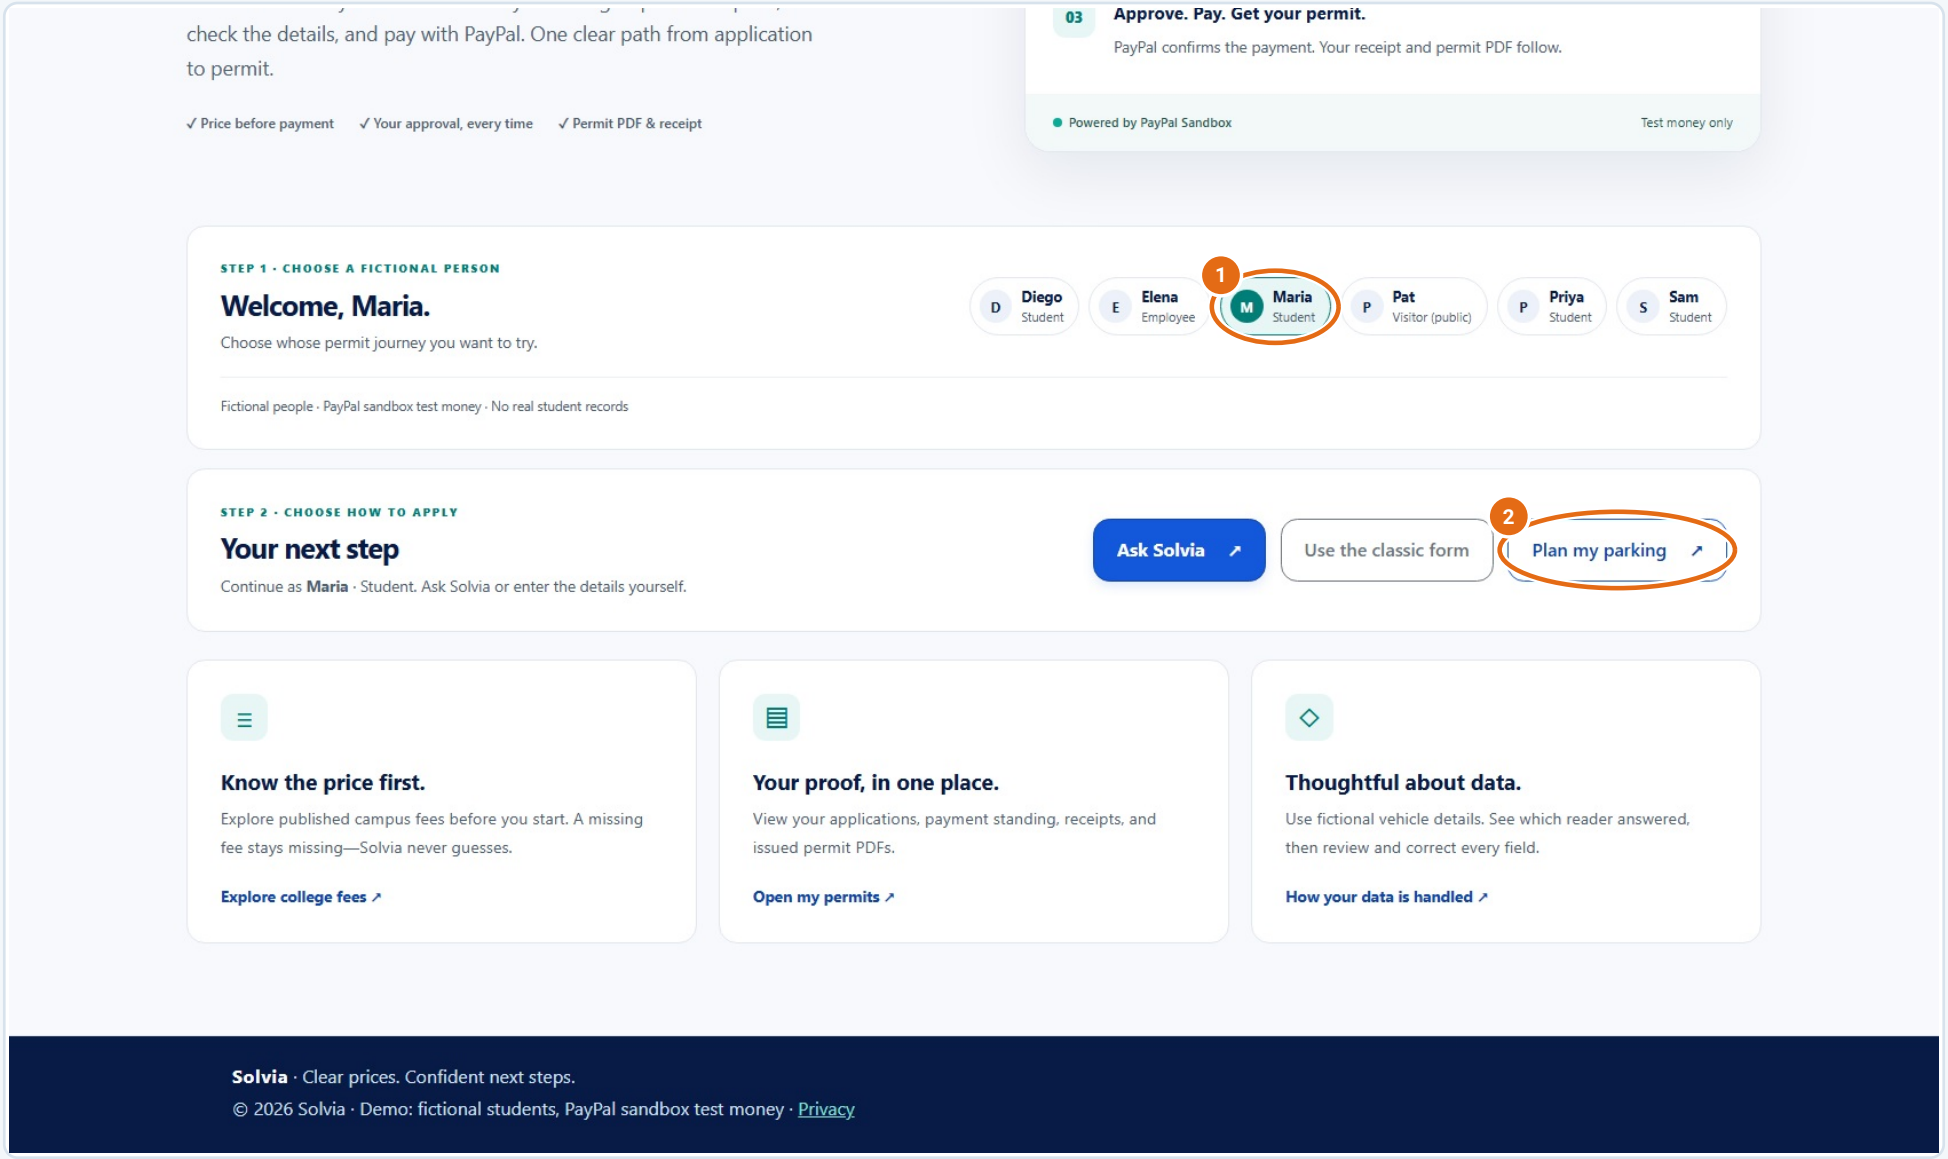

The eligible employee demo profile is exempt. Check the $0 total, then issue the permit without a PayPal payment.

Before you start

Check the details	The AI reader only pre-fills a draft. Correct the license plate, state, vehicle and dates before continuing.
Wait for confirmation	An unpaid permit has no printable permit PDF. If a payment is unfinished, use Pay now / Finish paying, then wait for confirmation.
Download again or print	Open My permits, then Permit (PDF). Save the PDF or use your PDF viewer's Print button / Ctrl+P. Check plate and validity dates first.

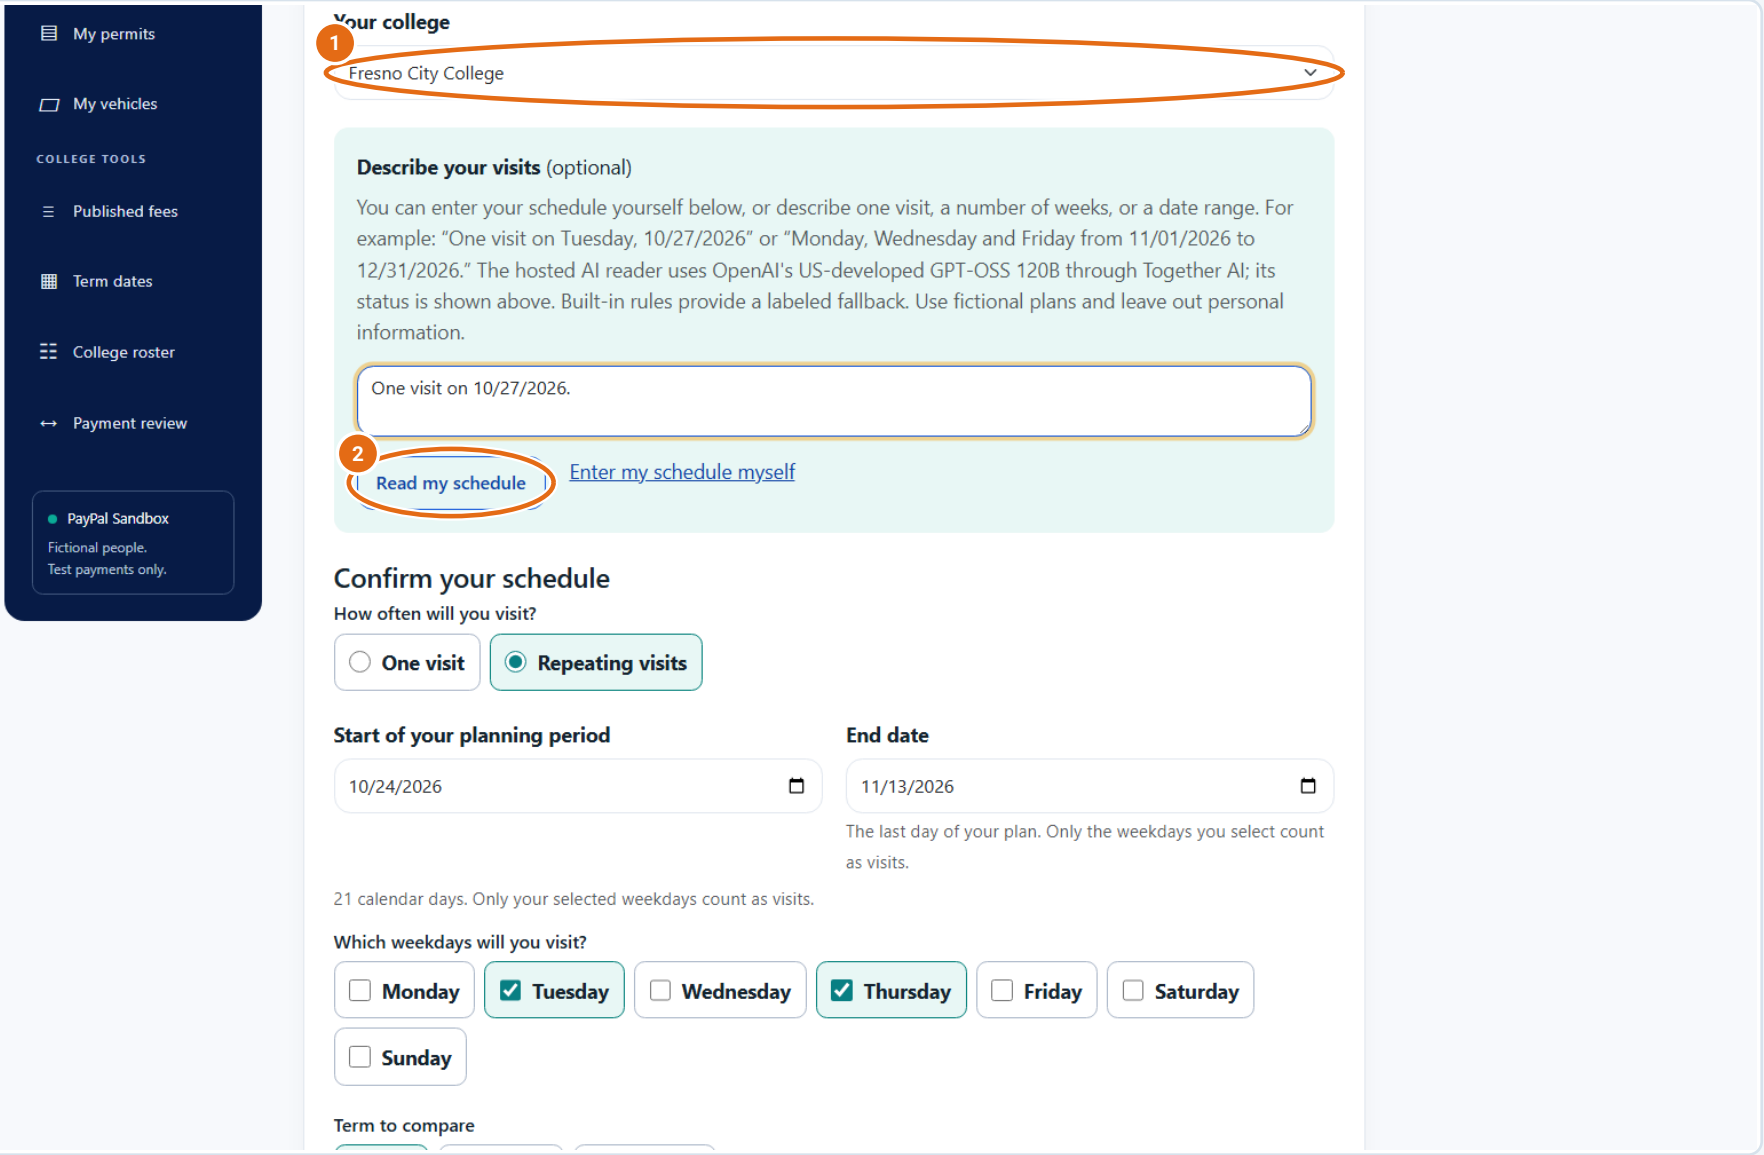

Fictional profiles and Sandbox test funds, not campus authorization. The current reader uses OpenAI's US-developed GPT-OSS 120B through Together AI; model and fallback results are labeled. A fresh unpaid Student application, a Visitor form and separate existing paid/exempt examples show the journey. This guide creates no PayPal order or capture.

1. Choose Student and plan your parking

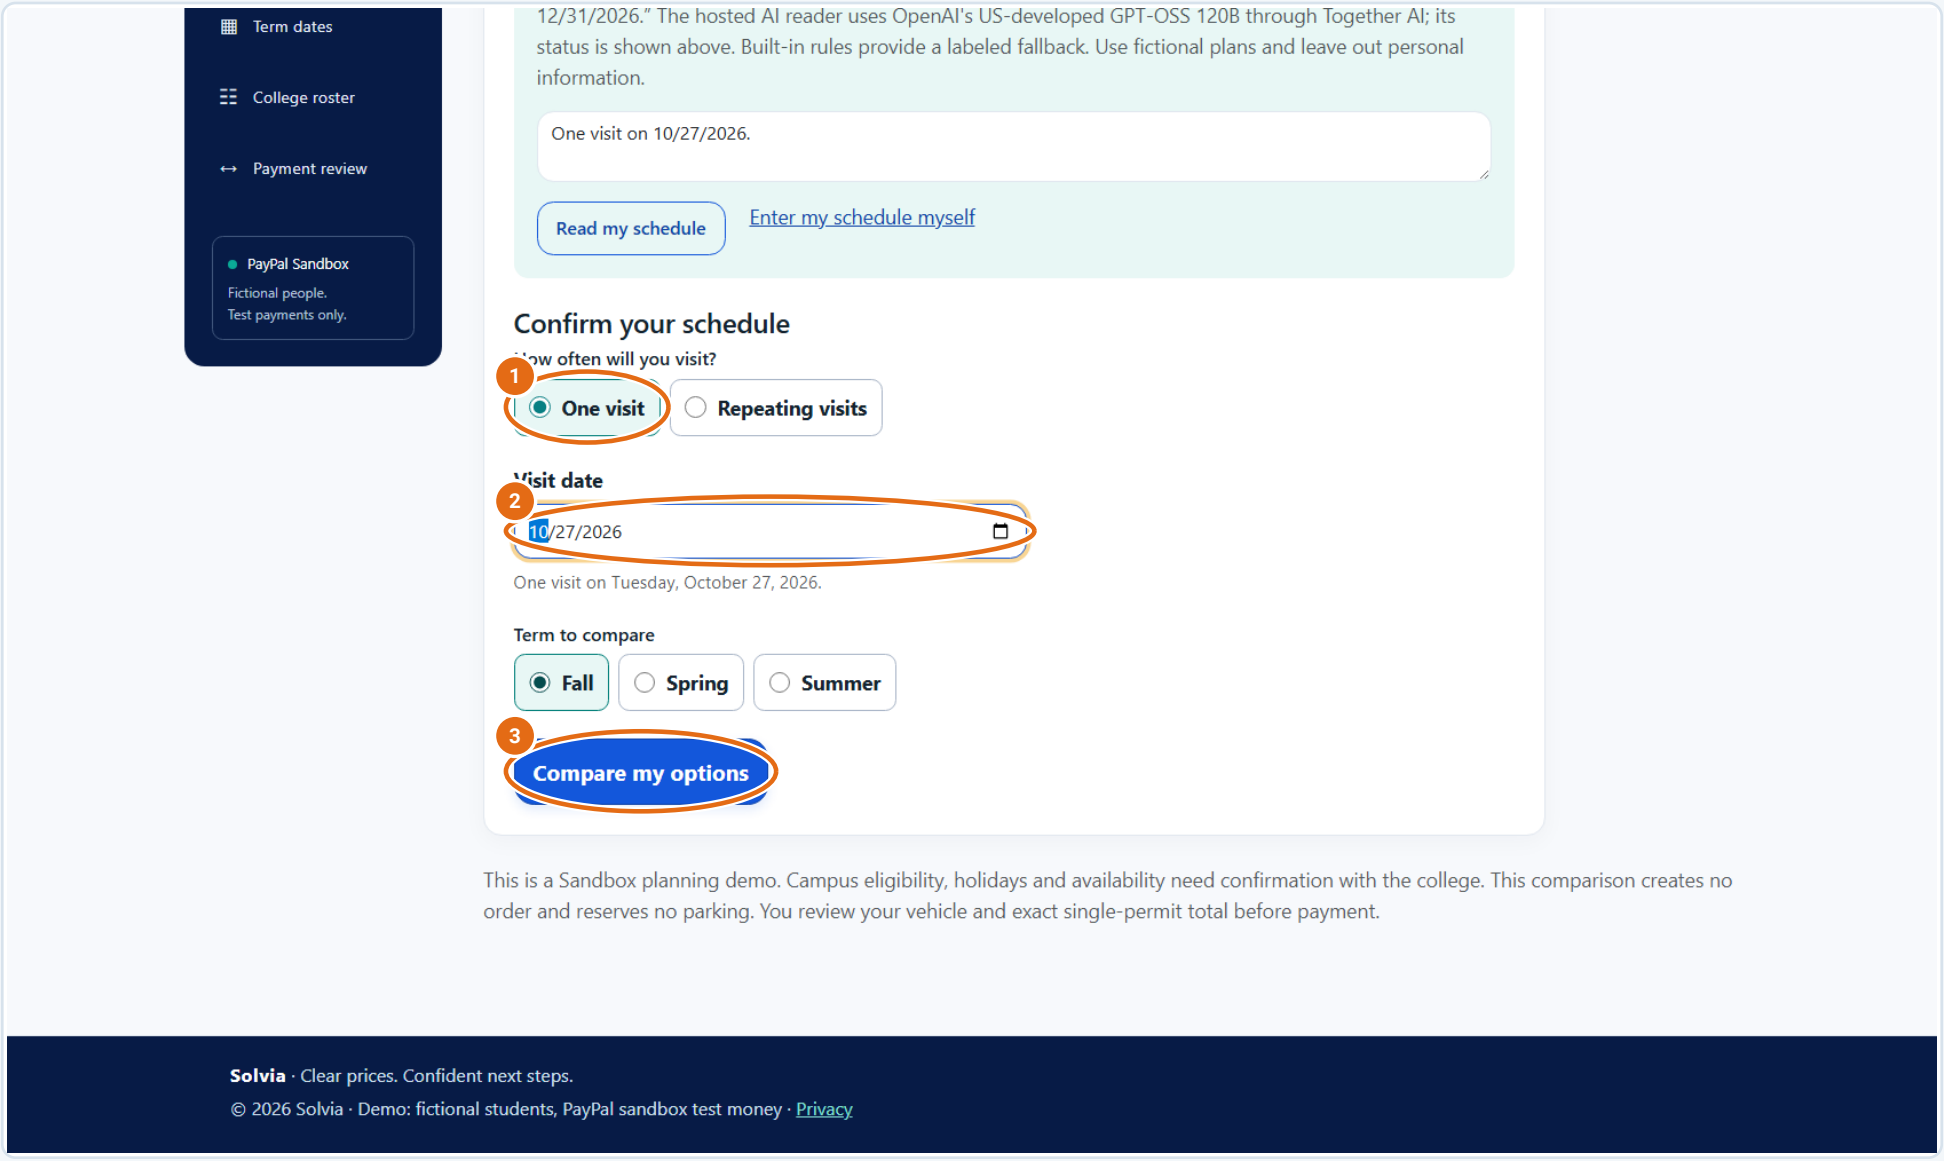

Choose Maria (Student), then Plan my parking. These fictional profiles switch the demo person; they are not production sign-in. Pat is Visitor/Public and Elena is Employee.

2. Describe the visit, or enter it yourself

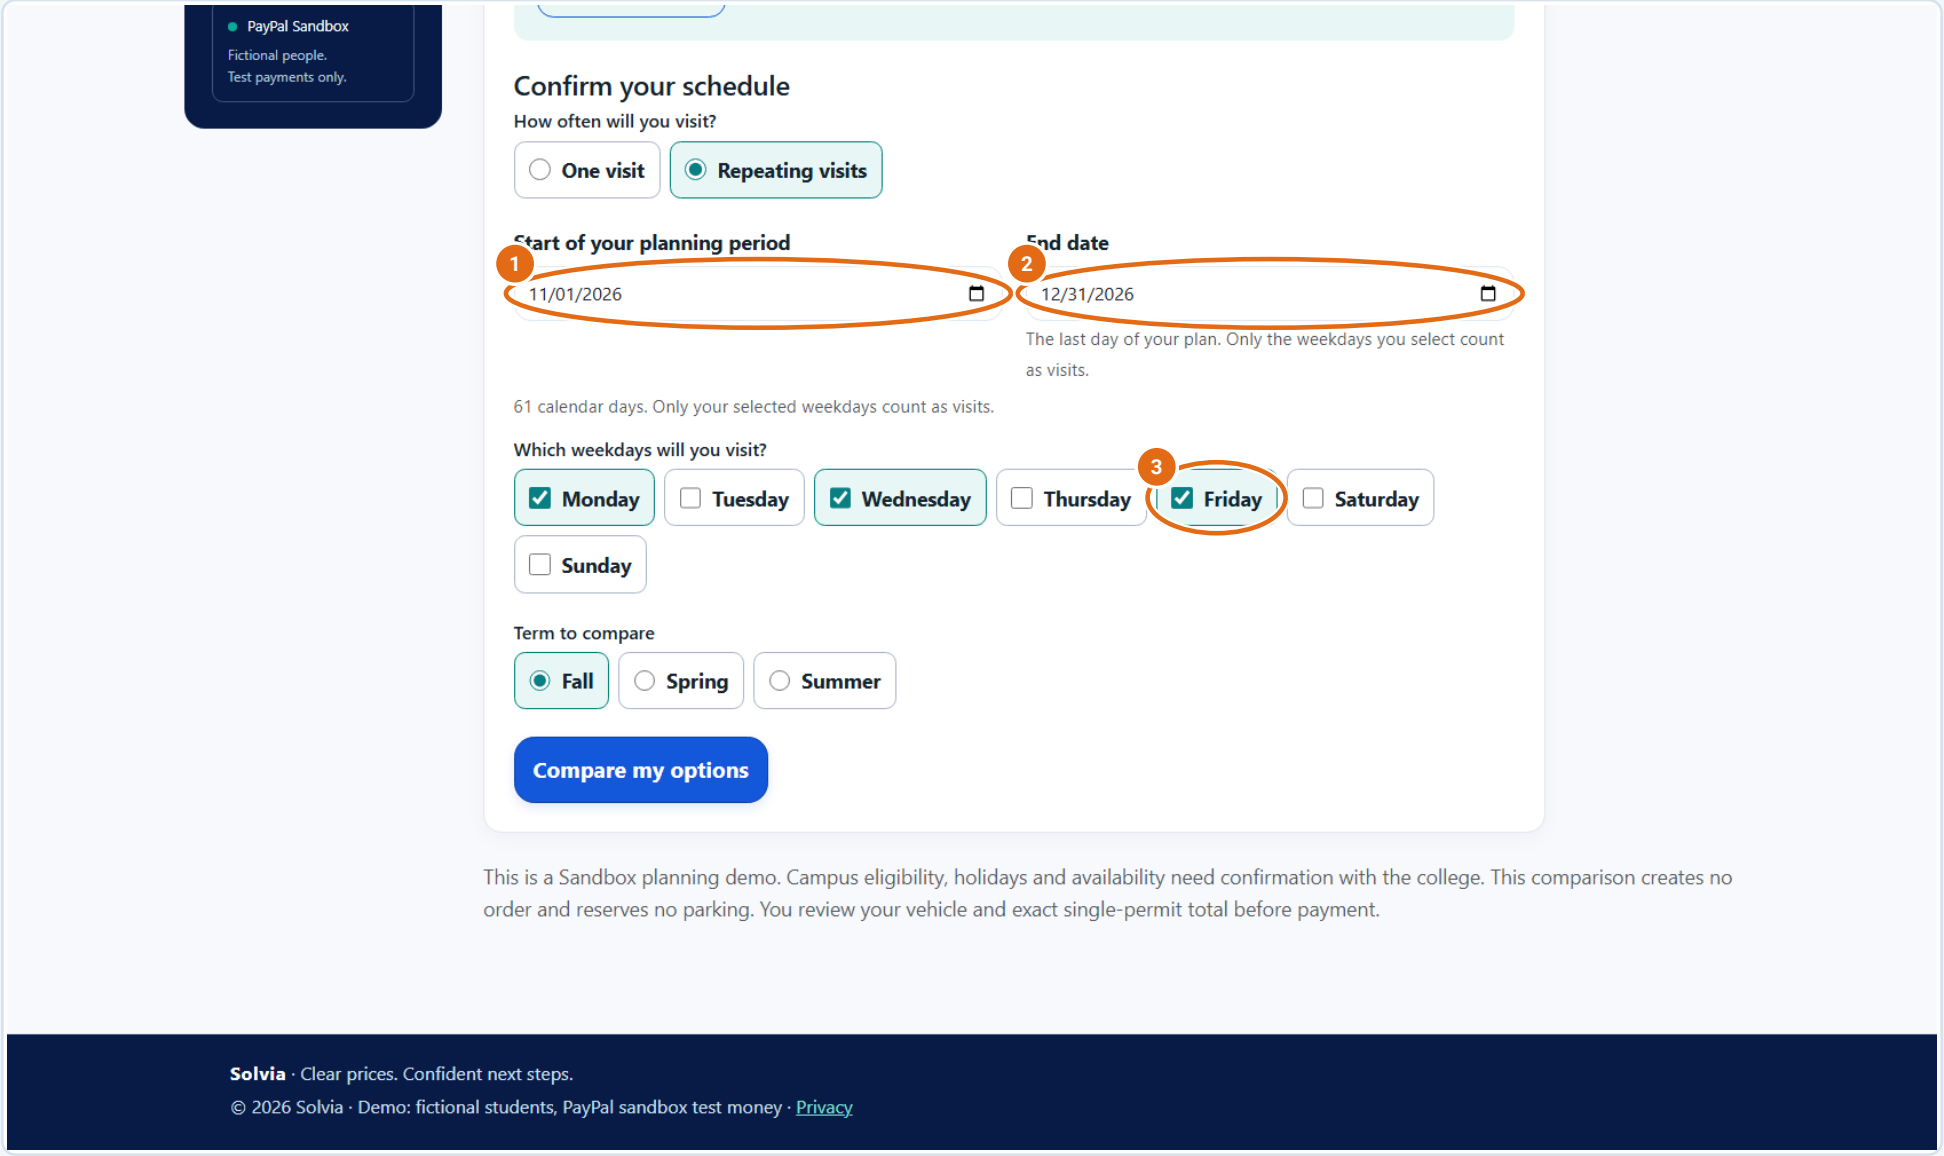

Choose Fresno City College for this main example. Optionally describe one visit, weeks or an exact date range and select Read my schedule. Confirm the drafted date choices below. Model results and built-in fallbacks are labeled. This screen was prepared manually without a new AI request.

3. One visit means one date

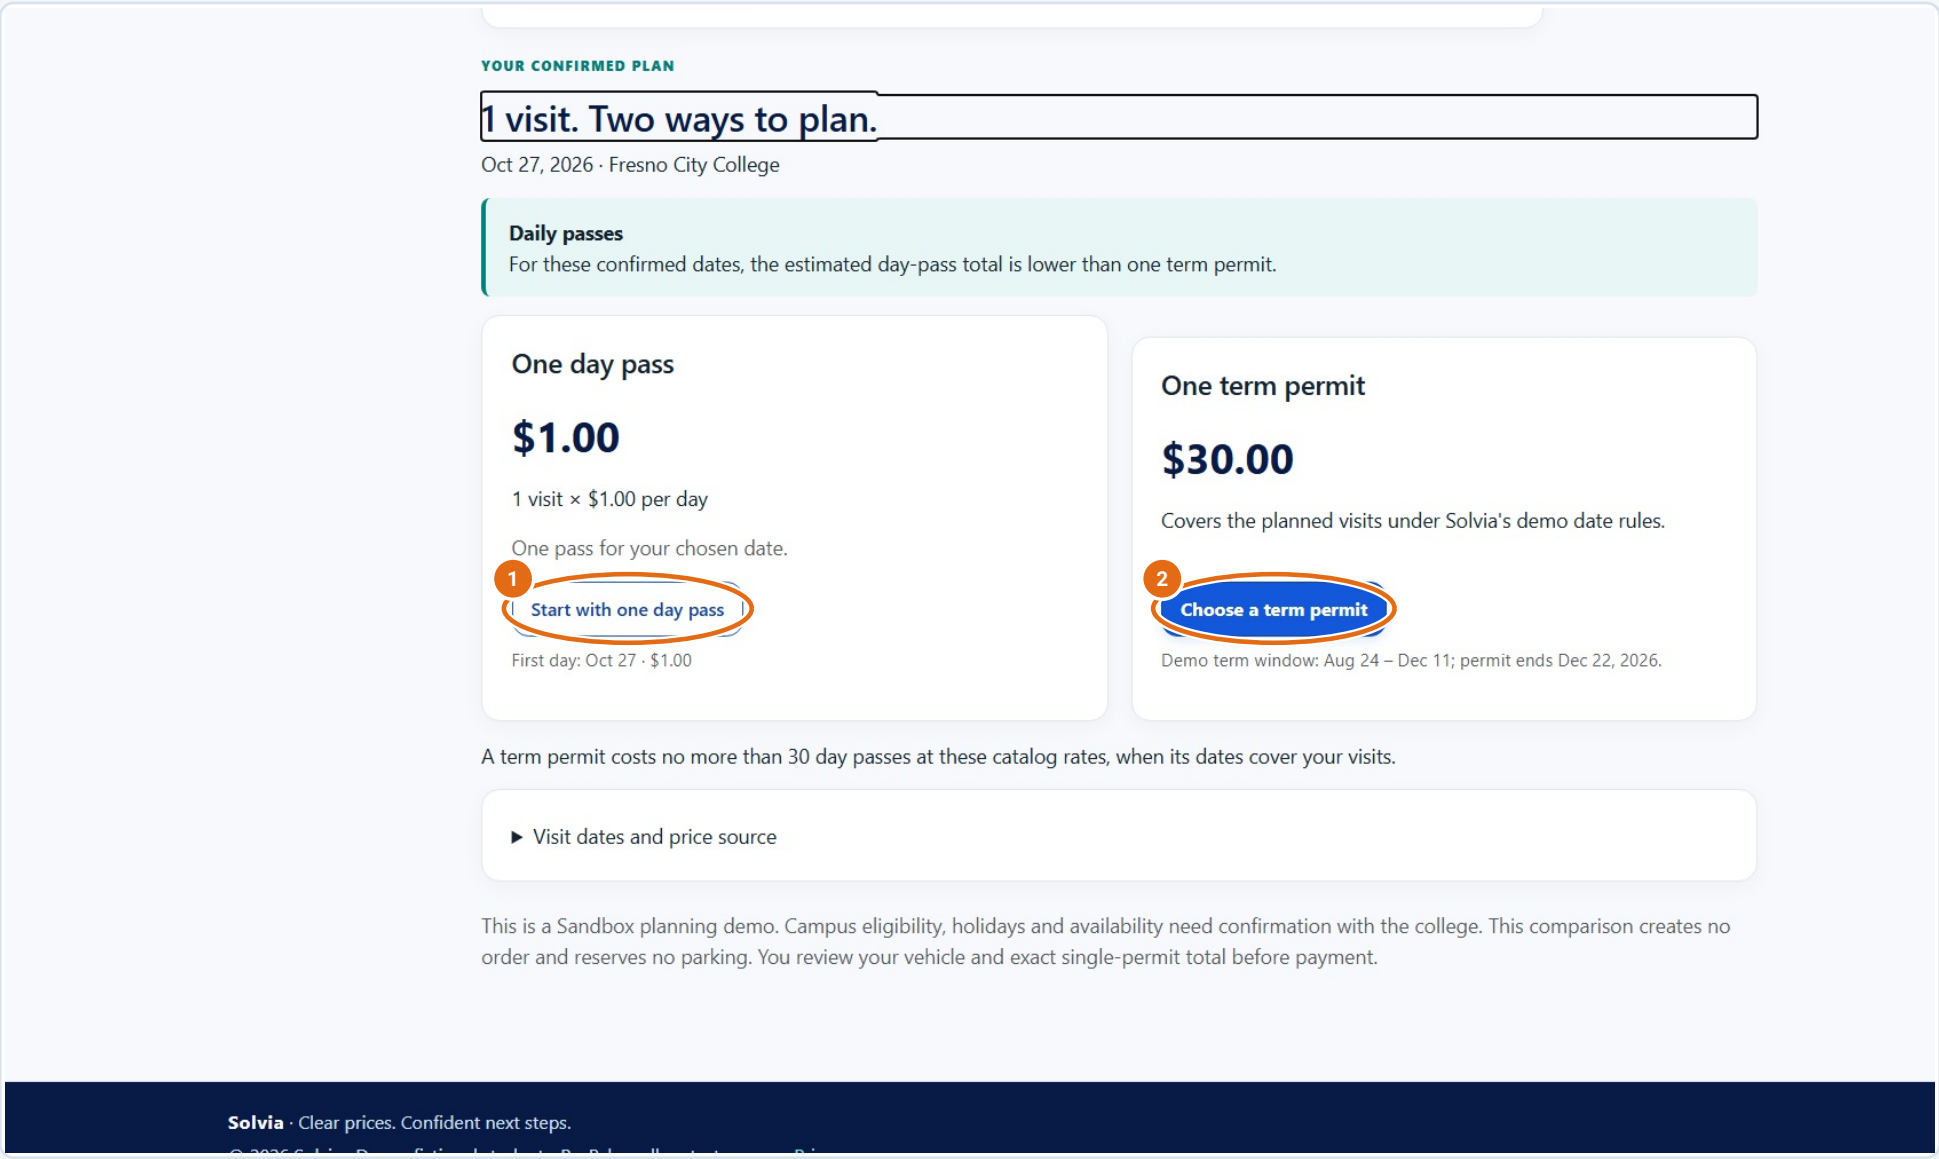

For one day, select One visit and confirm the Visit date. End date and the weekday checklist are hidden and disabled. There is no weeks field. Select Compare my options after reviewing your college and date. These pictured choices were entered manually.

Alternative: repeat between exact start and end dates

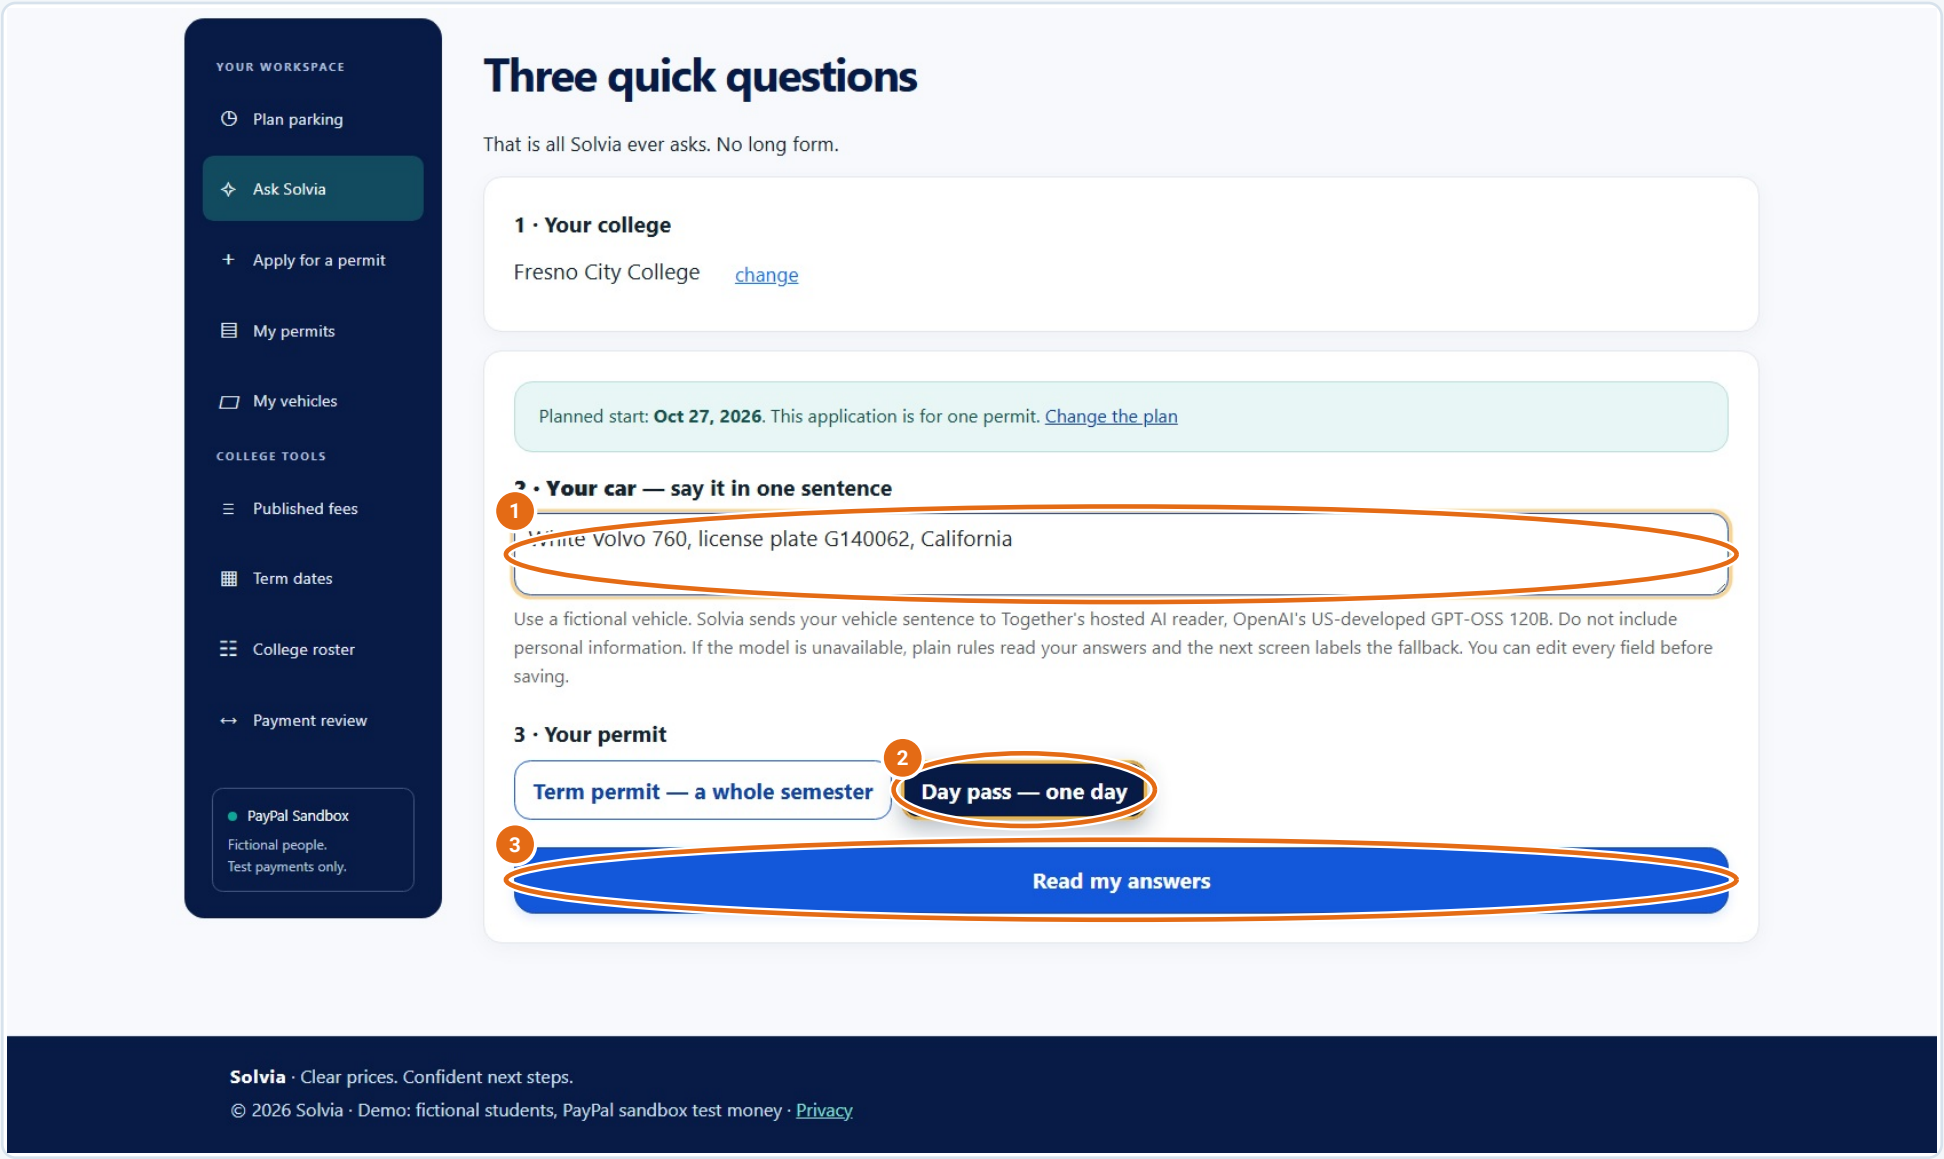

Separate Diablo Valley example, entered manually: November 1 to December 31, 2026, on Monday, Wednesday and Friday. Confirm the two dates and weekdays; no weeks textbox is needed. The planner checks term coverage before comparing. This is an input example, not a successful comparison or purchase. The main Fresno one-visit journey resumes next.

4. Compare the published options

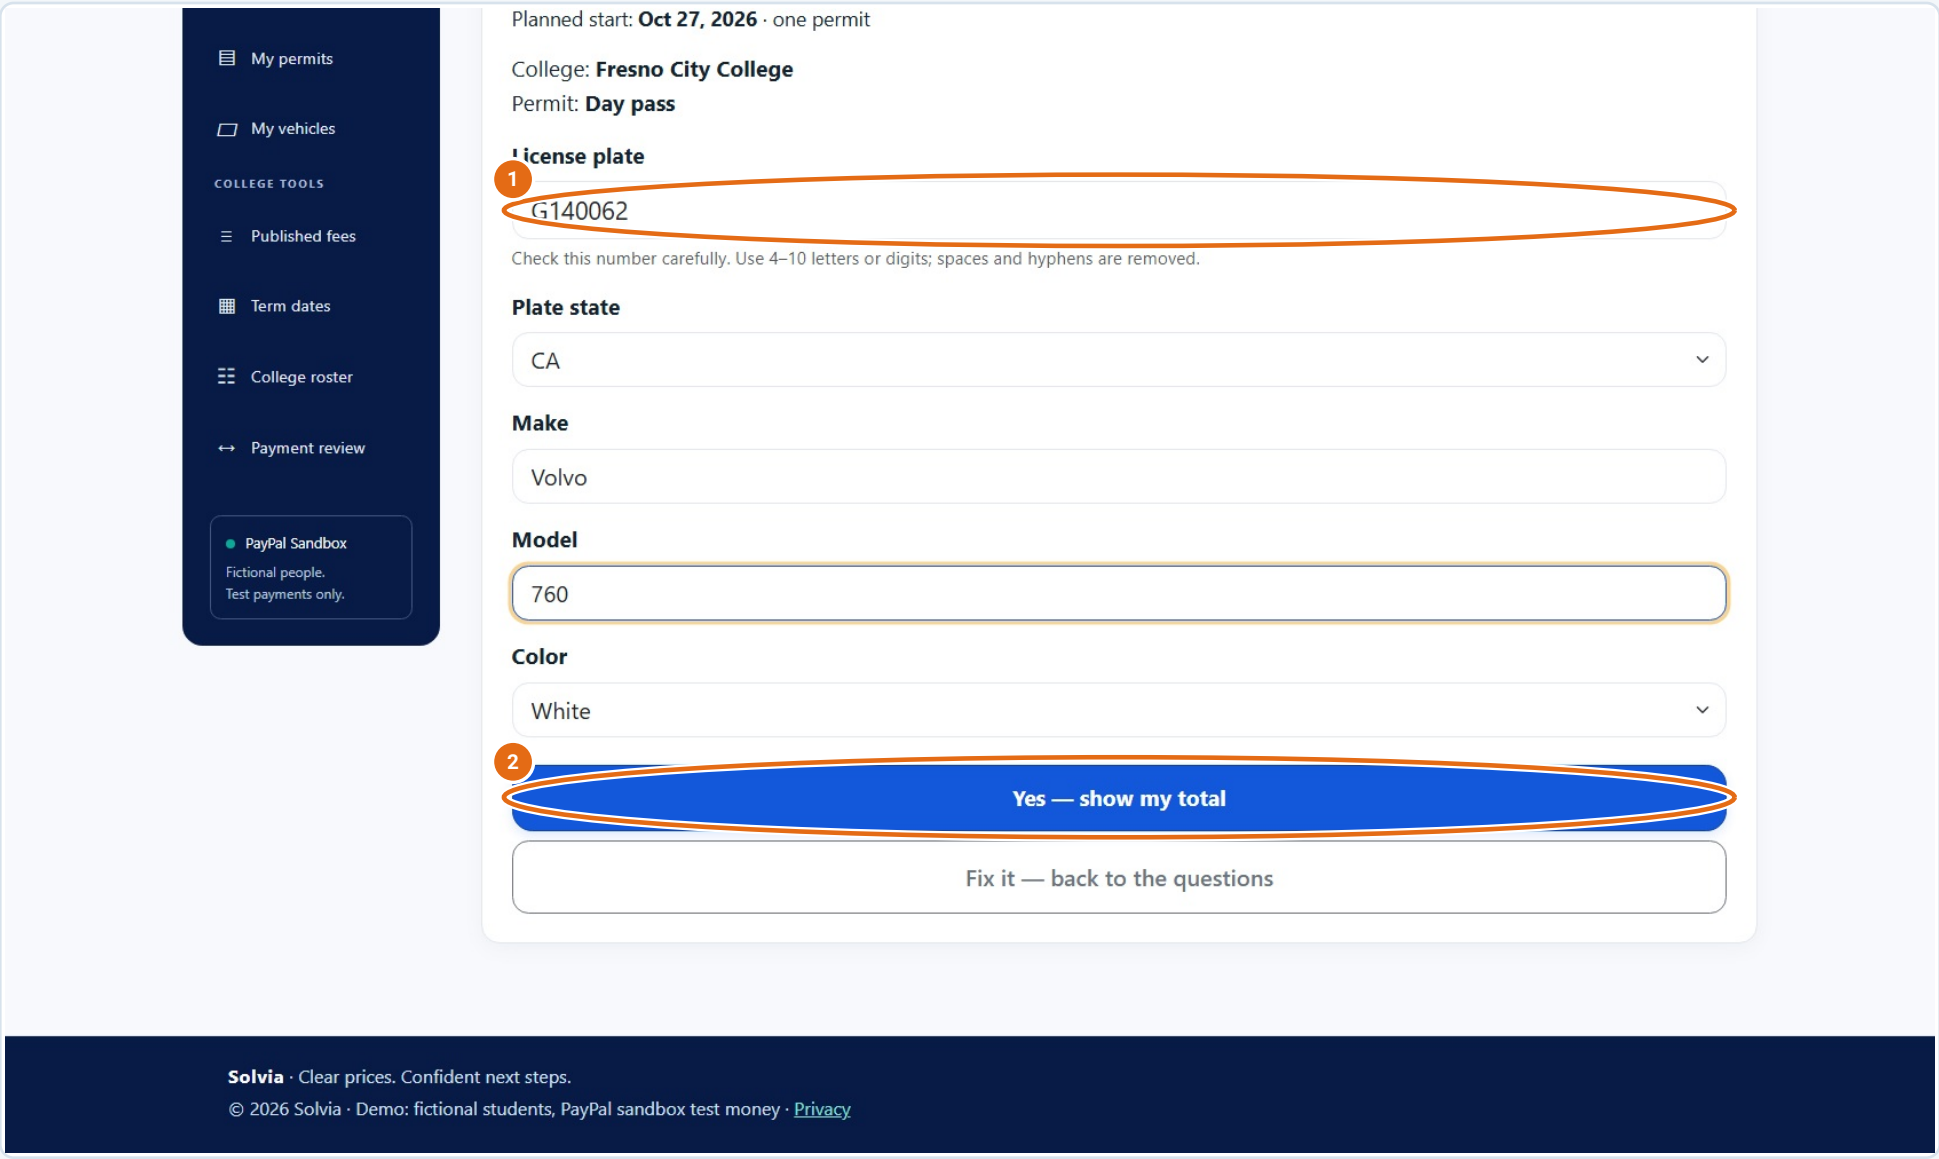

This Fresno City College snapshot compares a $1 day pass with a $30 term permit. Choose Start with one day pass for the chosen date, or Choose a term permit. Catalog prices are researched CSV data, not a live campus feed.

5. Describe your car and confirm the permit

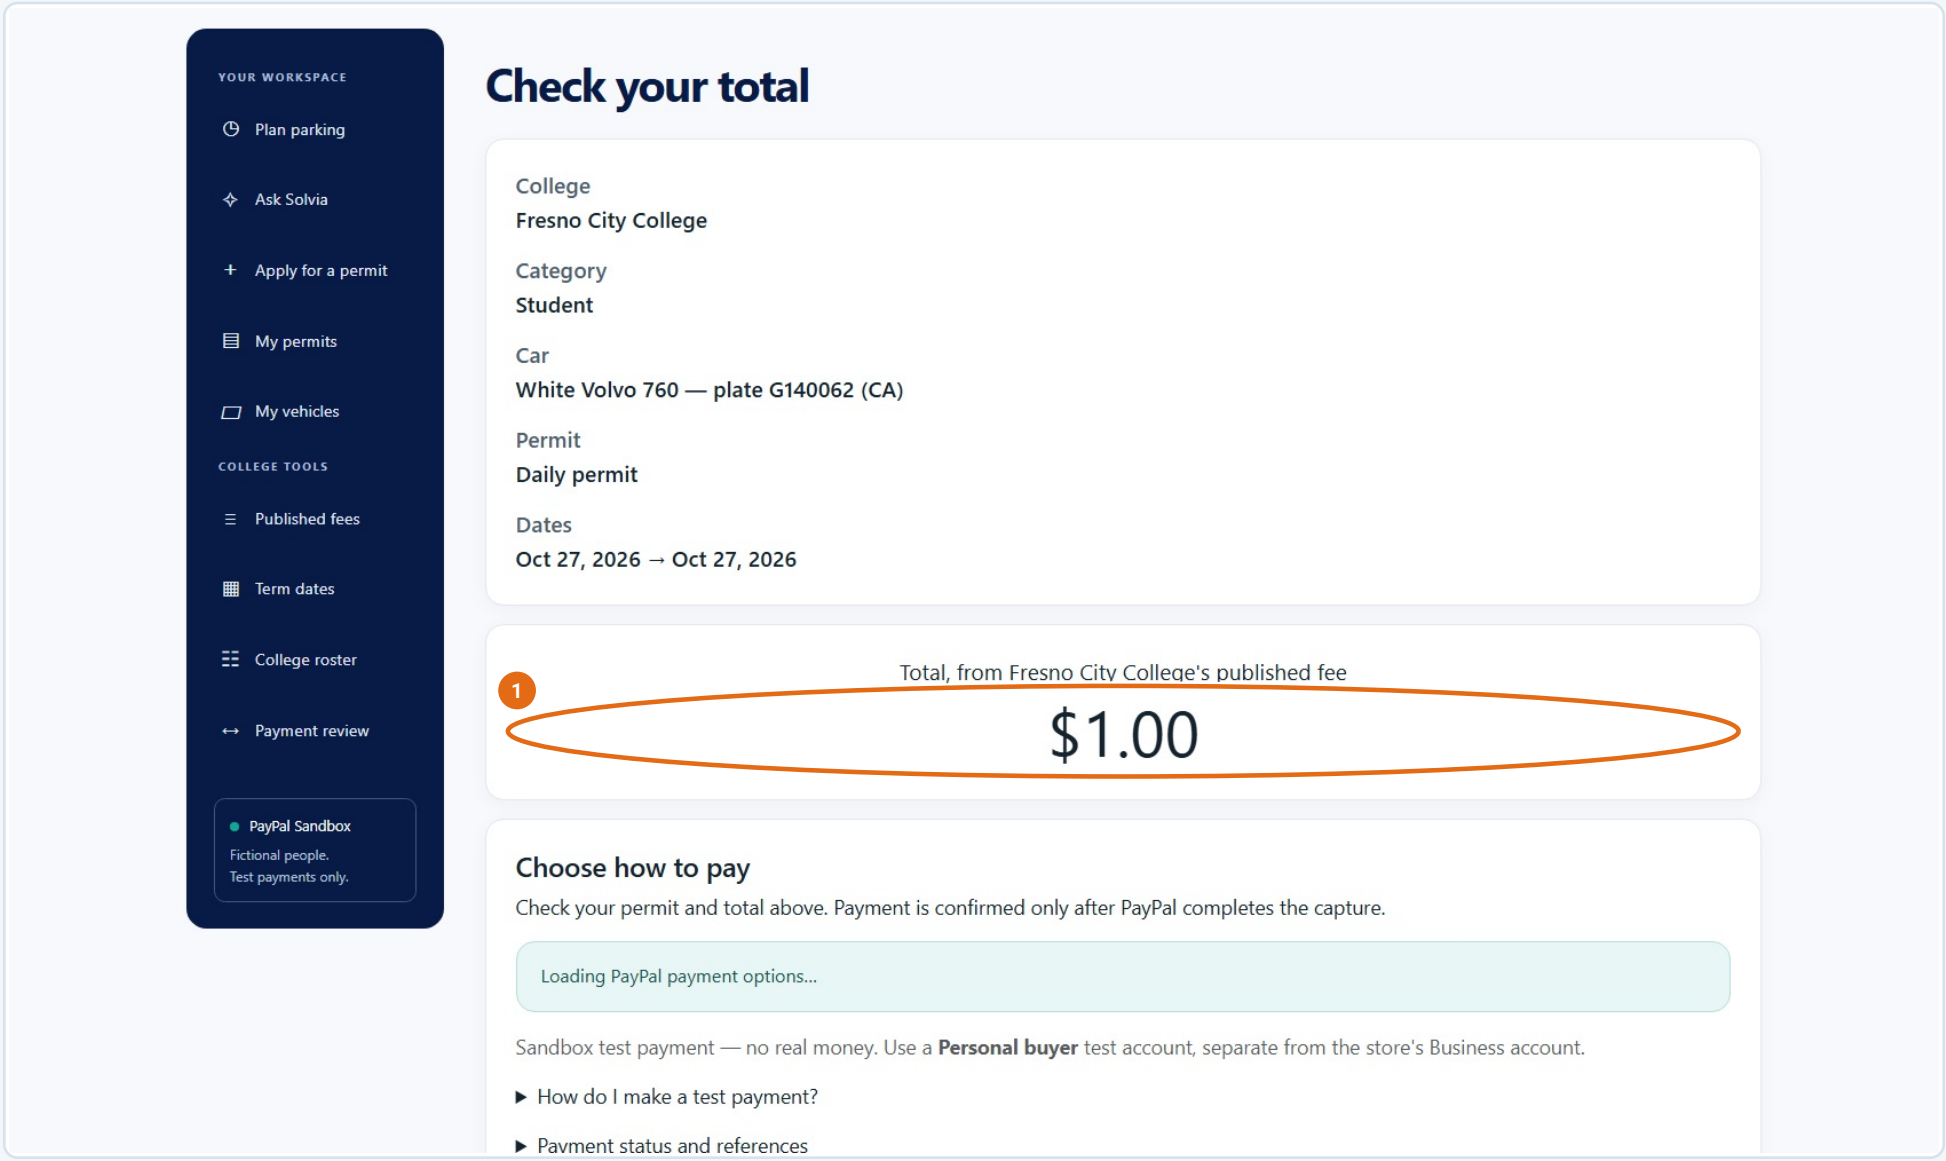

The planned college and visit date carry forward. Describe the car, including its plate and state. Check Day pass (or your term selection), then choose Read my answers. AI prepares editable fields; it never decides the fee.

6. Check the plate, state and vehicle

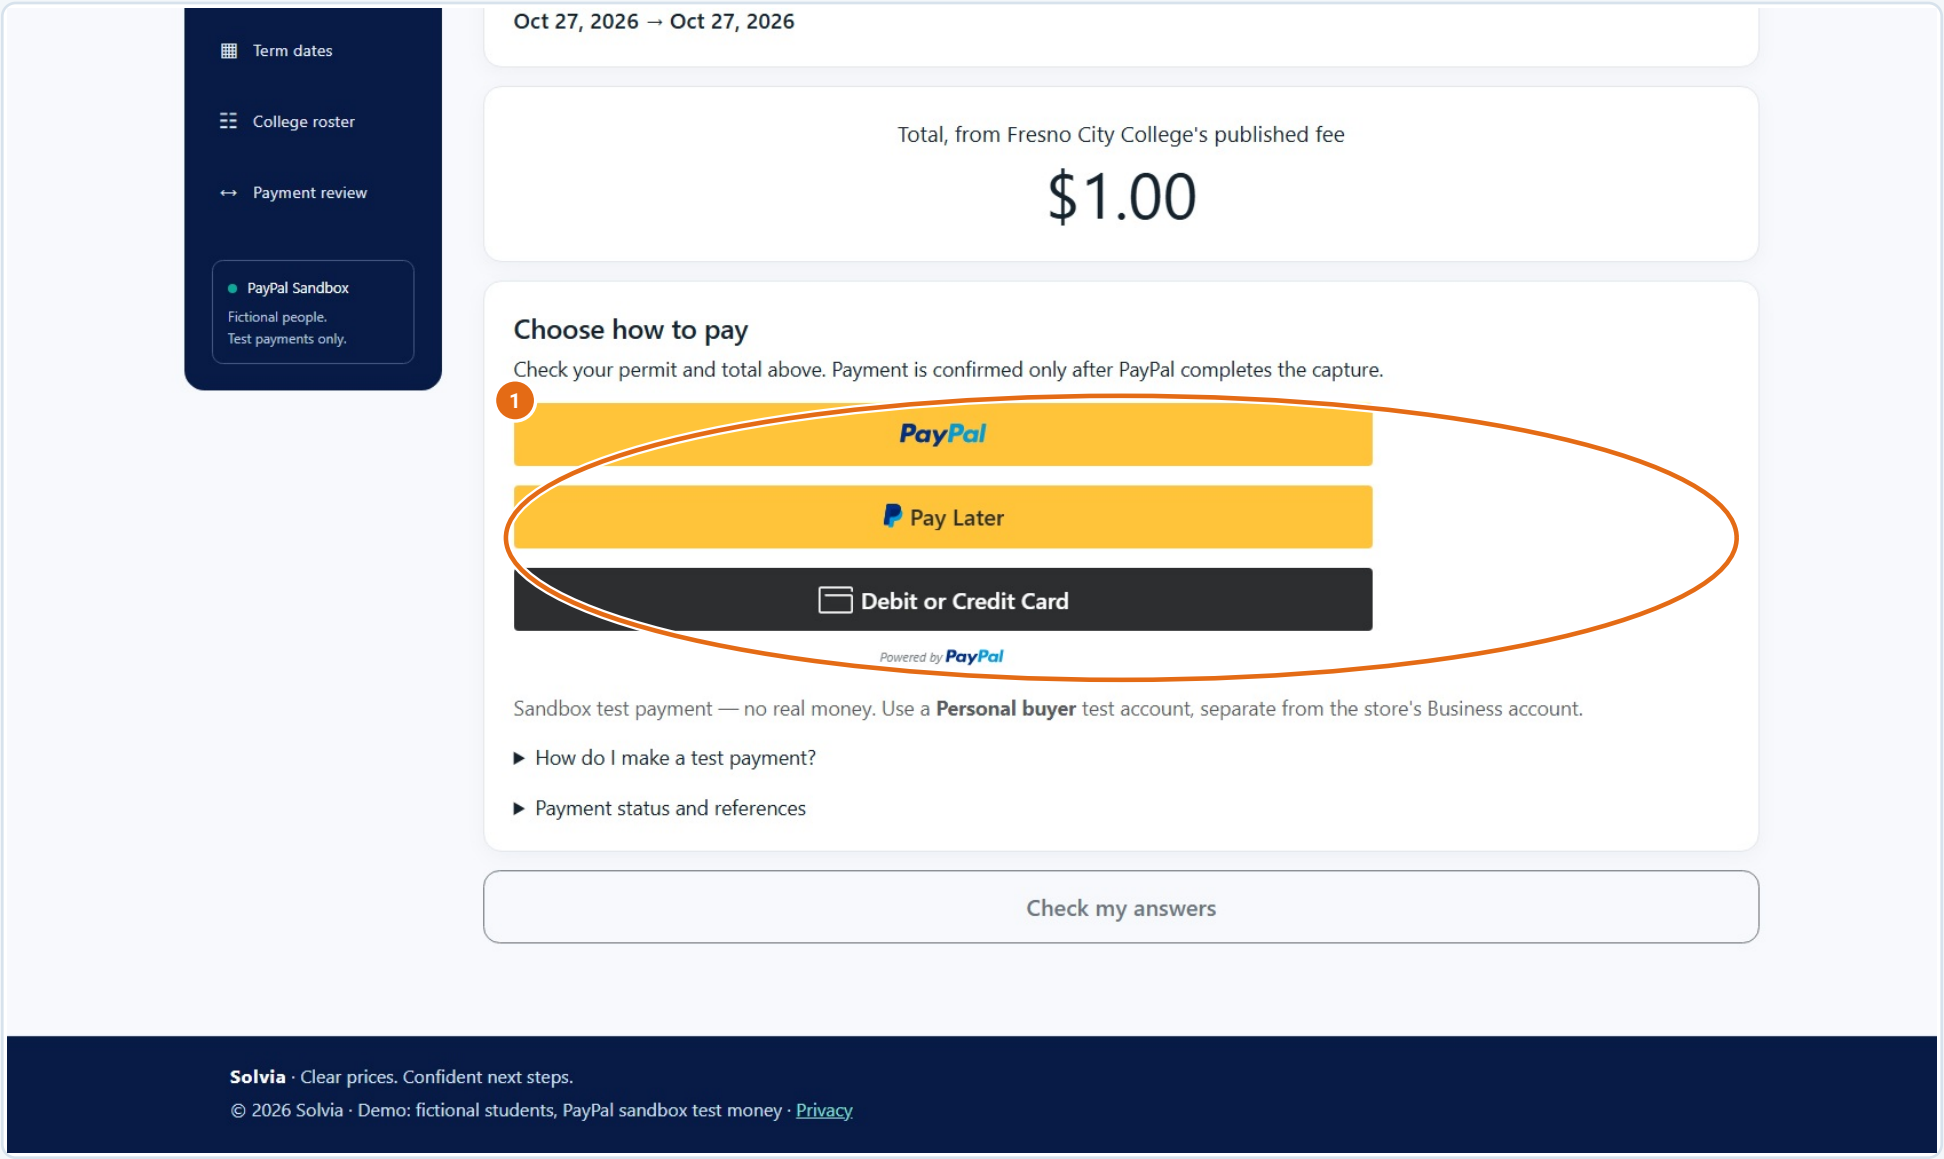

Check every editable field. Correct anything before selecting Yes - show my total. Fix it returns to the questions with the draft retained. Your reviewed fields are saved; a payment is not made at this step.

7. Check the exact total before paying

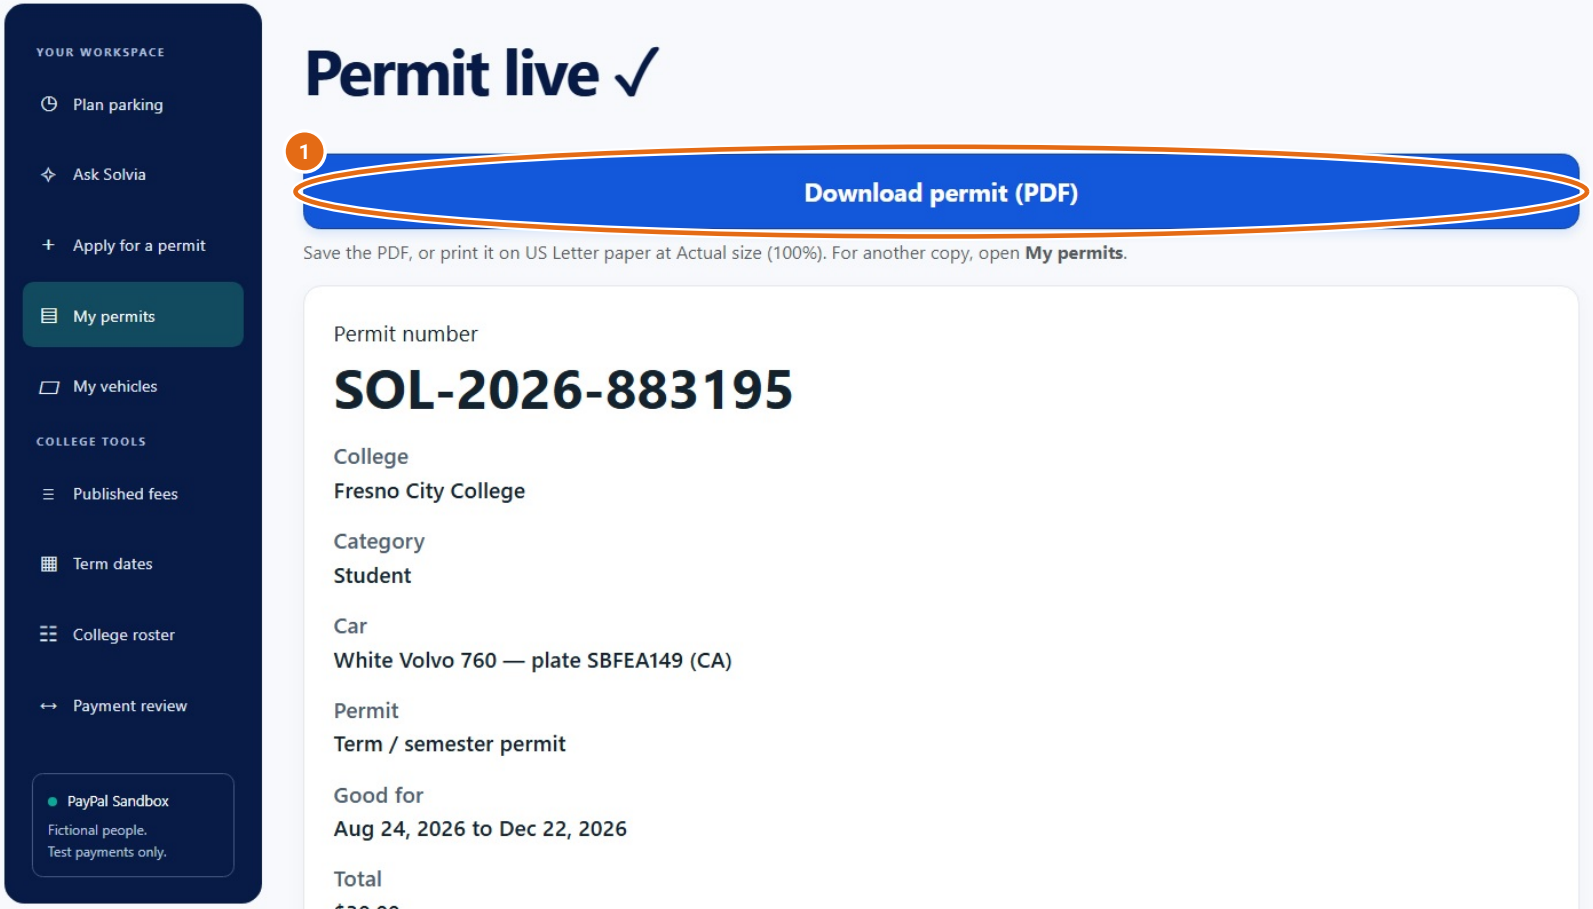

This fresh Student day-pass draft totals $1.00 and remains unpaid. Confirm campus, plate, permit and dates. Official payment buttons are on this same page; there is no extra checkout step for starting payment.

8. Pay using the official Sandbox options

Use a separate PayPal Personal Sandbox buyer, or official generated Sandbox card details when card checkout is offered. Eligible methods are rendered by PayPal. Wait for a completed capture and confirmation. This guide clicks no payment button and creates no order or capture.

9. After confirmed payment: save the PDF

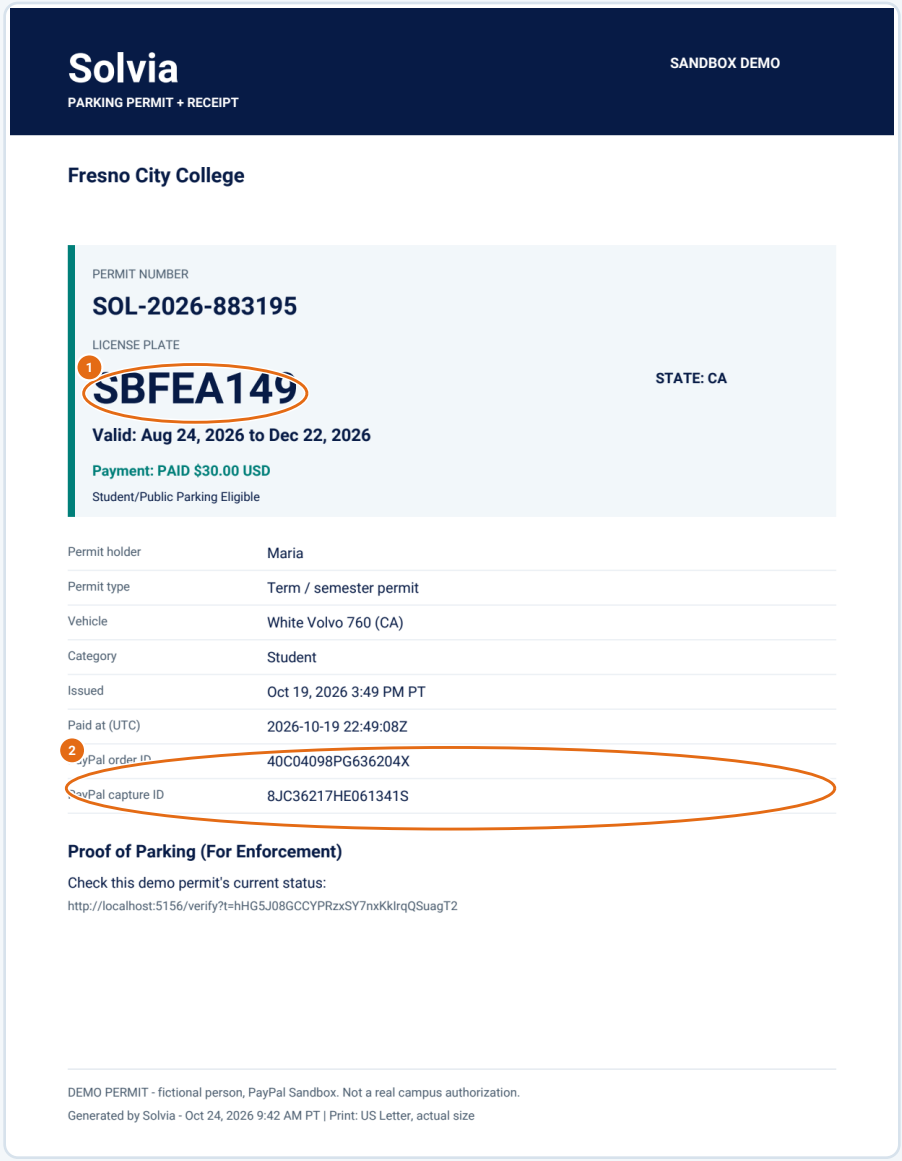

Separate existing paid example SOL-2026-883195: SBFEA149, $30.00 term permit. Choose Download permit (PDF). This is not payment for the fresh $1 draft. Check validity separately from payment confirmation.

10. Retrieve the same PDF later

Oct 19, 2026 3:50 PM PT	Modesto Junior College / Columbia College / YCCD	Daily permit	SB3D6FF5 (CA)	Oct 19, 2026 → Oct 19, 2026	Student	Paid ($2.00) This permit ended on October 19, 2026.	Permit (PDF) Receipt

Proof of Parking (For Enforcement)

Check this demo permit's current status:

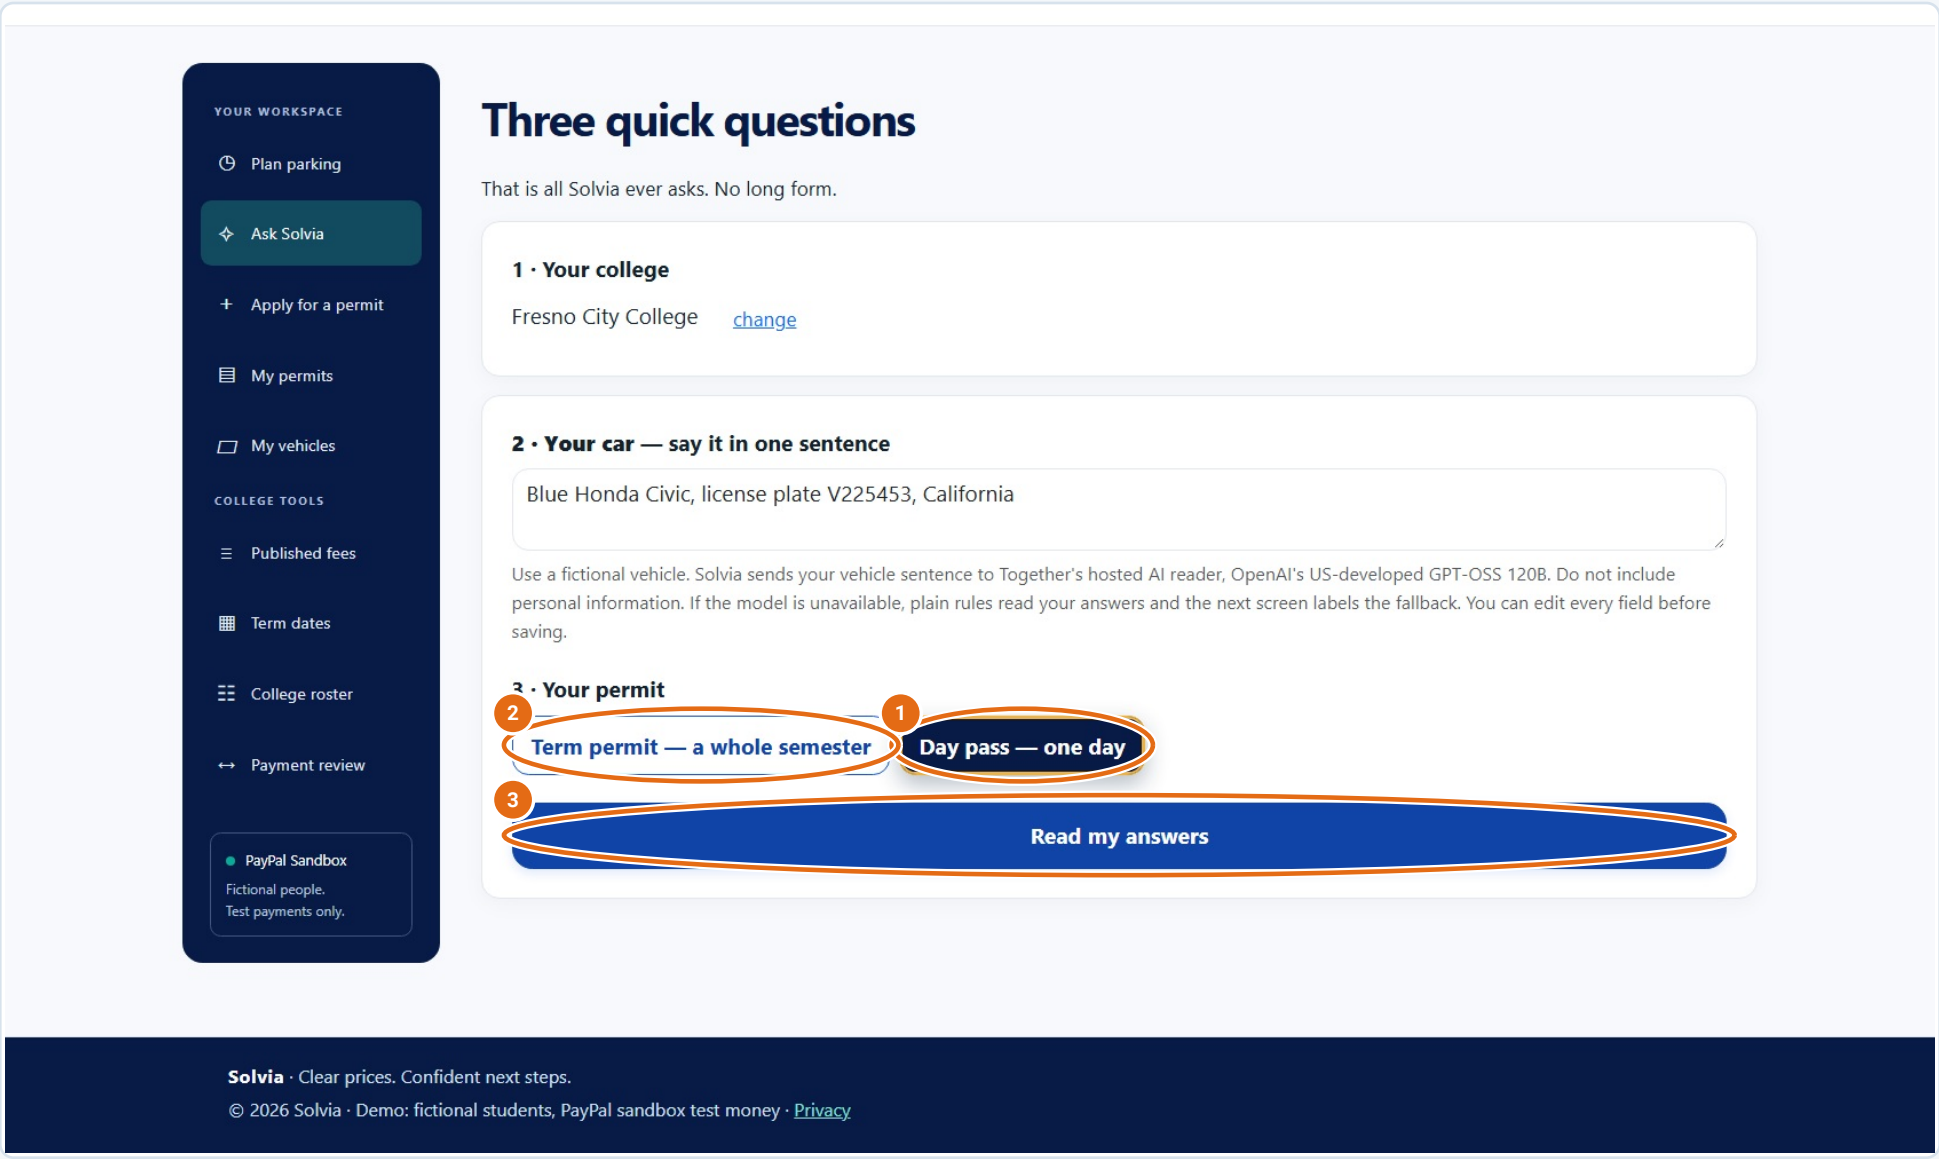

http://localhost:5156/verify?t=hHG5J08GCCYPRzxSY7nxKkIrqQSuagT2

DEMO PERMIT - fictional person, PayPal Sandbox. Not a real campus authorization.

Generated by Solvia - Oct 24, 2026 9:42 AM PT | Print: US Letter, actual size

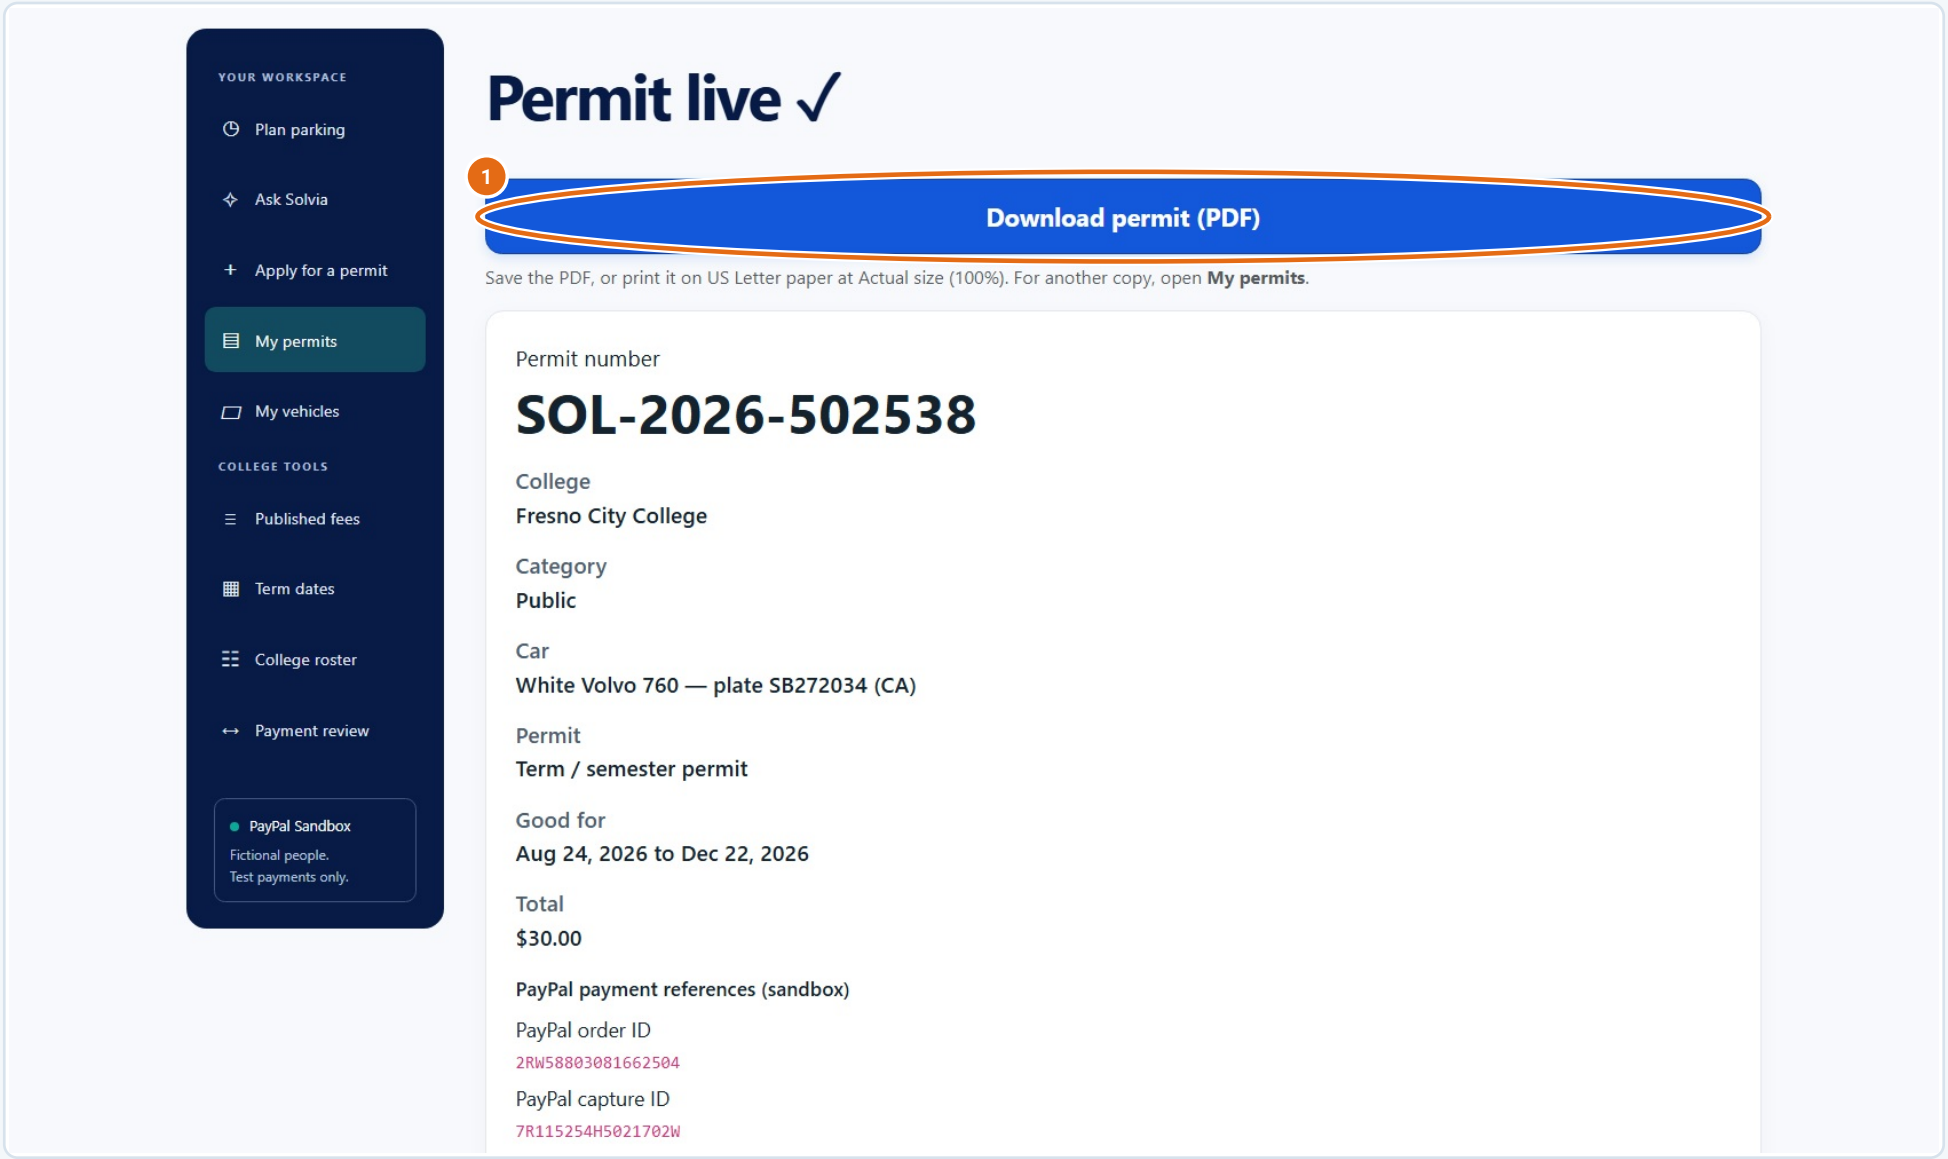

Actual downloaded PDF for separate paid permit SOL-2026-883195. Check plate SBFEA149, dates and the saved Sandbox payment references. Save the file. To print, use your PDF viewer: US Letter, Actual size / 100%. The new $1 draft remains unpaid.

Visitor / public: choose a day or term permit

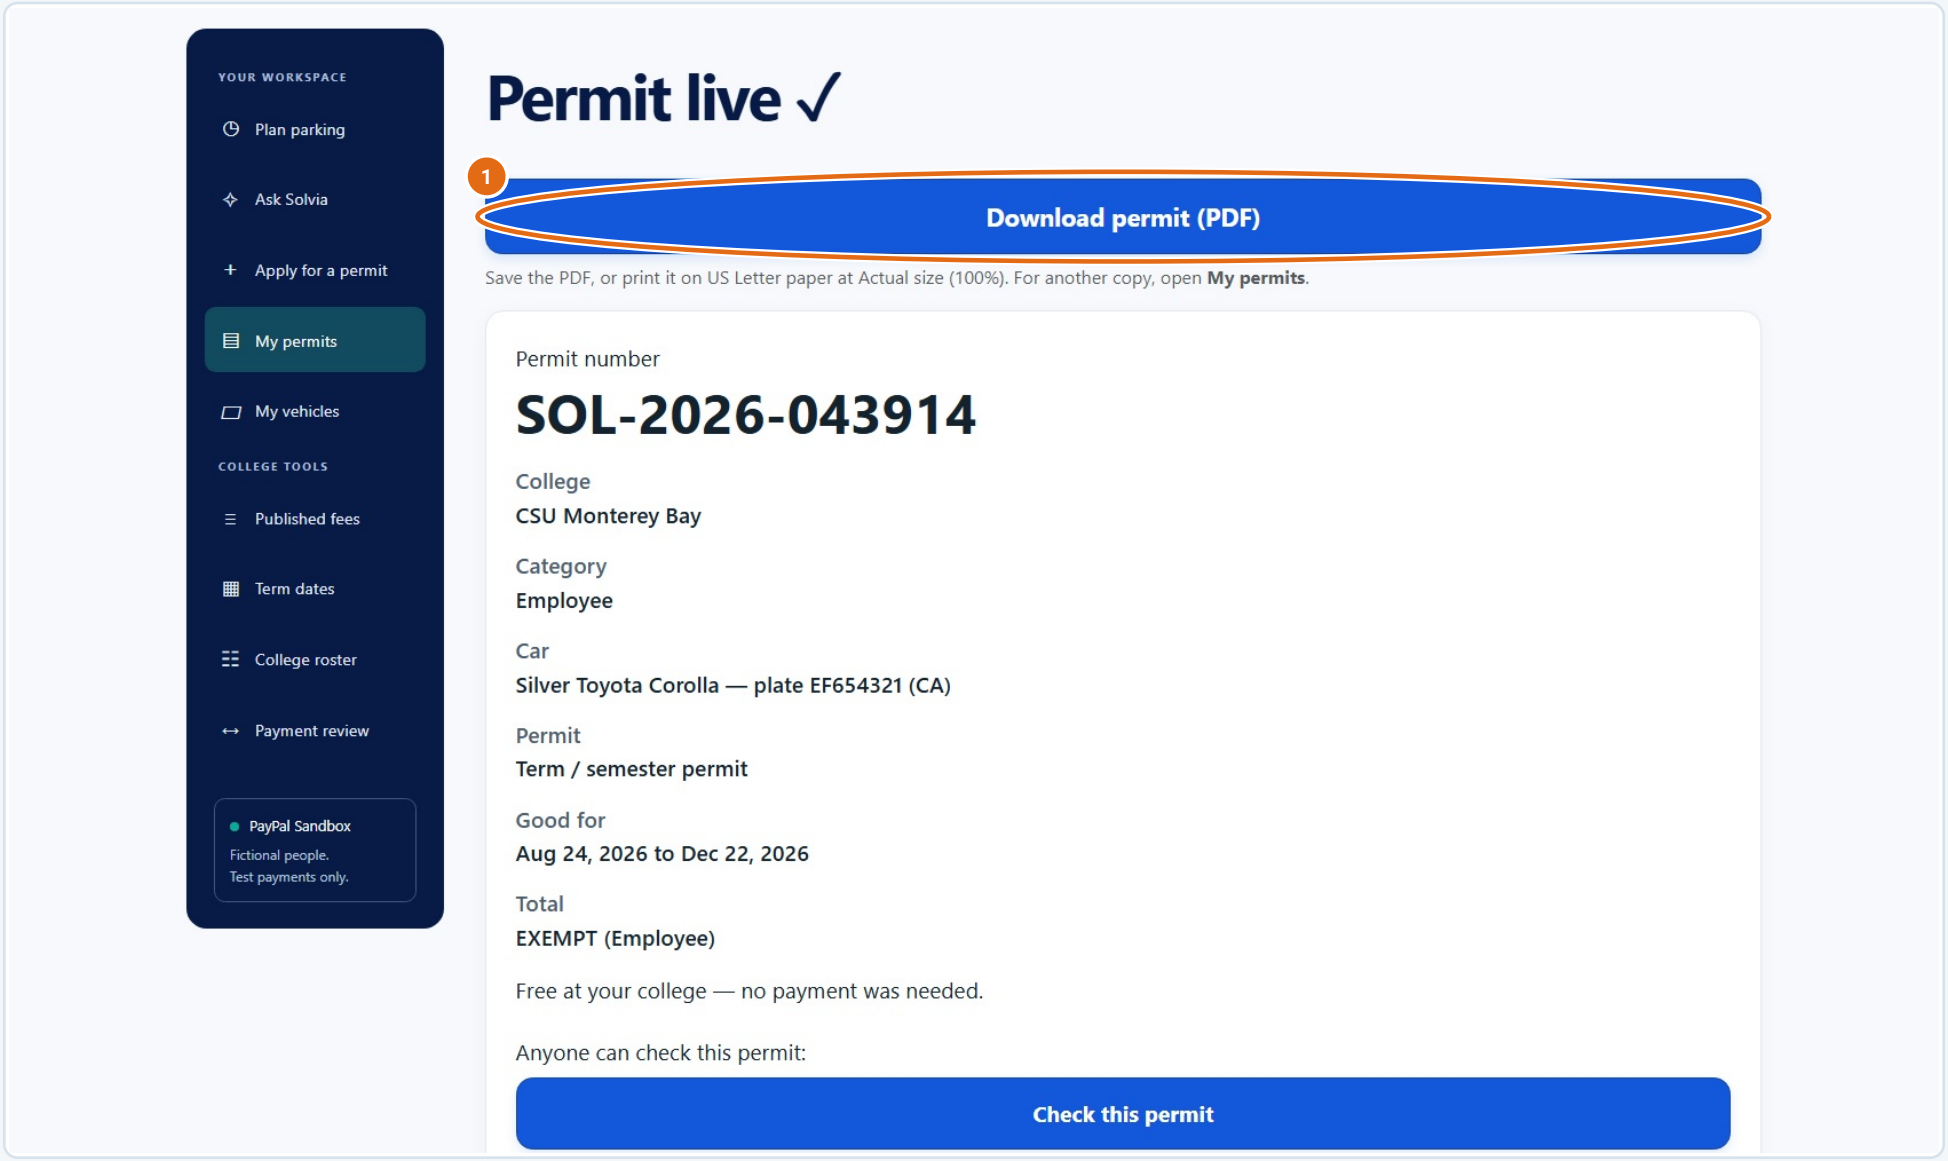

Choose Pat (Visitor/Public) on Home, then use the same journey. Students and visitors may choose day or term permits when published. Both pay the applicable positive total; visitors are not automatically exempt.

Visitor / public: the same PDF access

Separate existing paid Visitor example SOL-2026-502538, $30.00. After confirmation, use Download permit (PDF), or My permits then Permit (PDF). No Visitor payment is made for this walkthrough.

Employee: confirm the demo exemption

Choose Elena (Employee). The demo exemption issues without PayPal. This existing exempt permit is SOL-2026-043914; download it through the same PDF control. Actual employee eligibility must follow college policy.
