SOLVIA

Your permit, step by step.

A screenshot guide for students, visitors and employees

Choose your journey

1 Students

Maria - Student

Choose a day pass or a term permit. Review the campus's published fee; some campuses have a free option.

2 Visitors / public

Pat - Public

Choose a day pass or a term permit. When the total is above $0, complete the PayPal Sandbox payment.

3 Employees

Elena - Employee

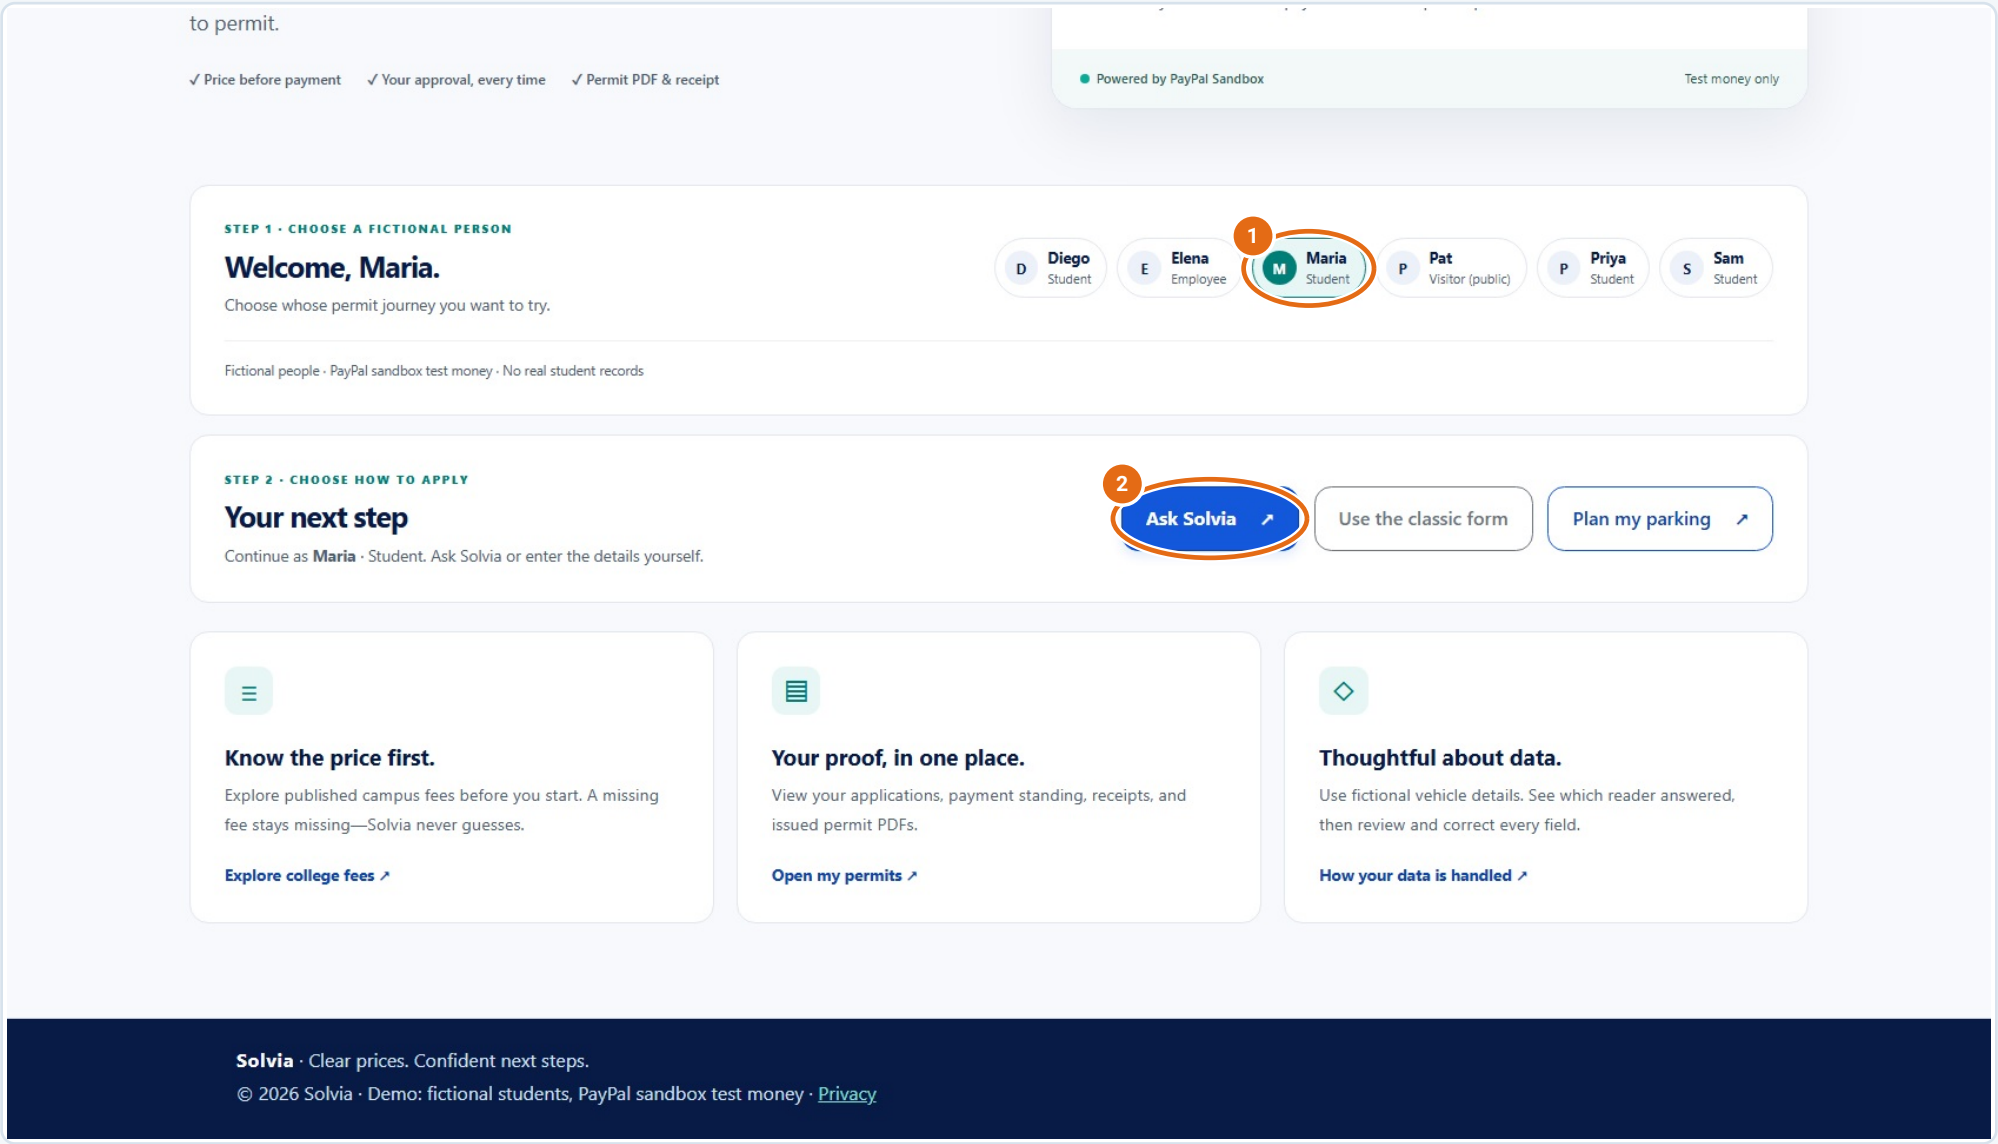

The eligible employee demo profile is exempt. Check the $0 total, then issue the permit without a PayPal payment.

Before you start

Check the details	The AI reader only pre-fills a draft. Correct the license plate, state, vehicle and dates before continuing.
Wait for confirmation	An unpaid permit has no printable permit PDF. If a payment is unfinished, use Pay now / Finish paying, then wait for confirmation.
Download again or print	Open My permits, then Permit (PDF). Save the PDF or use your PDF viewer's Print button / Ctrl+P. Check plate and validity dates first.

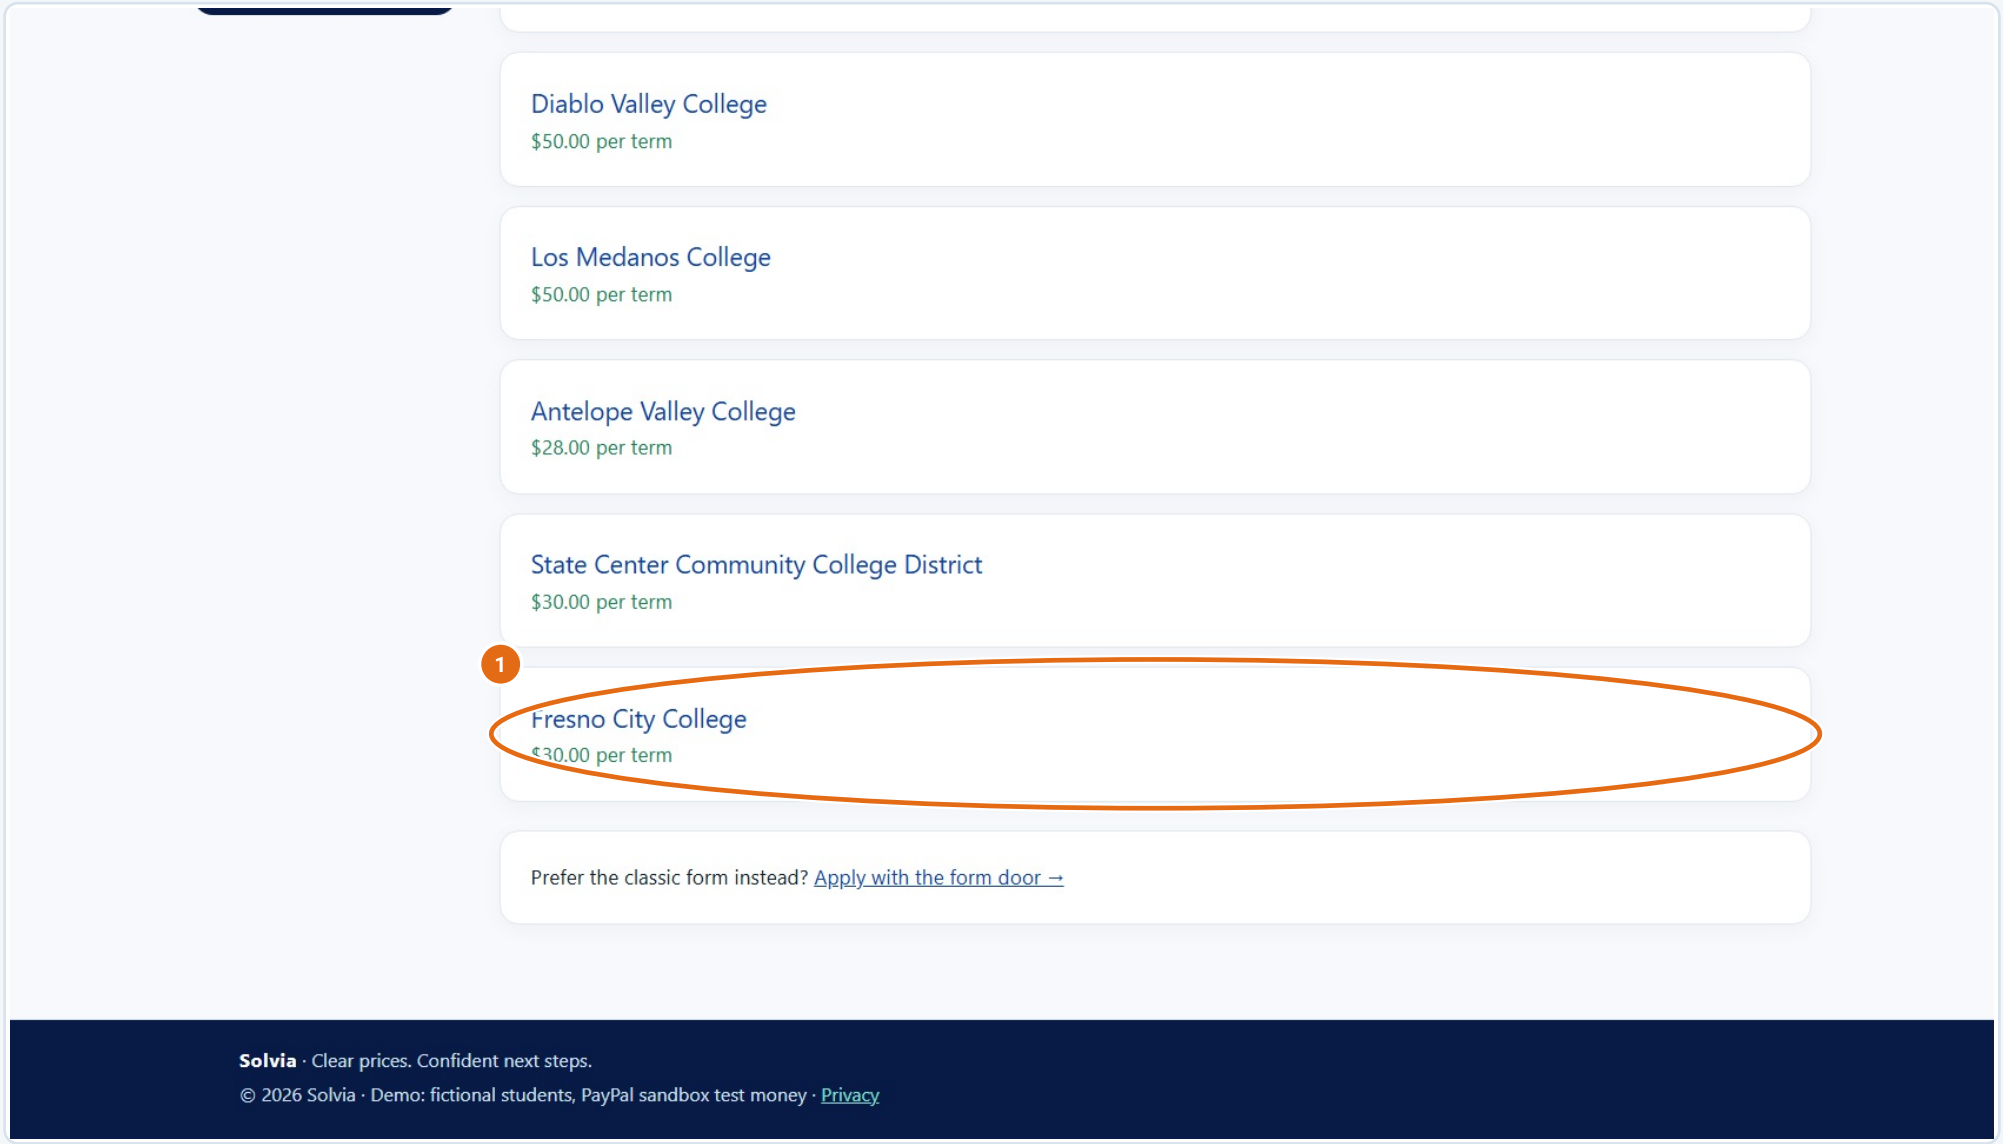

Fictional profiles and Sandbox test funds, not campus authorization. Fresh Student and Visitor drafts show the current app and OpenAI's US-developed GPT-OSS 120B through Together AI. Separate existing paid and exempt examples show PDF retrieval; they are not payment for the fresh unpaid drafts. This guide creates no PayPal order or capture.

Student: choose the person, then the journey

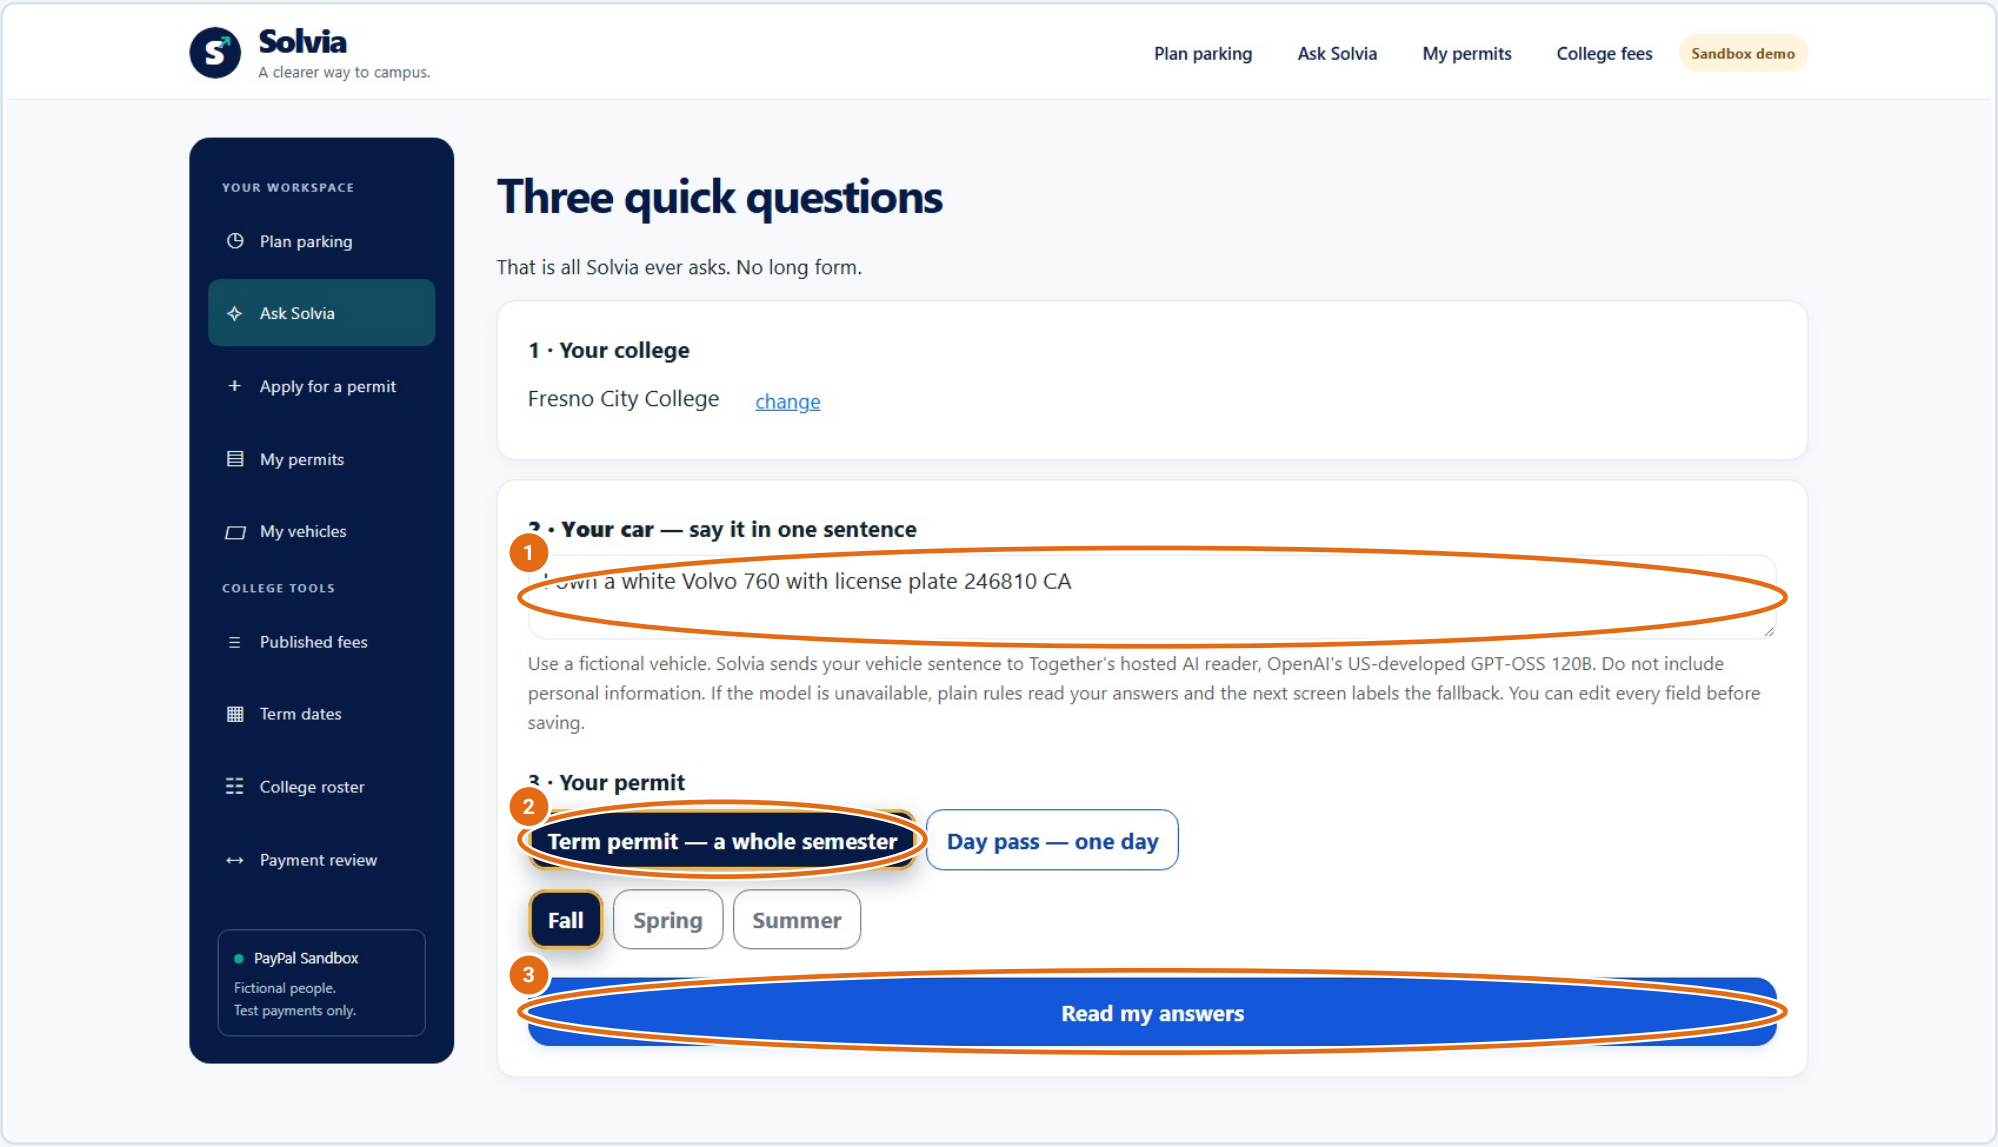

Step 1: choose fictional Maria (Student). Step 2: choose Ask Solvia, the classic form or Plan my parking. These are demo profiles, not production sign-in.

Choose the college

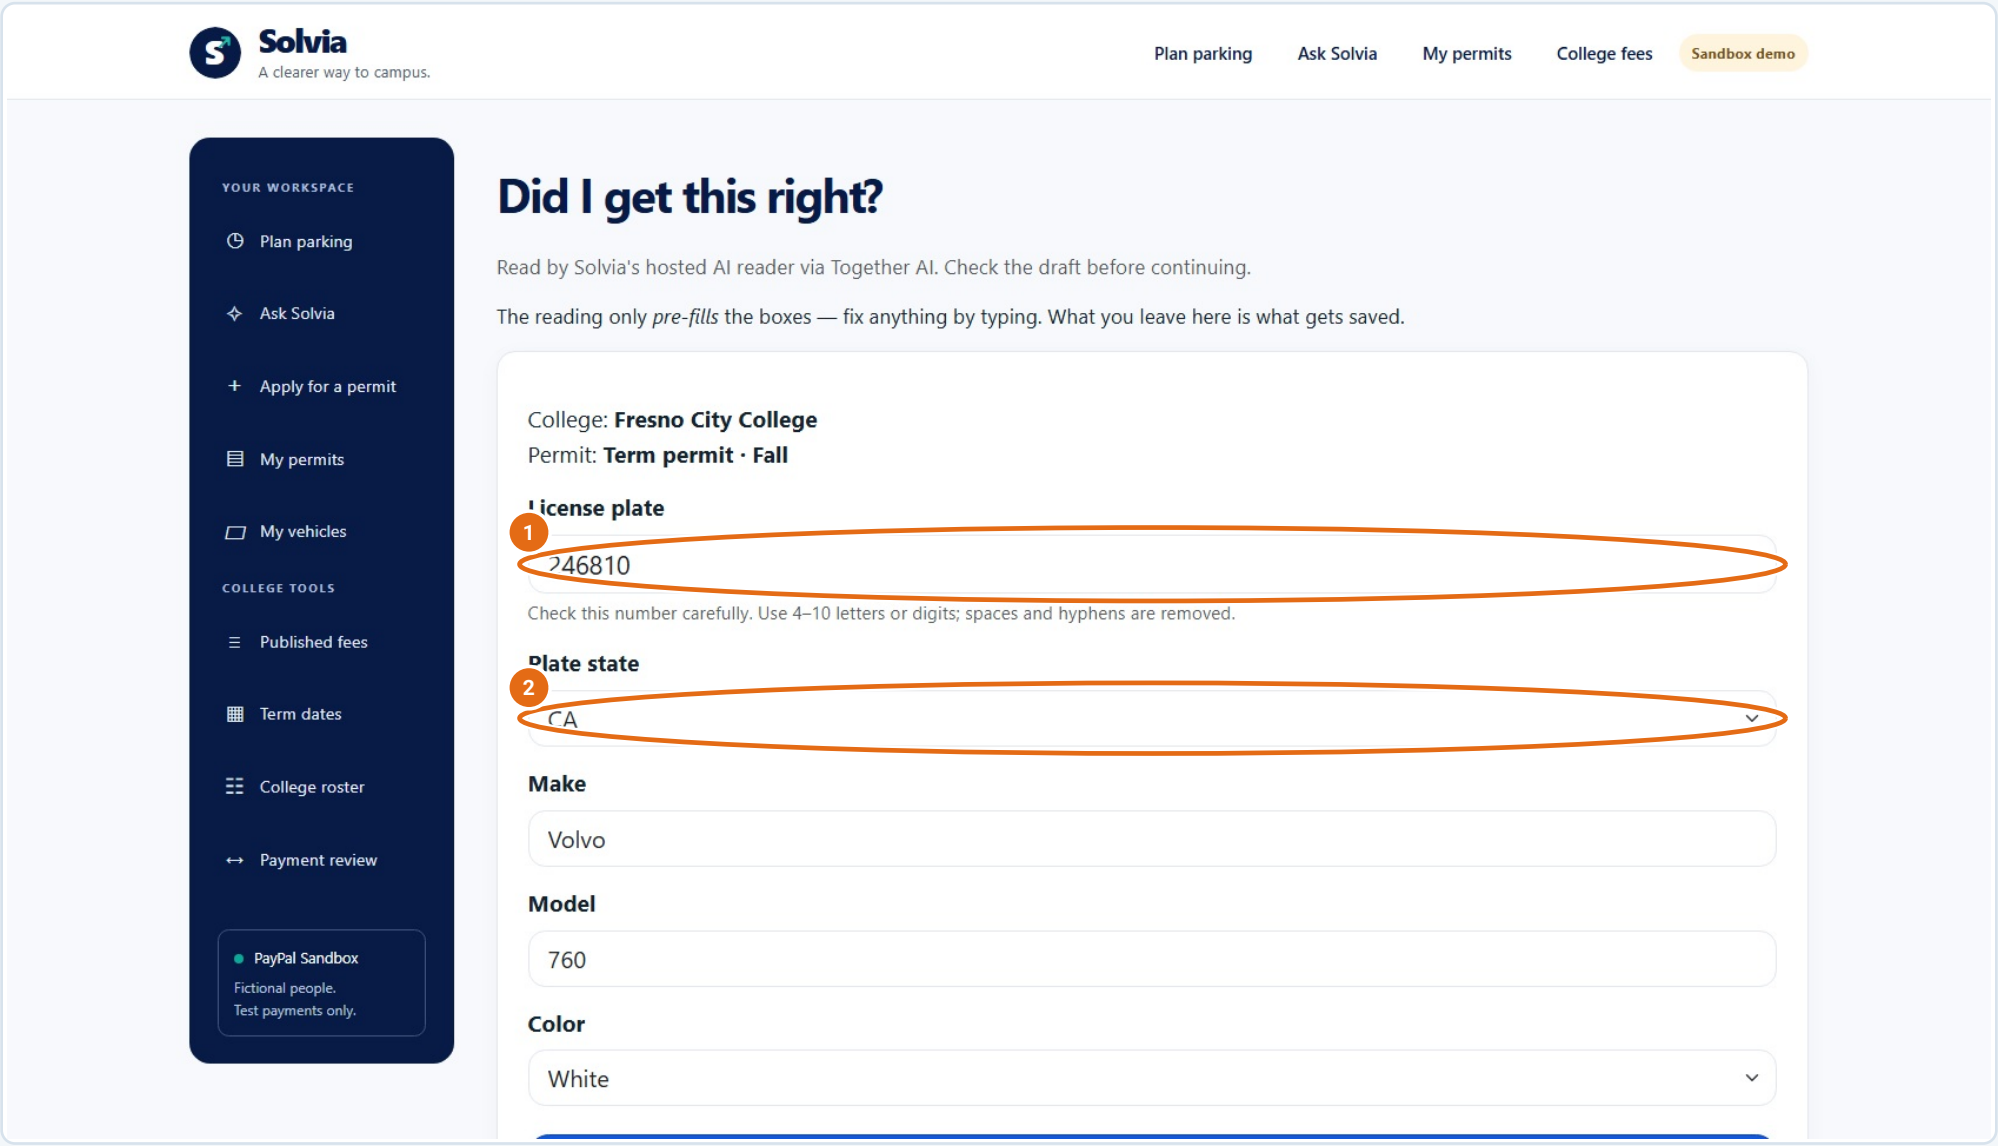

Select Fresno City College. Published CSV prices are a dated research snapshot; missing prices remain unavailable.

New application: your own vehicle sentence

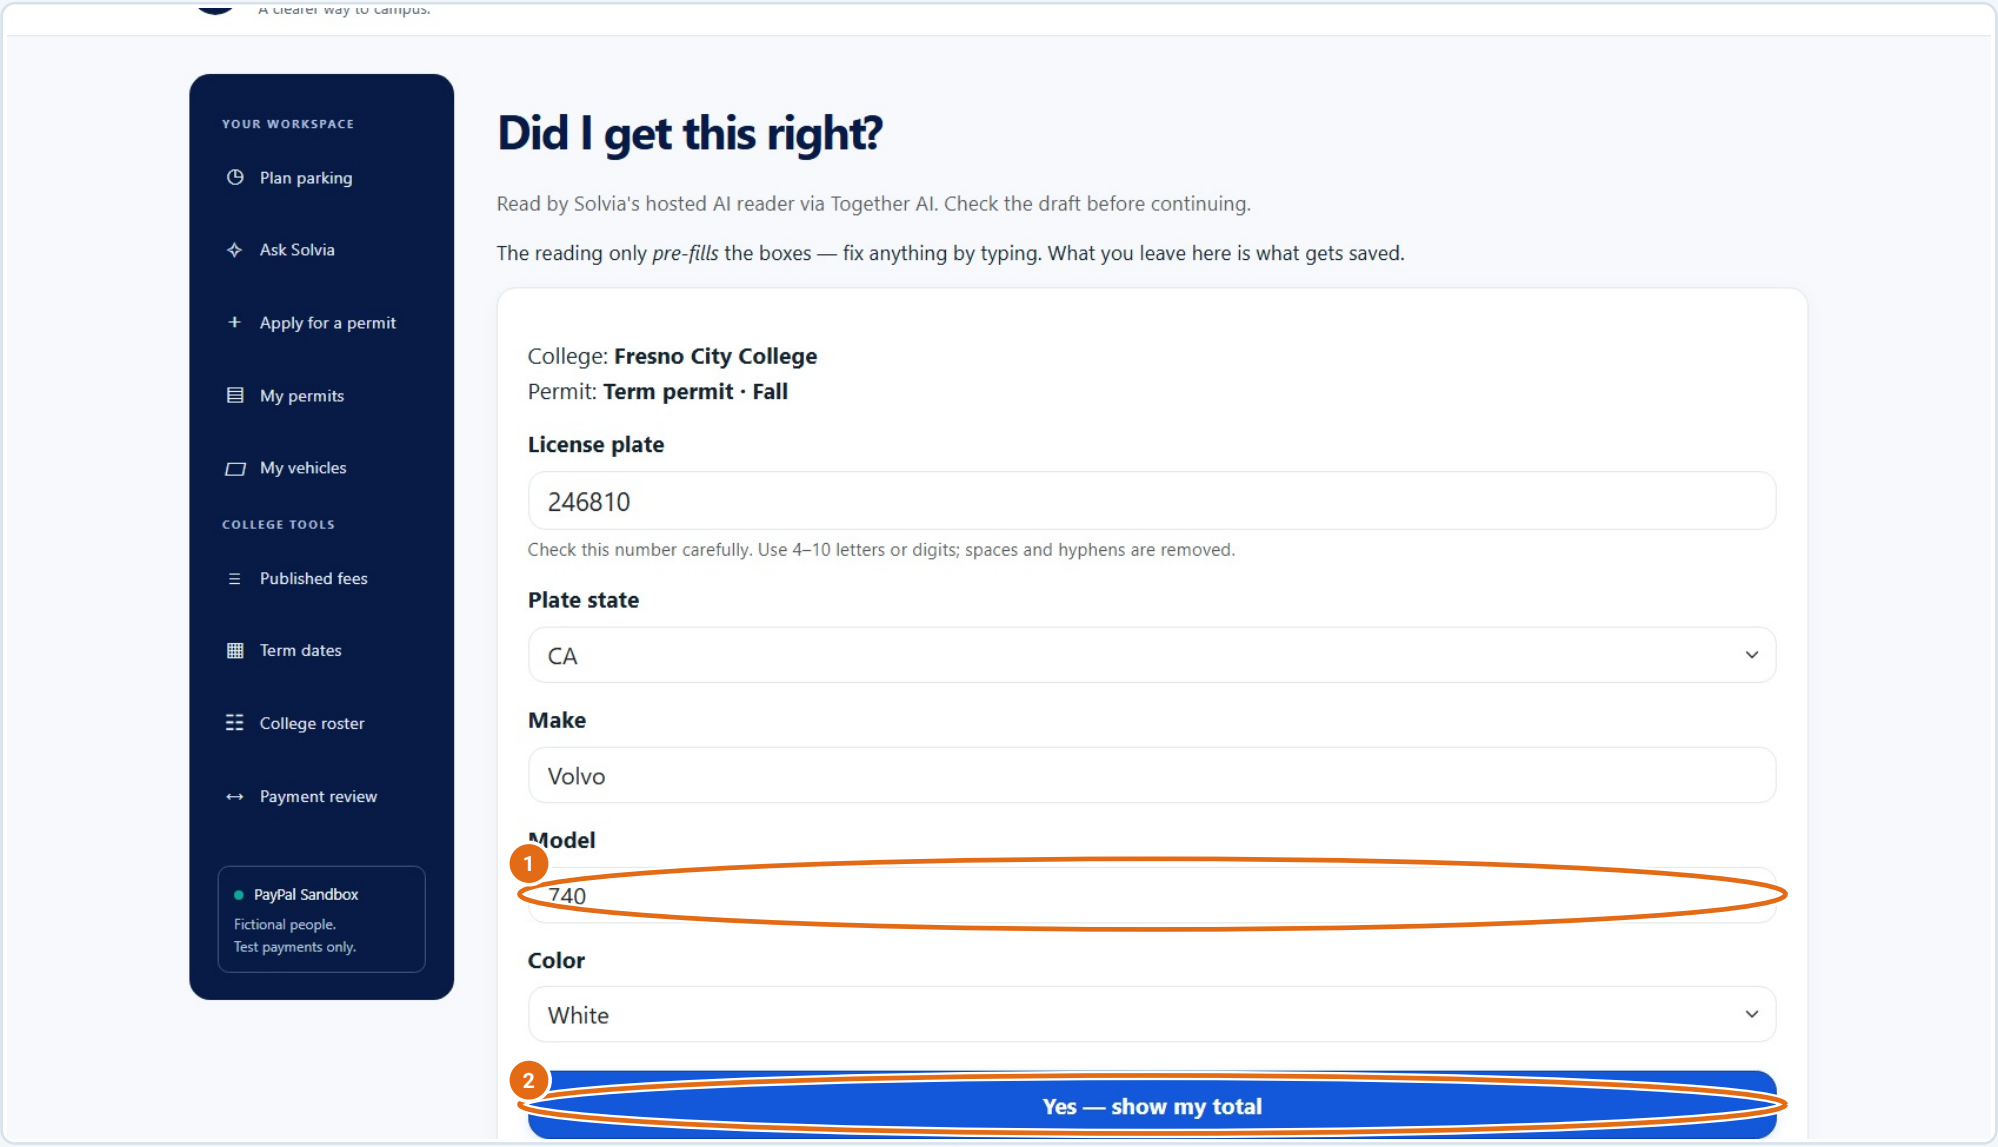

This fresh fictional Student draft says: I own a white Volvo 760 with license plate 246810 CA. The six-digit plate belongs to this example. Choose the permit and term, then read the draft.

New application: check the actual reading

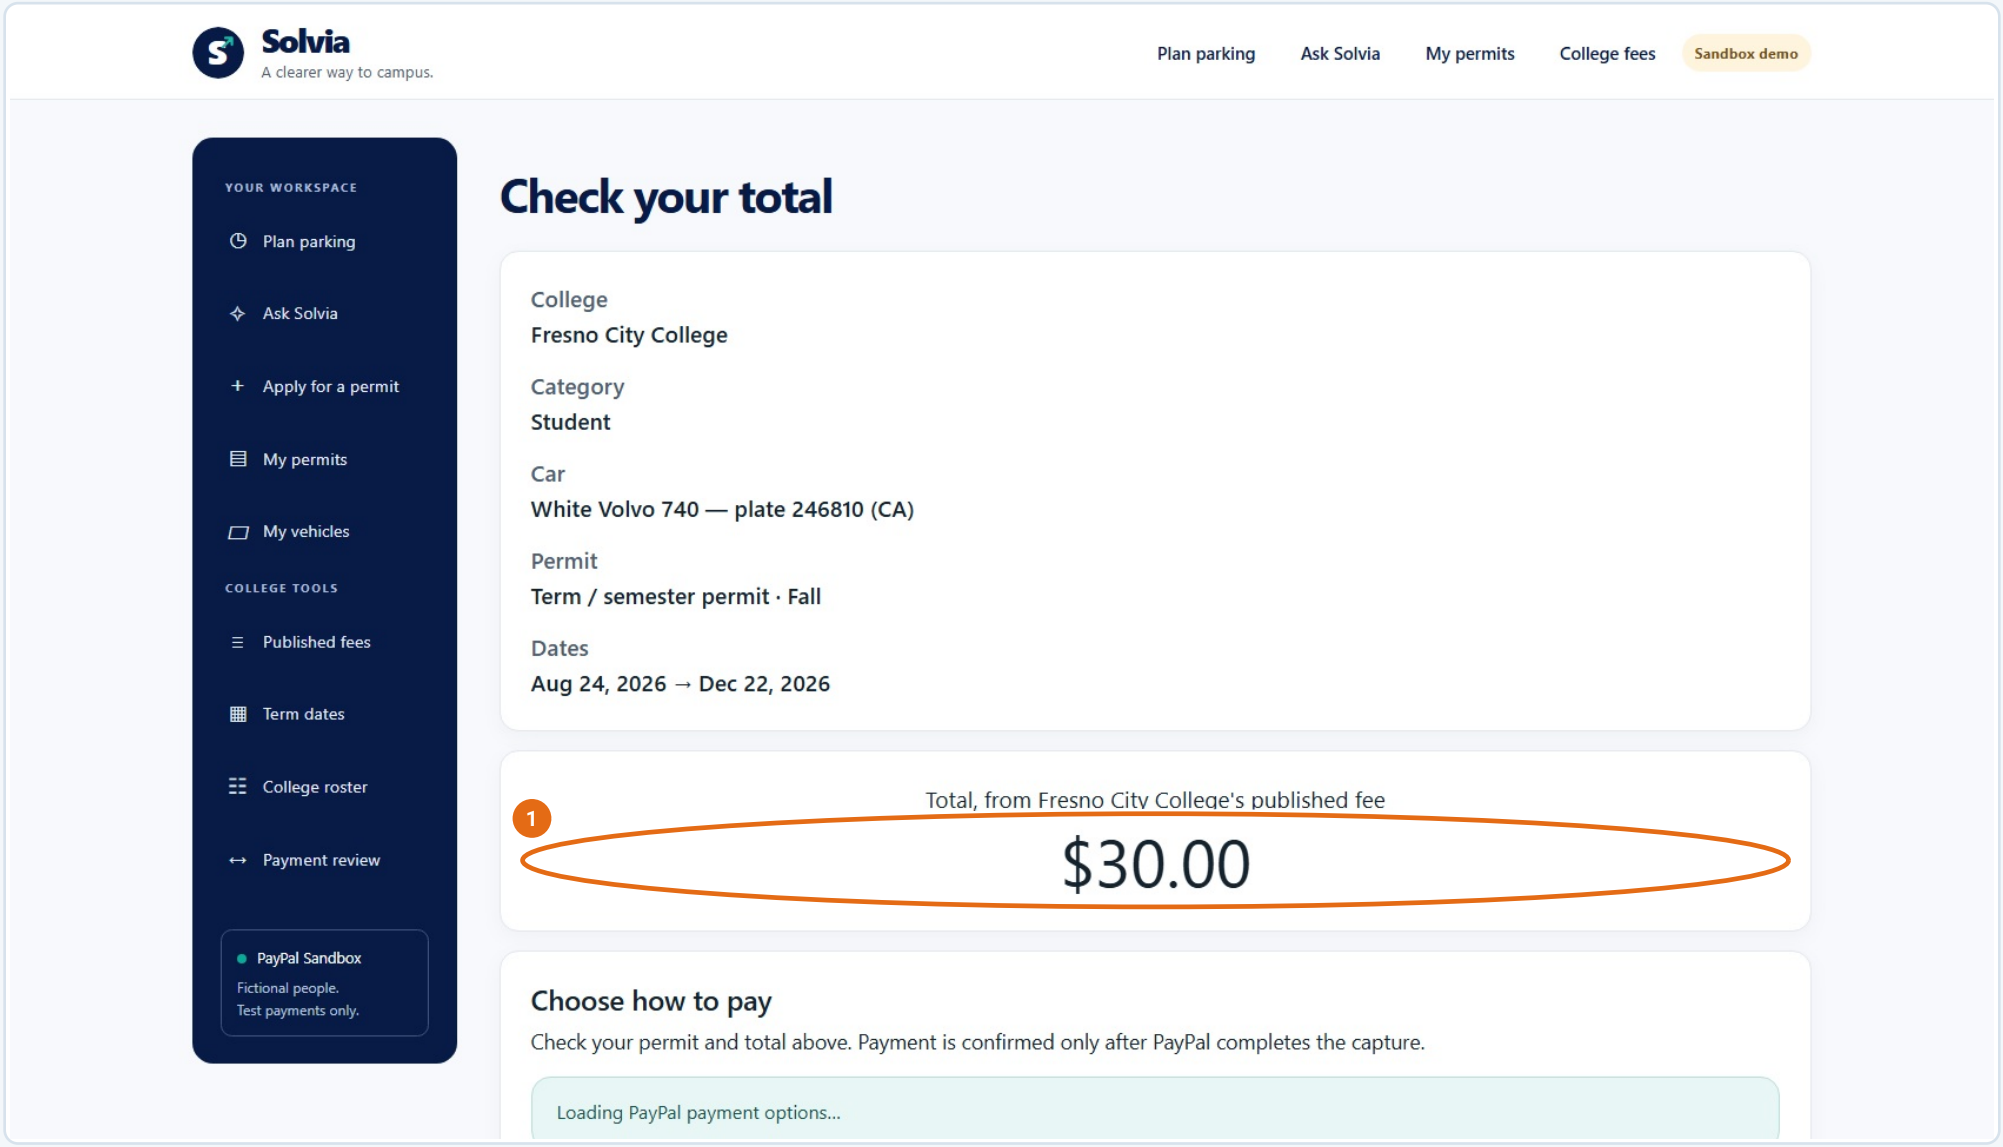

This actual together-labeled result contains plate 246810, Volvo, model 760, White and CA. These are the entered example's fields, not the older paid permit shown later.

New application: the correction stays

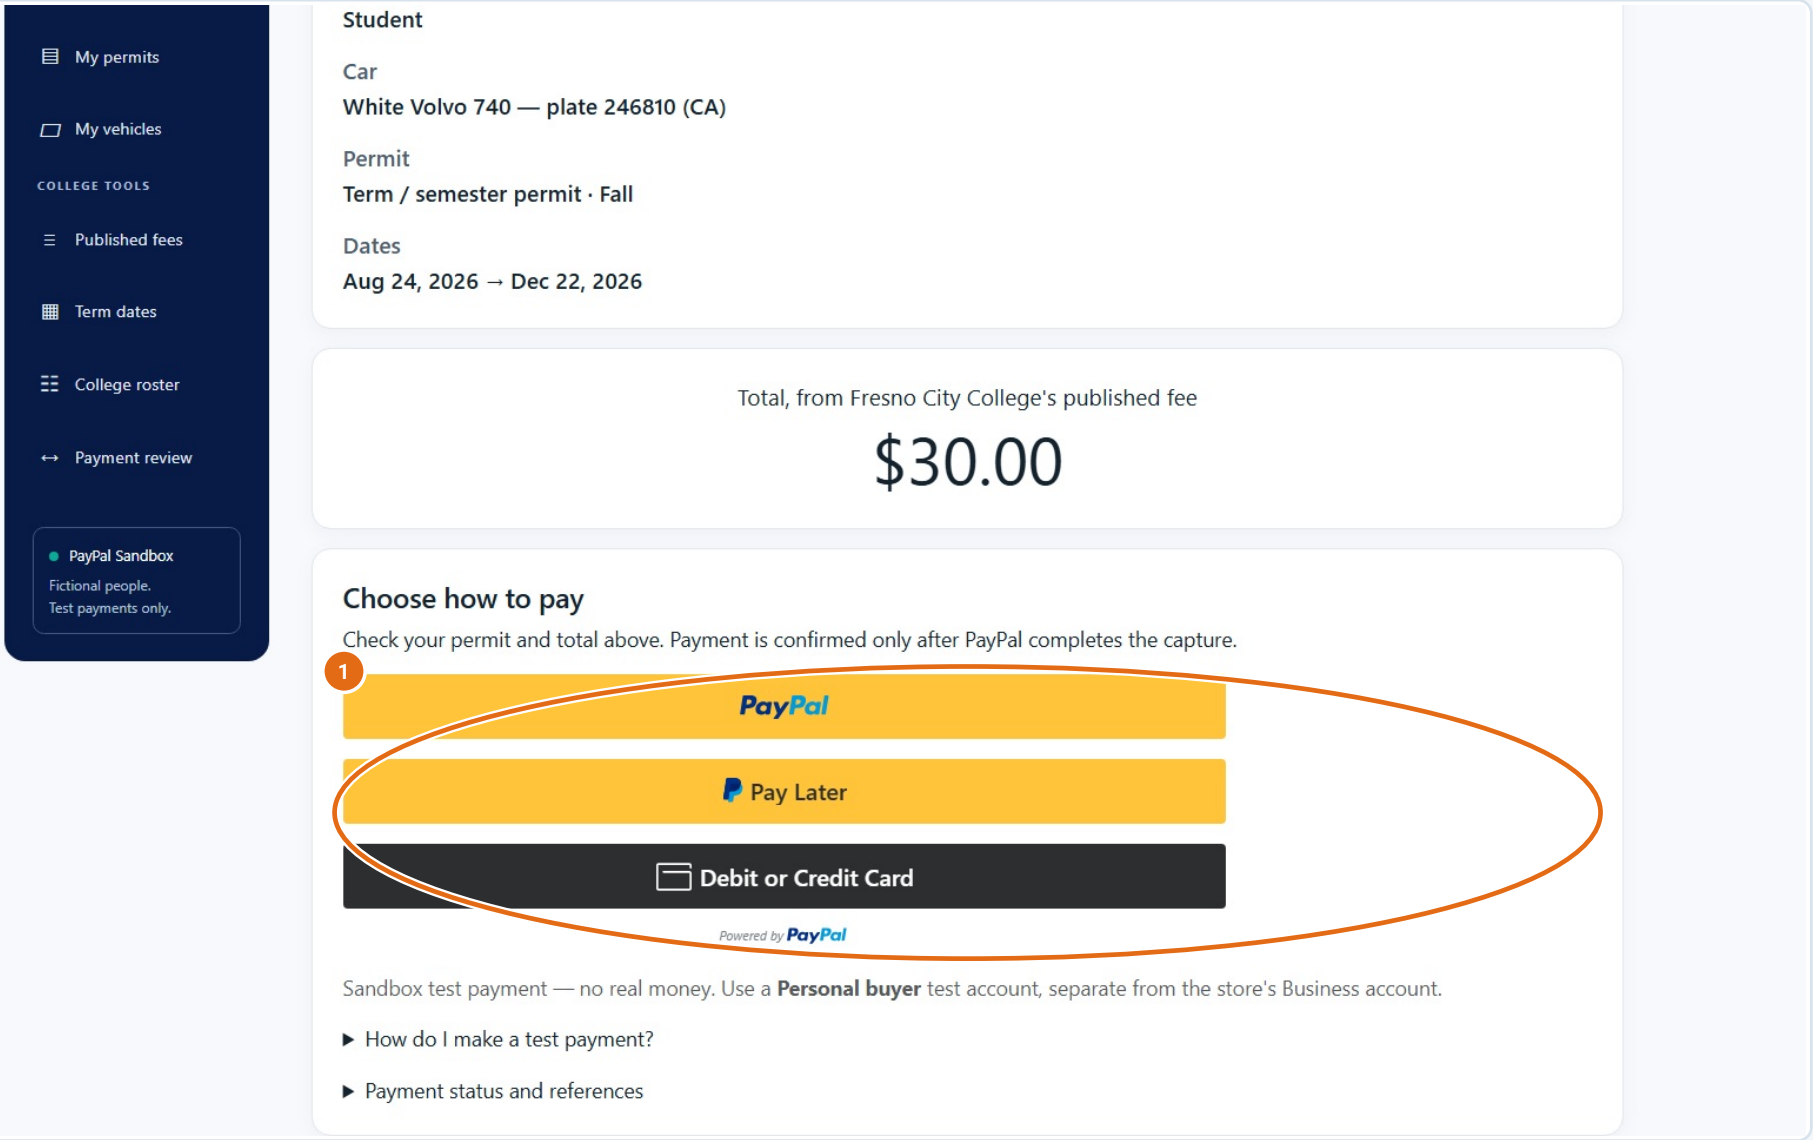

The person revised model 760 to 740, used Fix it, then returned through Read my answers. The reviewed 740 is preserved. Confirming this screen saves the fresh unpaid draft; it does not pay.

New application: Student exact total

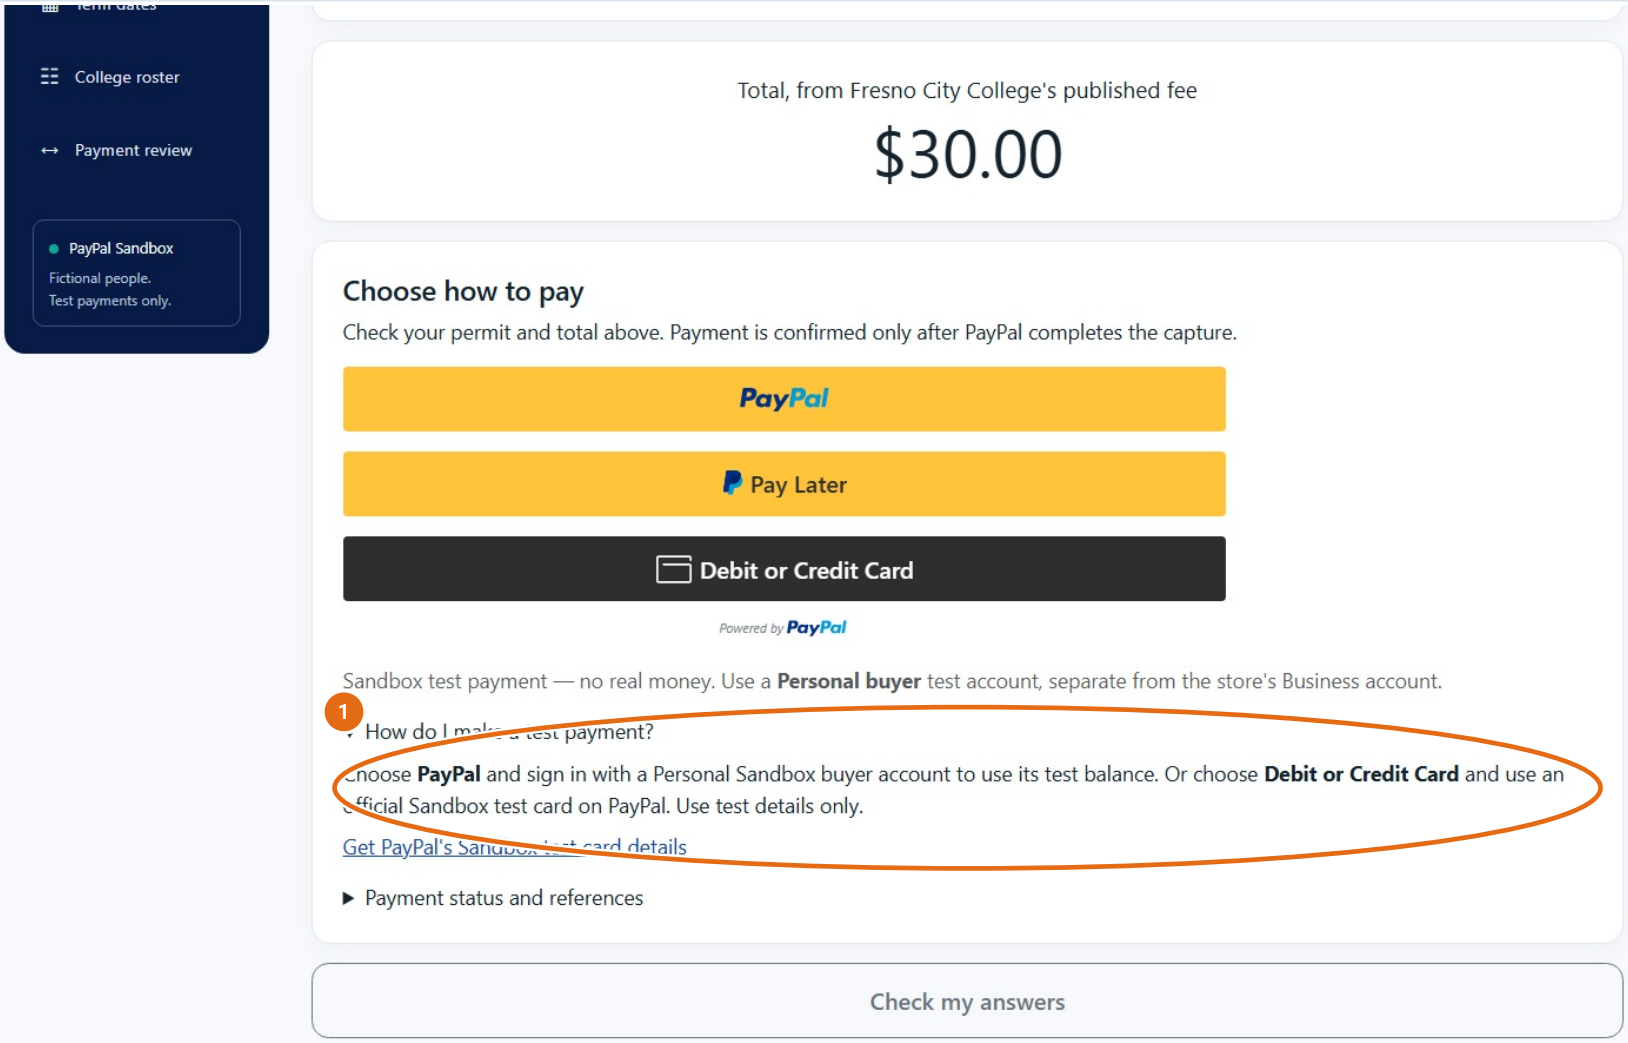

Fresh unpaid draft: Fresno City College, Student, plate 246810, White Volvo 740, $30.00. Official eligible PayPal choices appear directly below this review. No order or capture is created by this guide.

New application: official payment options

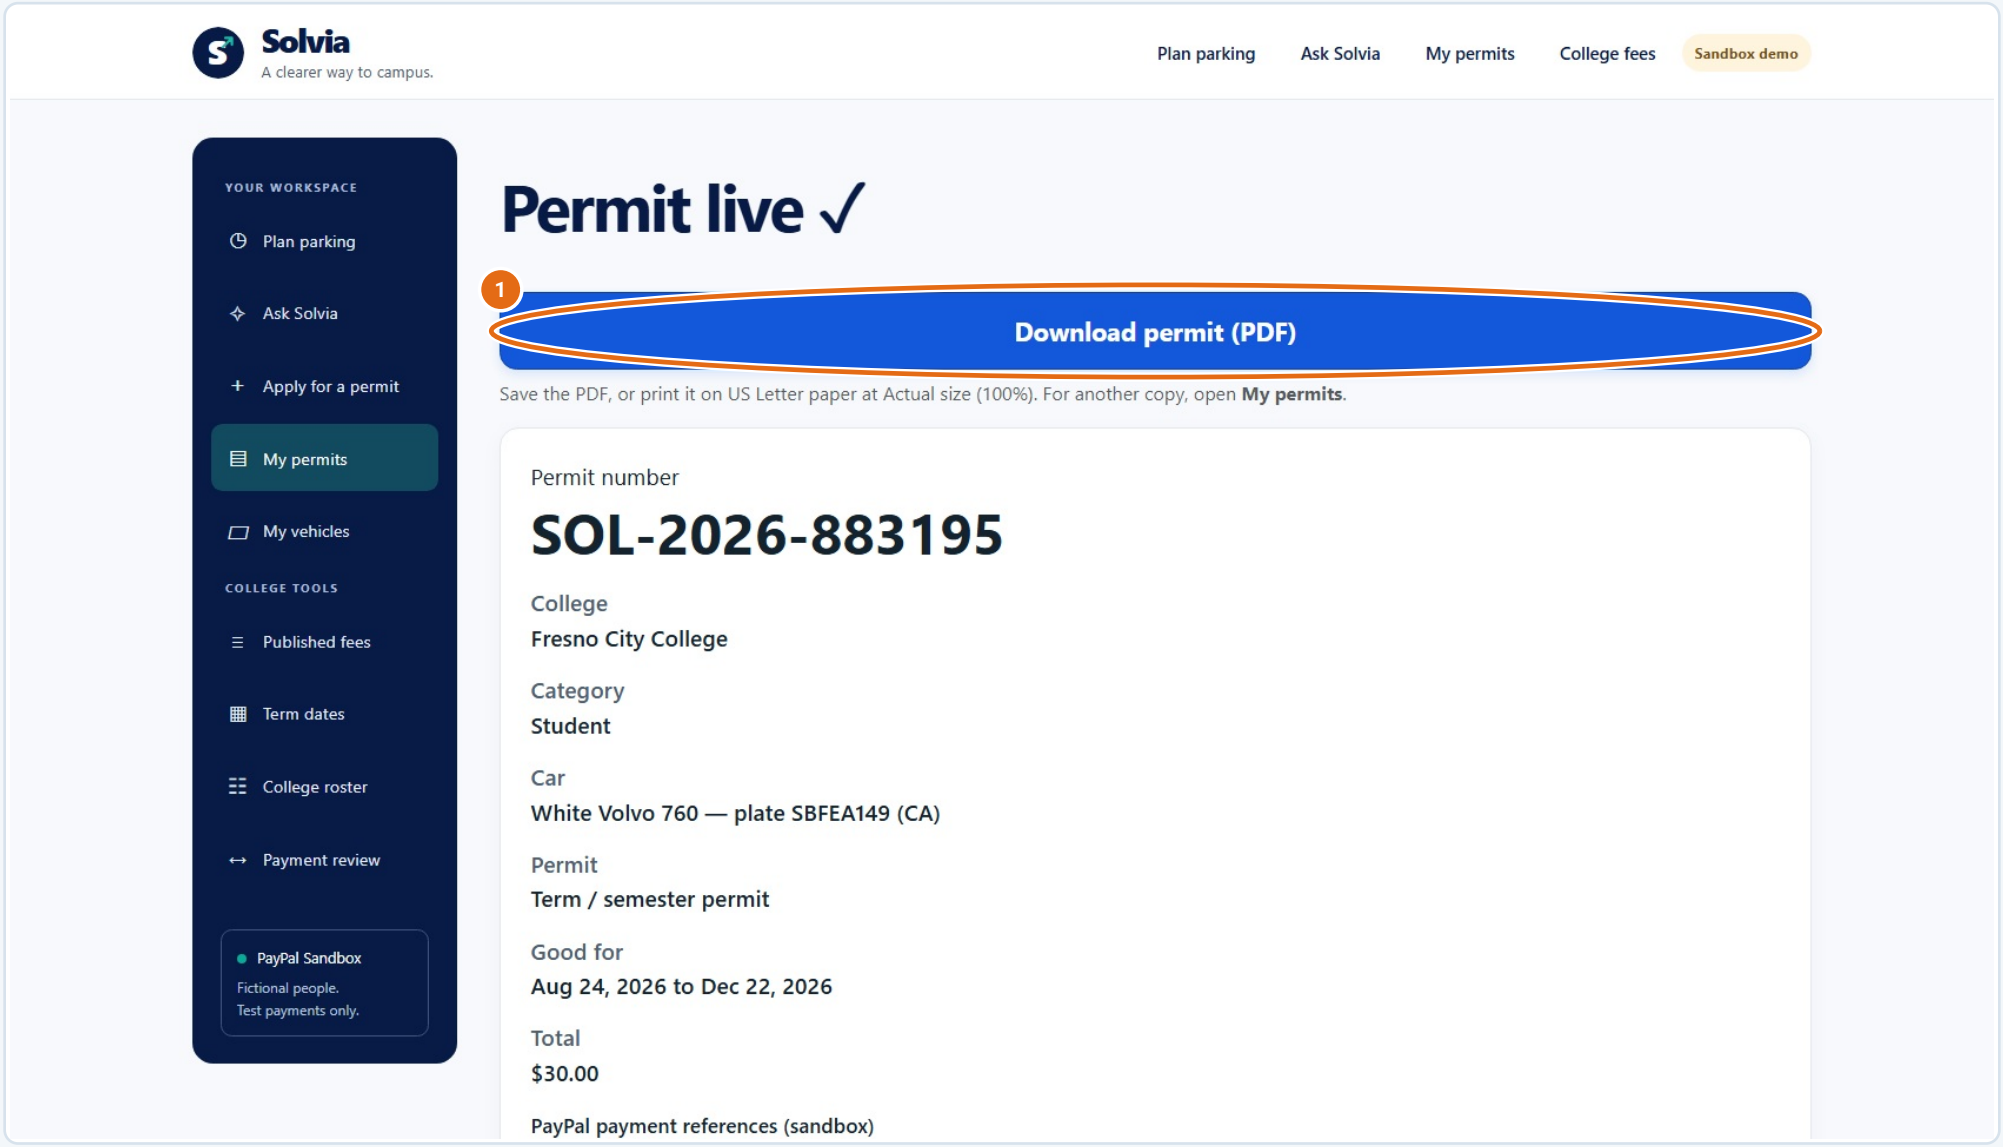

These controls come from the actual PayPal JavaScript SDK on the review page. PayPal, Pay Later and card availability depend on provider eligibility. No payment button is clicked in this guide.

New application: Sandbox payment help

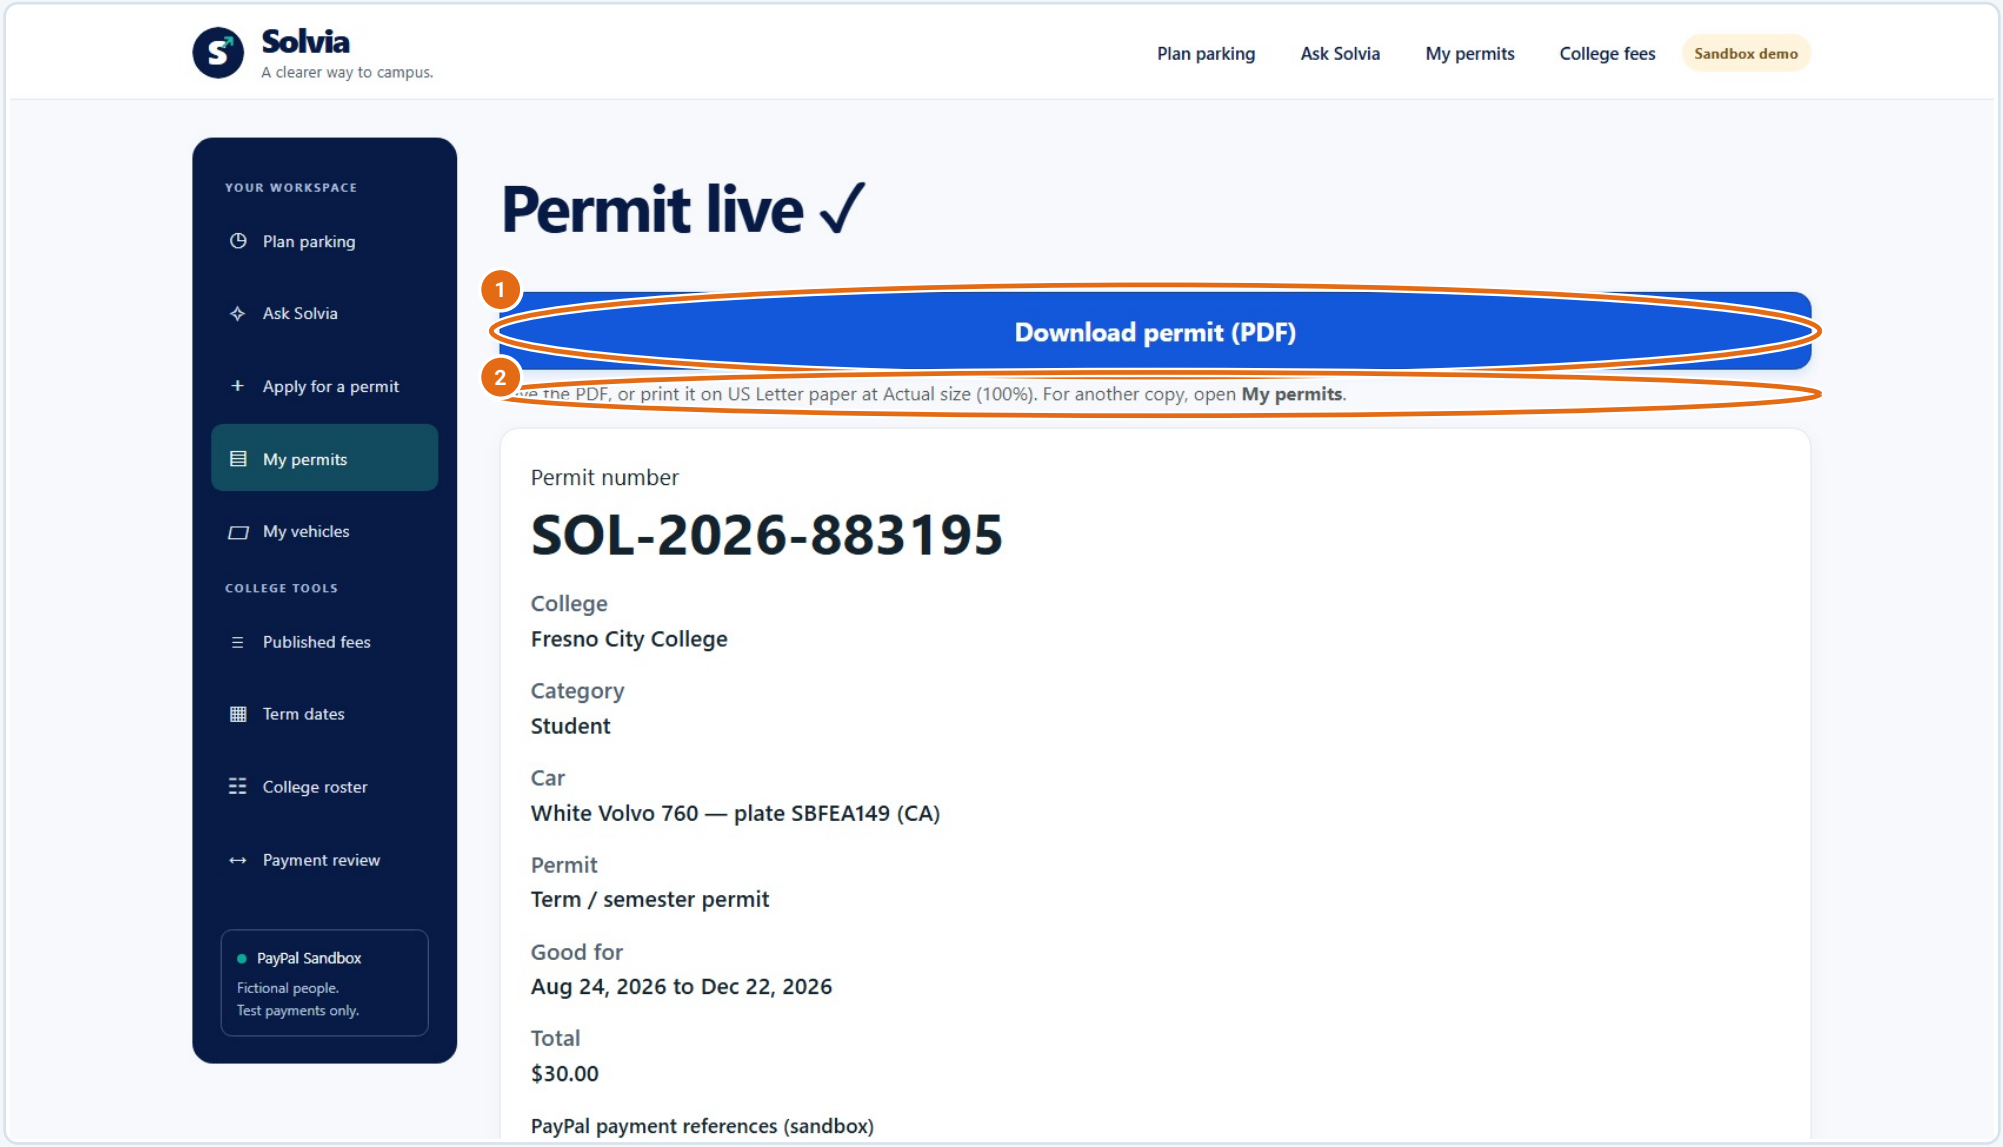

Use a separate Personal Sandbox buyer or official Sandbox card details. The merchant Business account cannot buy from itself. This capture uses no payment method, order, approval or charge.

Separate confirmed-payment example: Student

Different existing purchase: SOL-2026-883195, SBFEA149, $30.00 at Fresno City College. This is not payment for the new 246810 draft. Check payment and current validity separately.

Separate confirmed-payment example: PDF

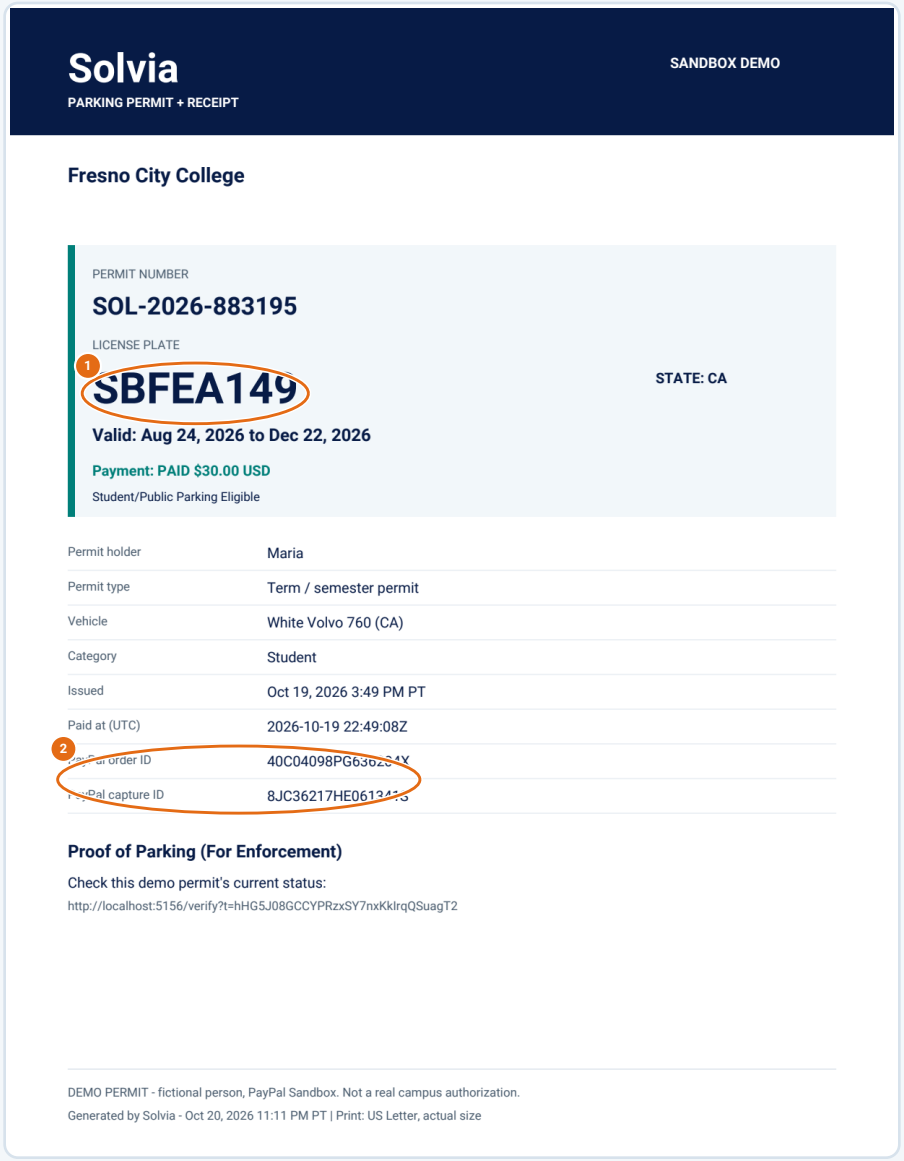

For SOL-2026-883195 only: save the issued PDF, check its plate and dates, and print US Letter at Actual size/100%. The fresh 246810 draft remains unpaid.

Proof of Parking (For Enforcement)

Check this demo permit's current status:

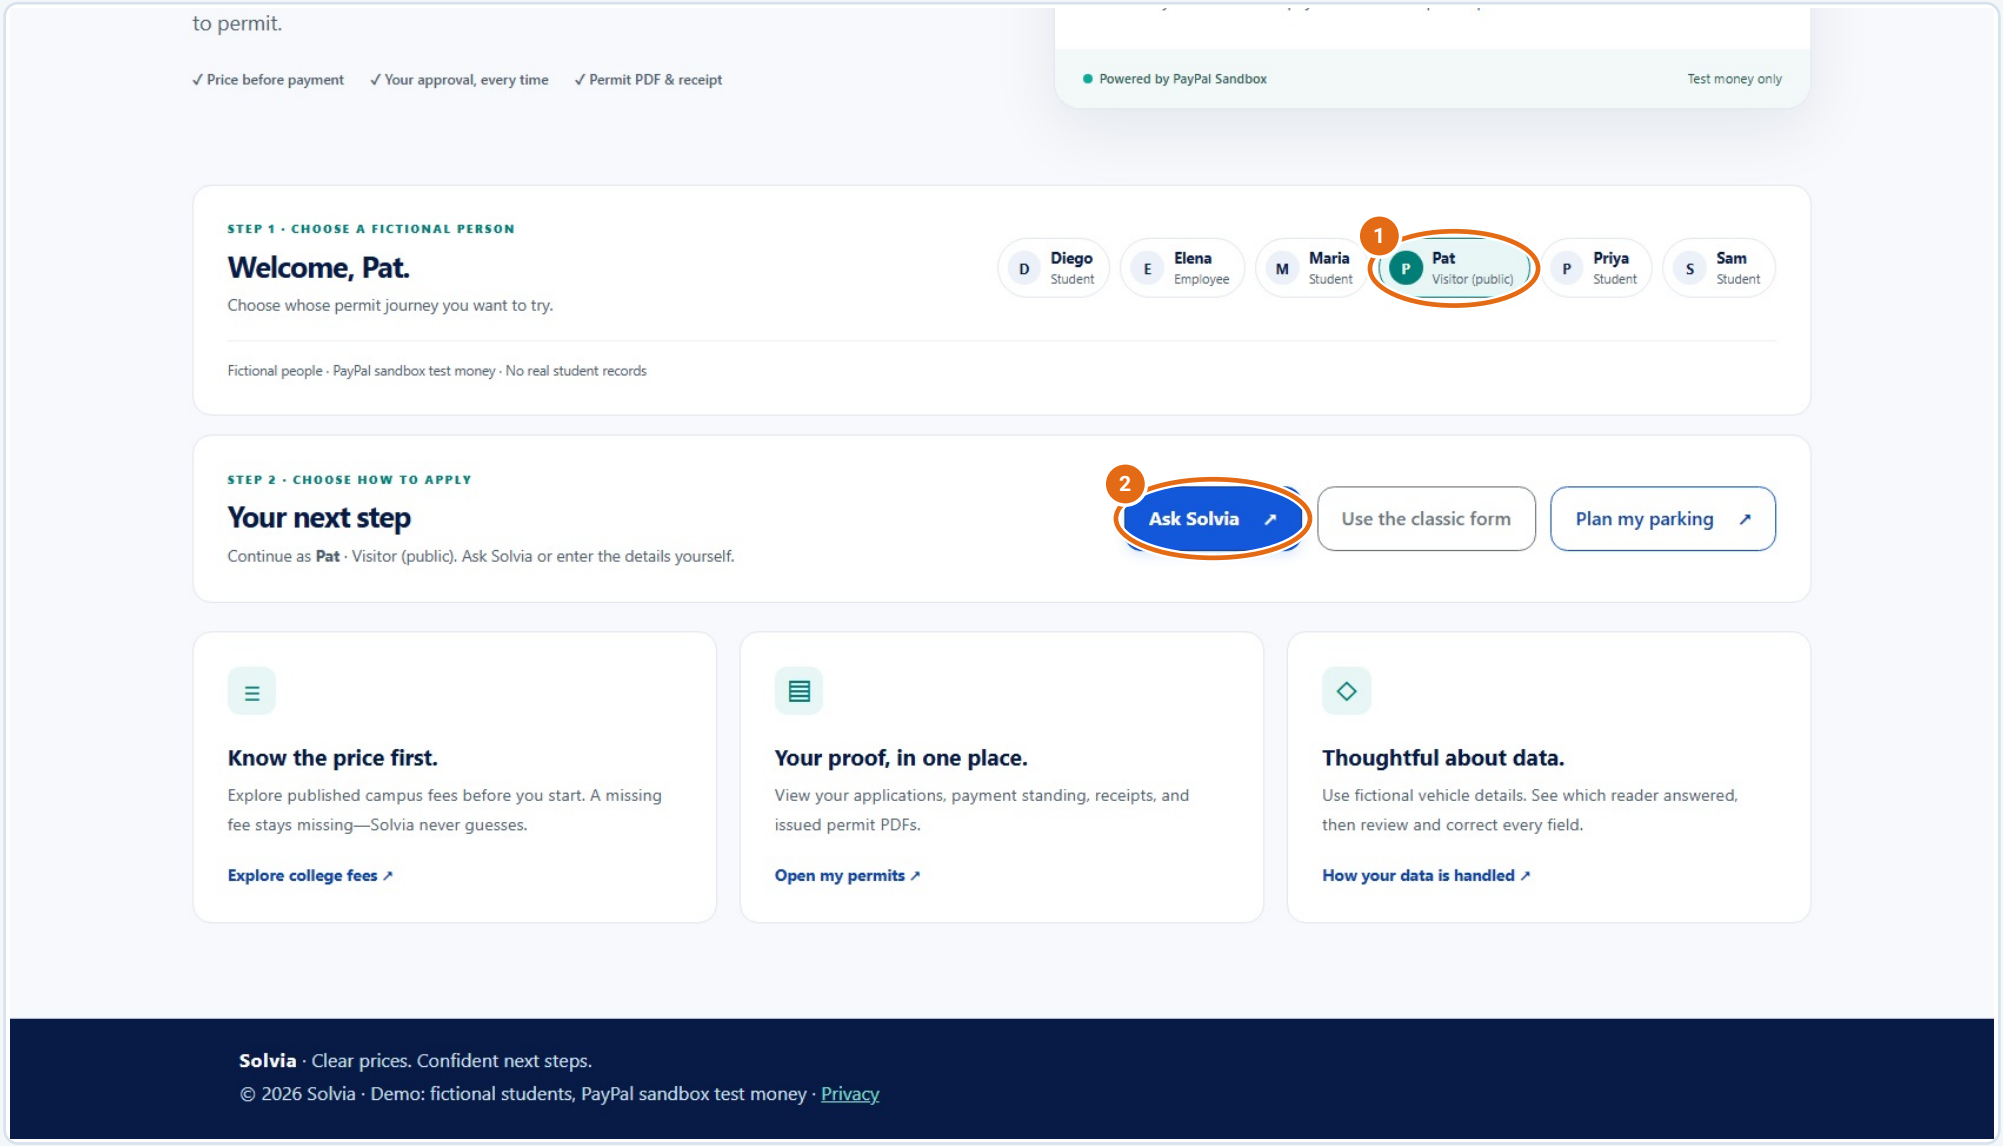

http://localhost:5156/verify?t=hHG5J08GCCYPRzxSY7nxKkIrqQSuagT2

DEMO PERMIT - fictional person, PayPal Sandbox. Not a real campus authorization.

Generated by Solvia - Oct 20, 2026 11:11 PM PT | Print: US Letter, actual size

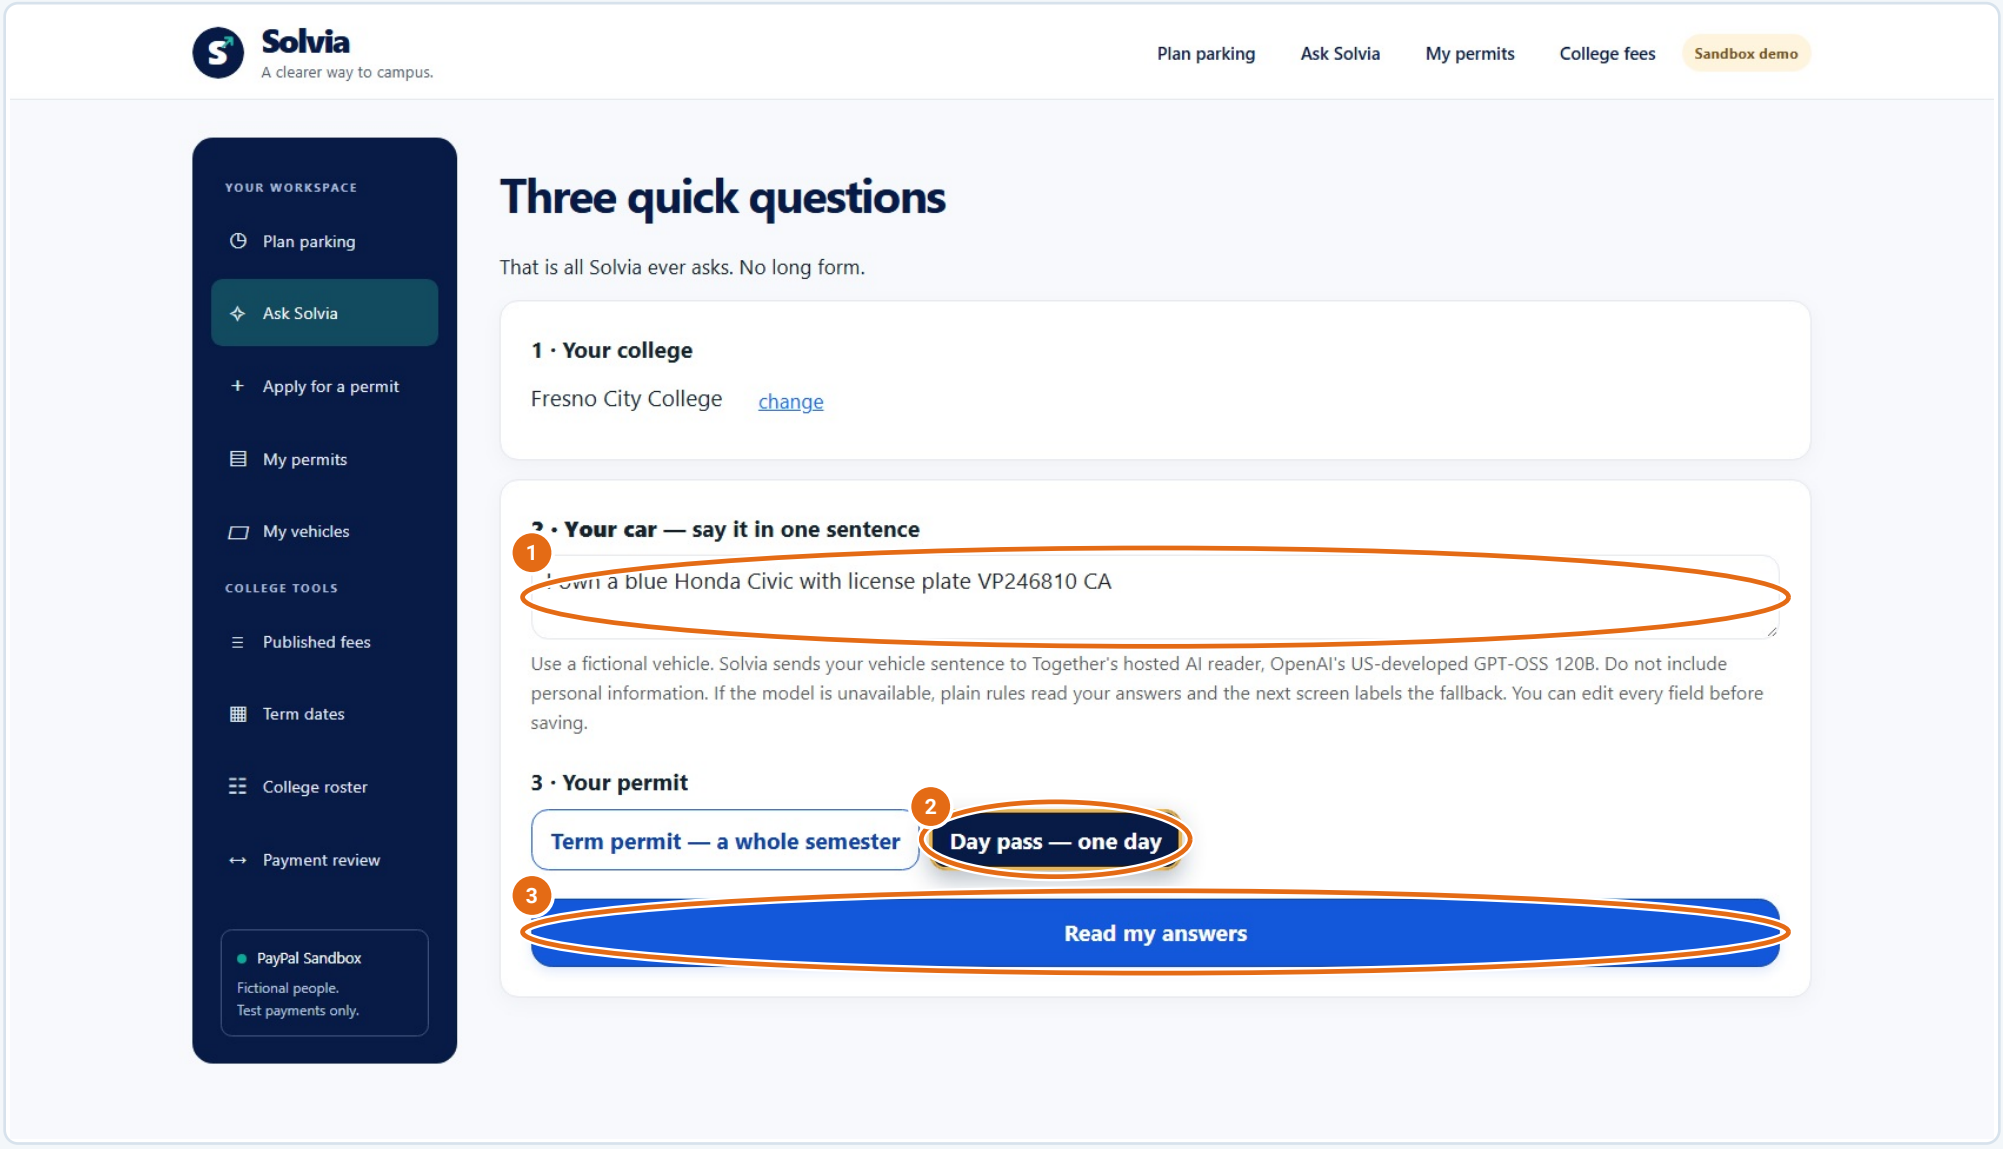

Actual downloaded PDF for separate historical purchase SOL-2026-883195. Check its own plate SBFEA149, validity and payment references. Print US Letter at Actual size/100%. It is not the fresh unpaid 246810 draft.

Visitor: choose Pat, then the journey

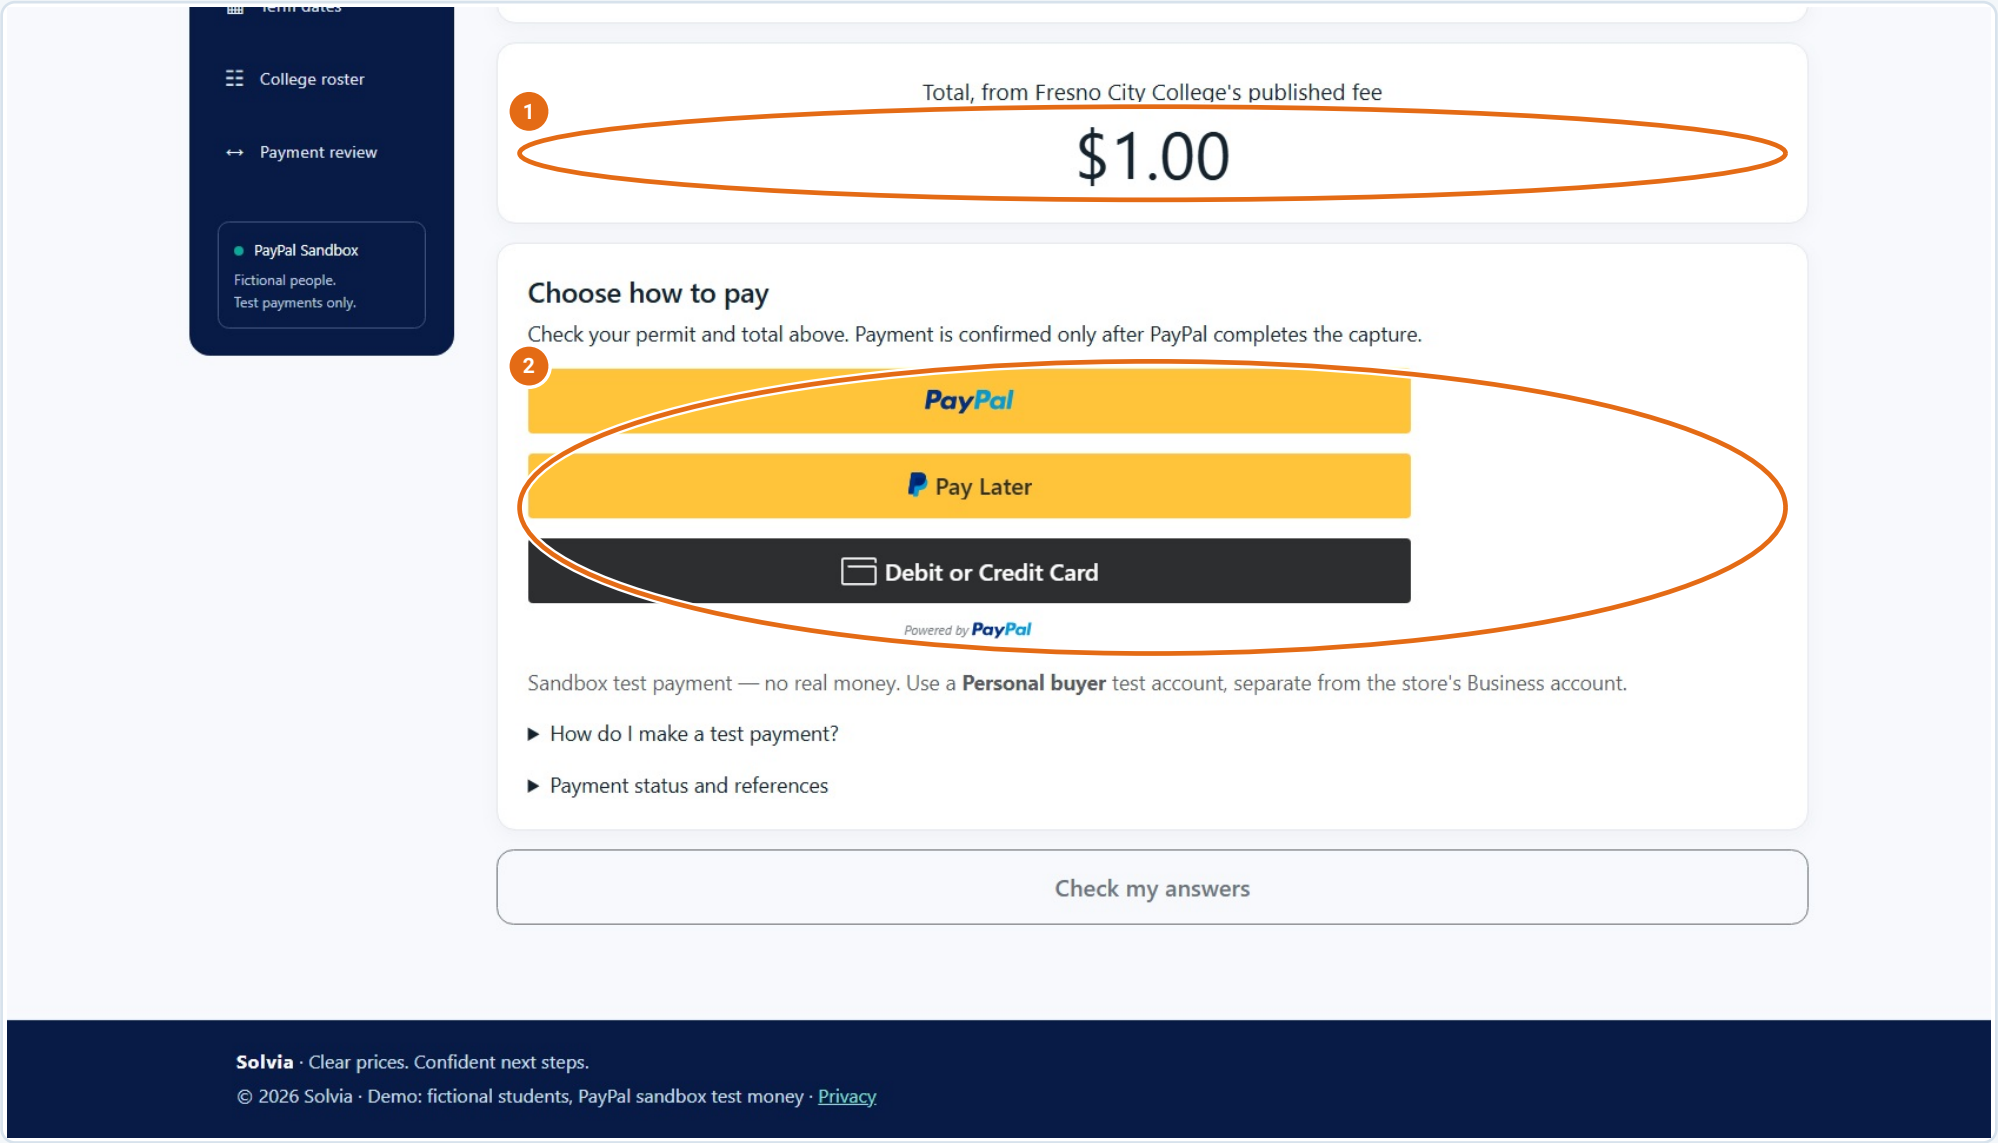

Step 1: Pat is the fictional Visitor/Public profile. Step 2: Ask Solvia. The demo permits day or term choices; production eligibility requires campus rules.

New application: Visitor day pass

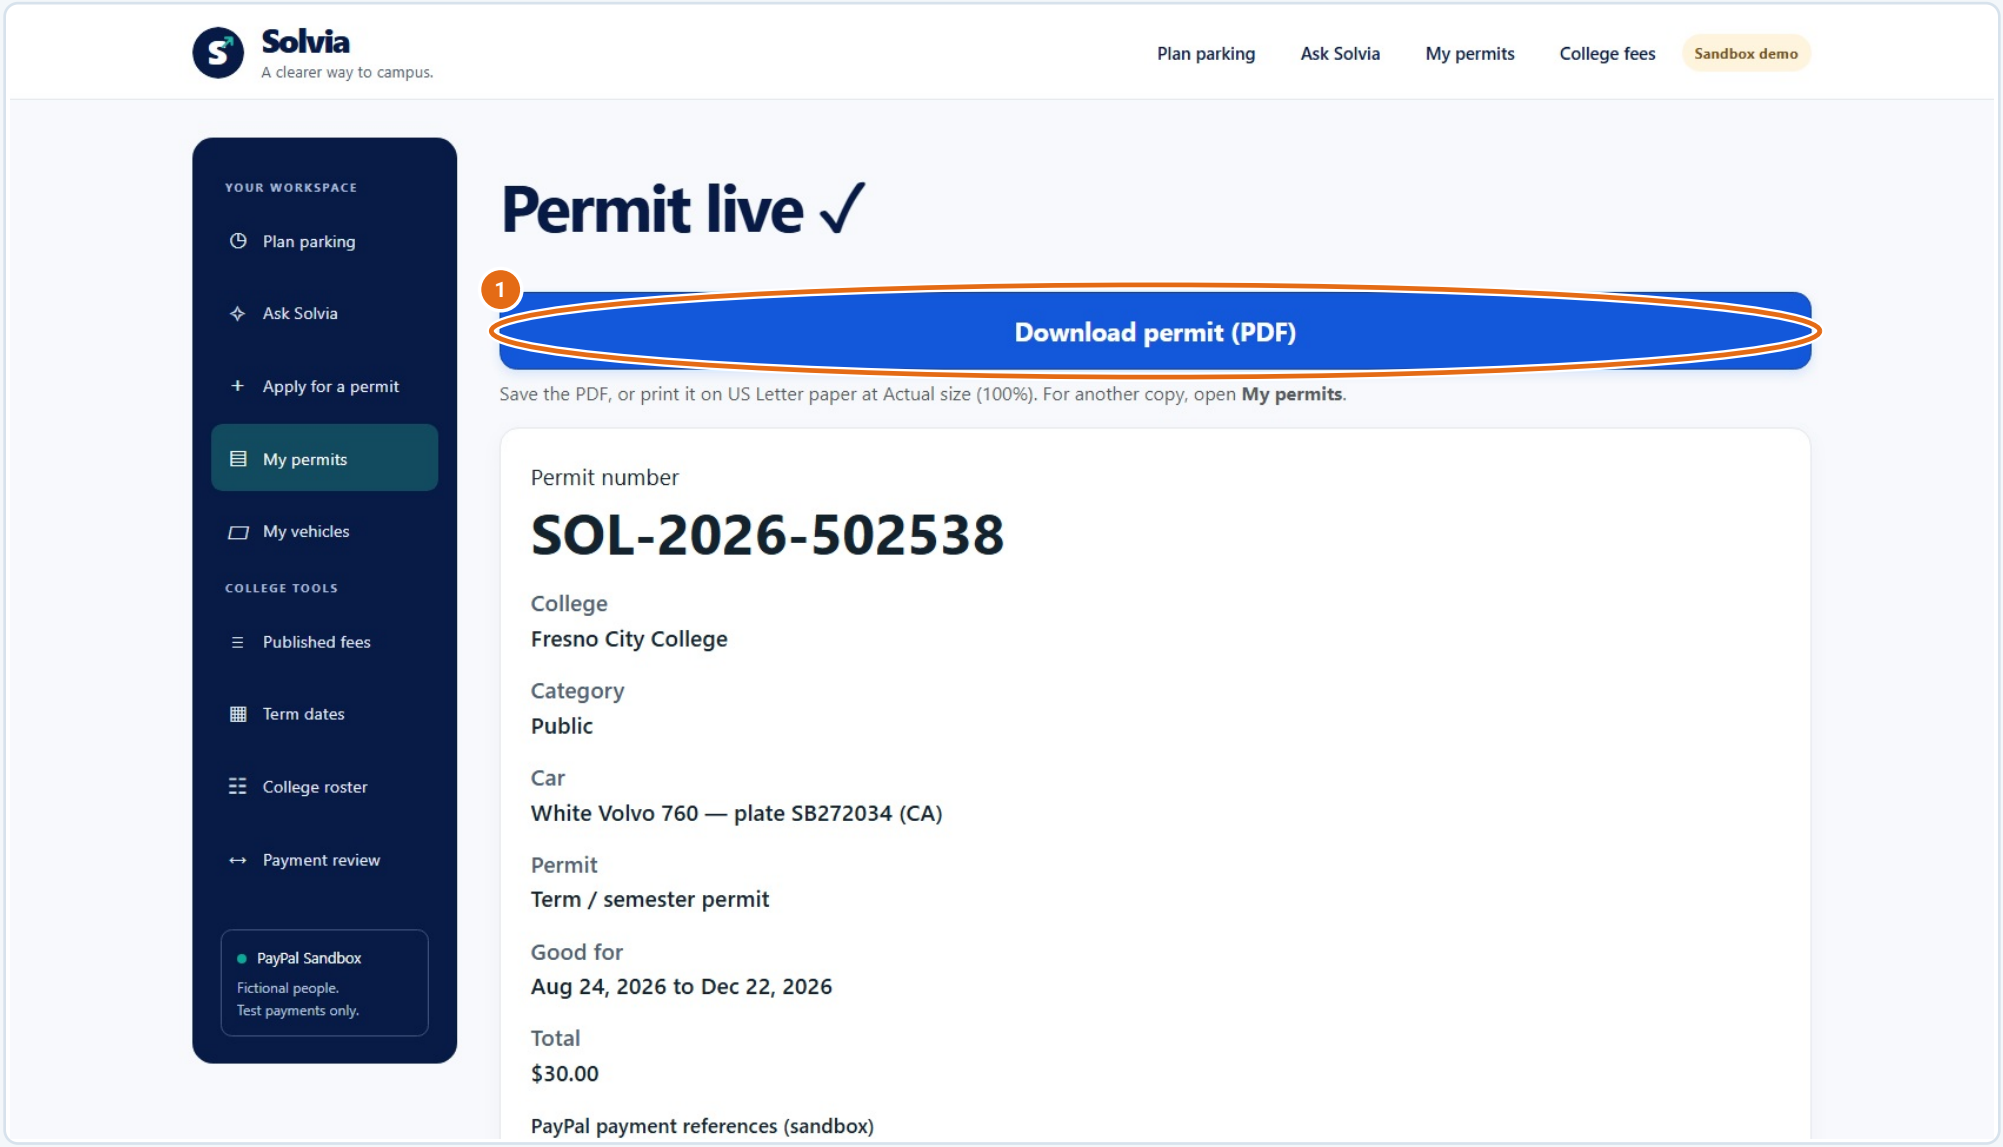

New fictional visitor draft: blue Honda Civic, VP246810, CA, Day pass. Semester options are hidden for daily parking.

New application: Visitor exact total

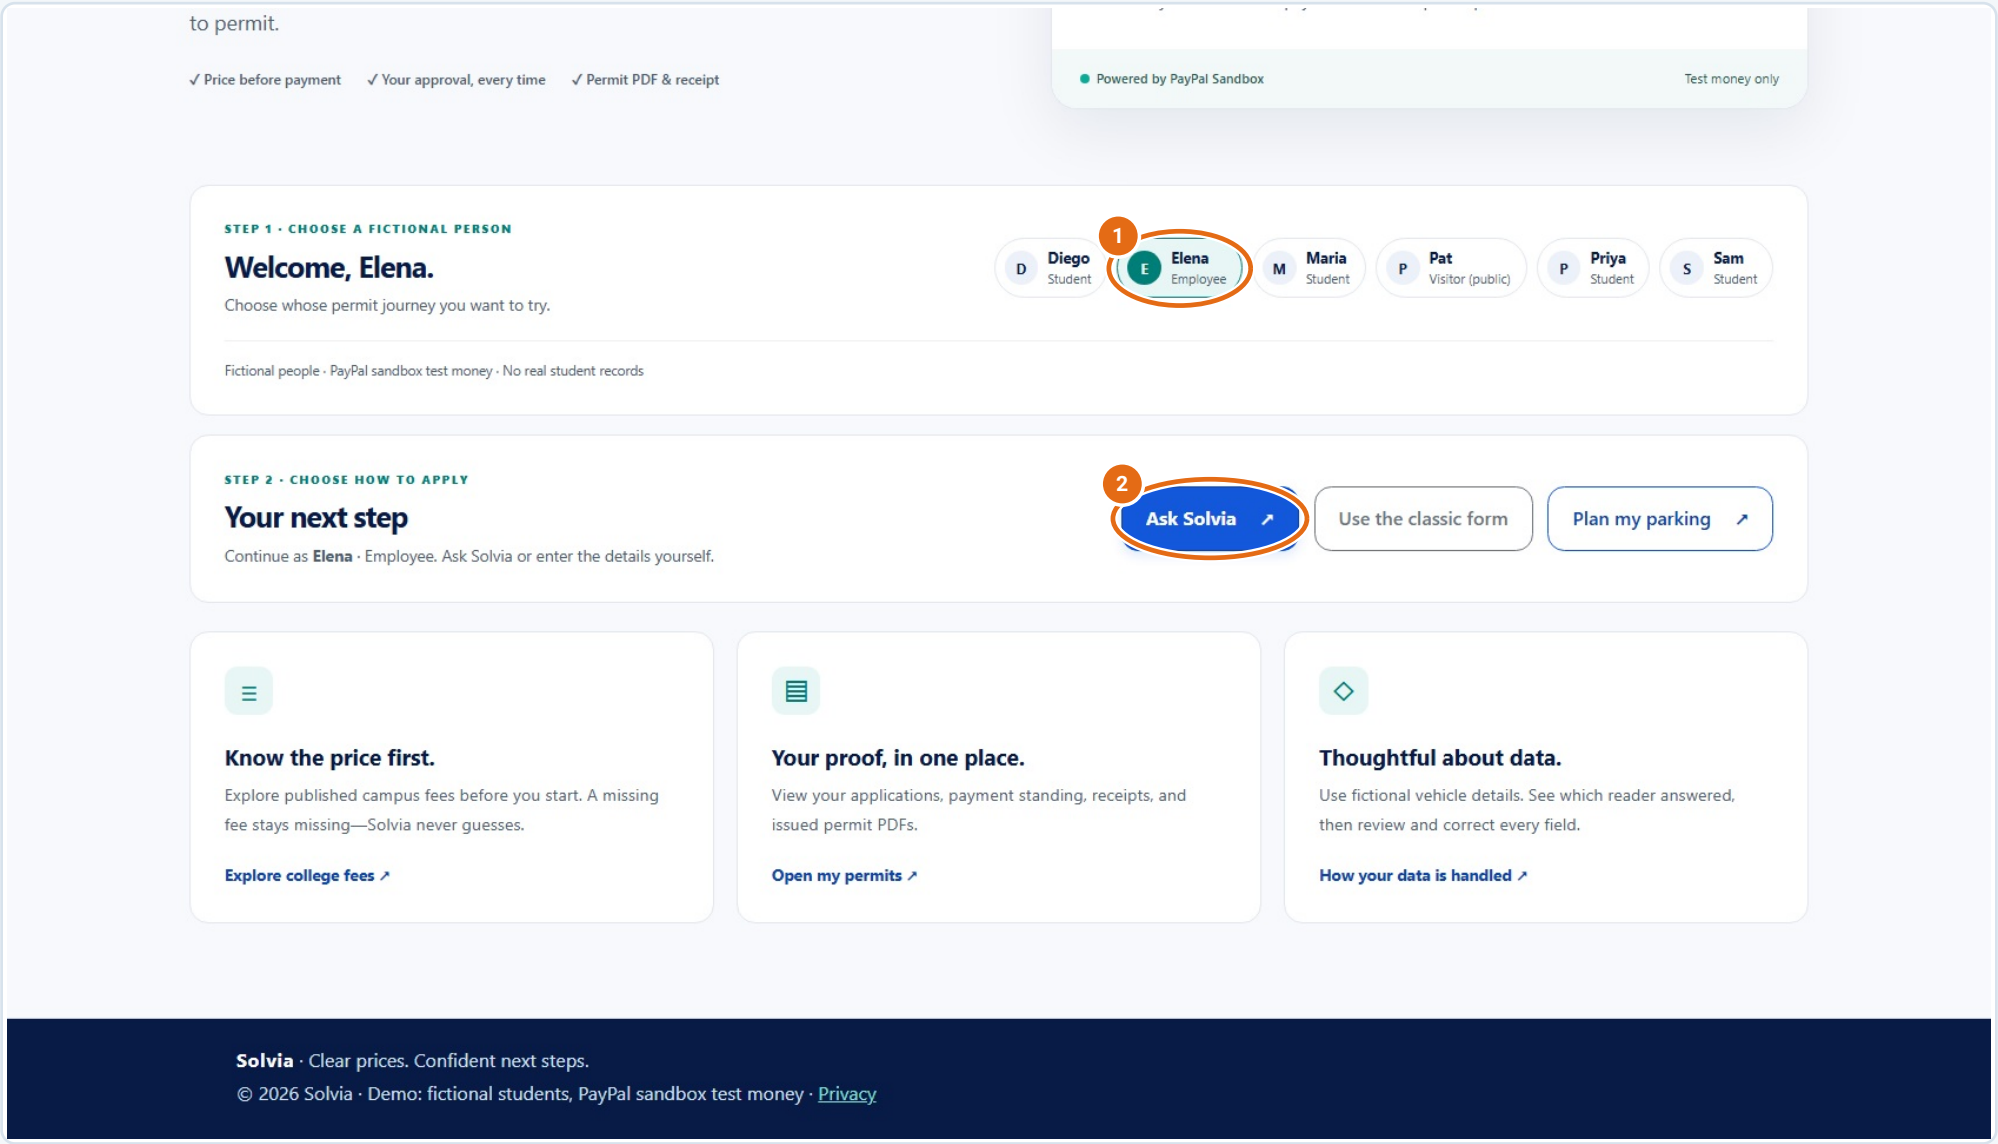

Fresh unpaid Fresno City College day pass: VP246810, $1.00. The actual official SDK choices are directly below the review. They are not clicked.

Separate confirmed-payment example: Visitor

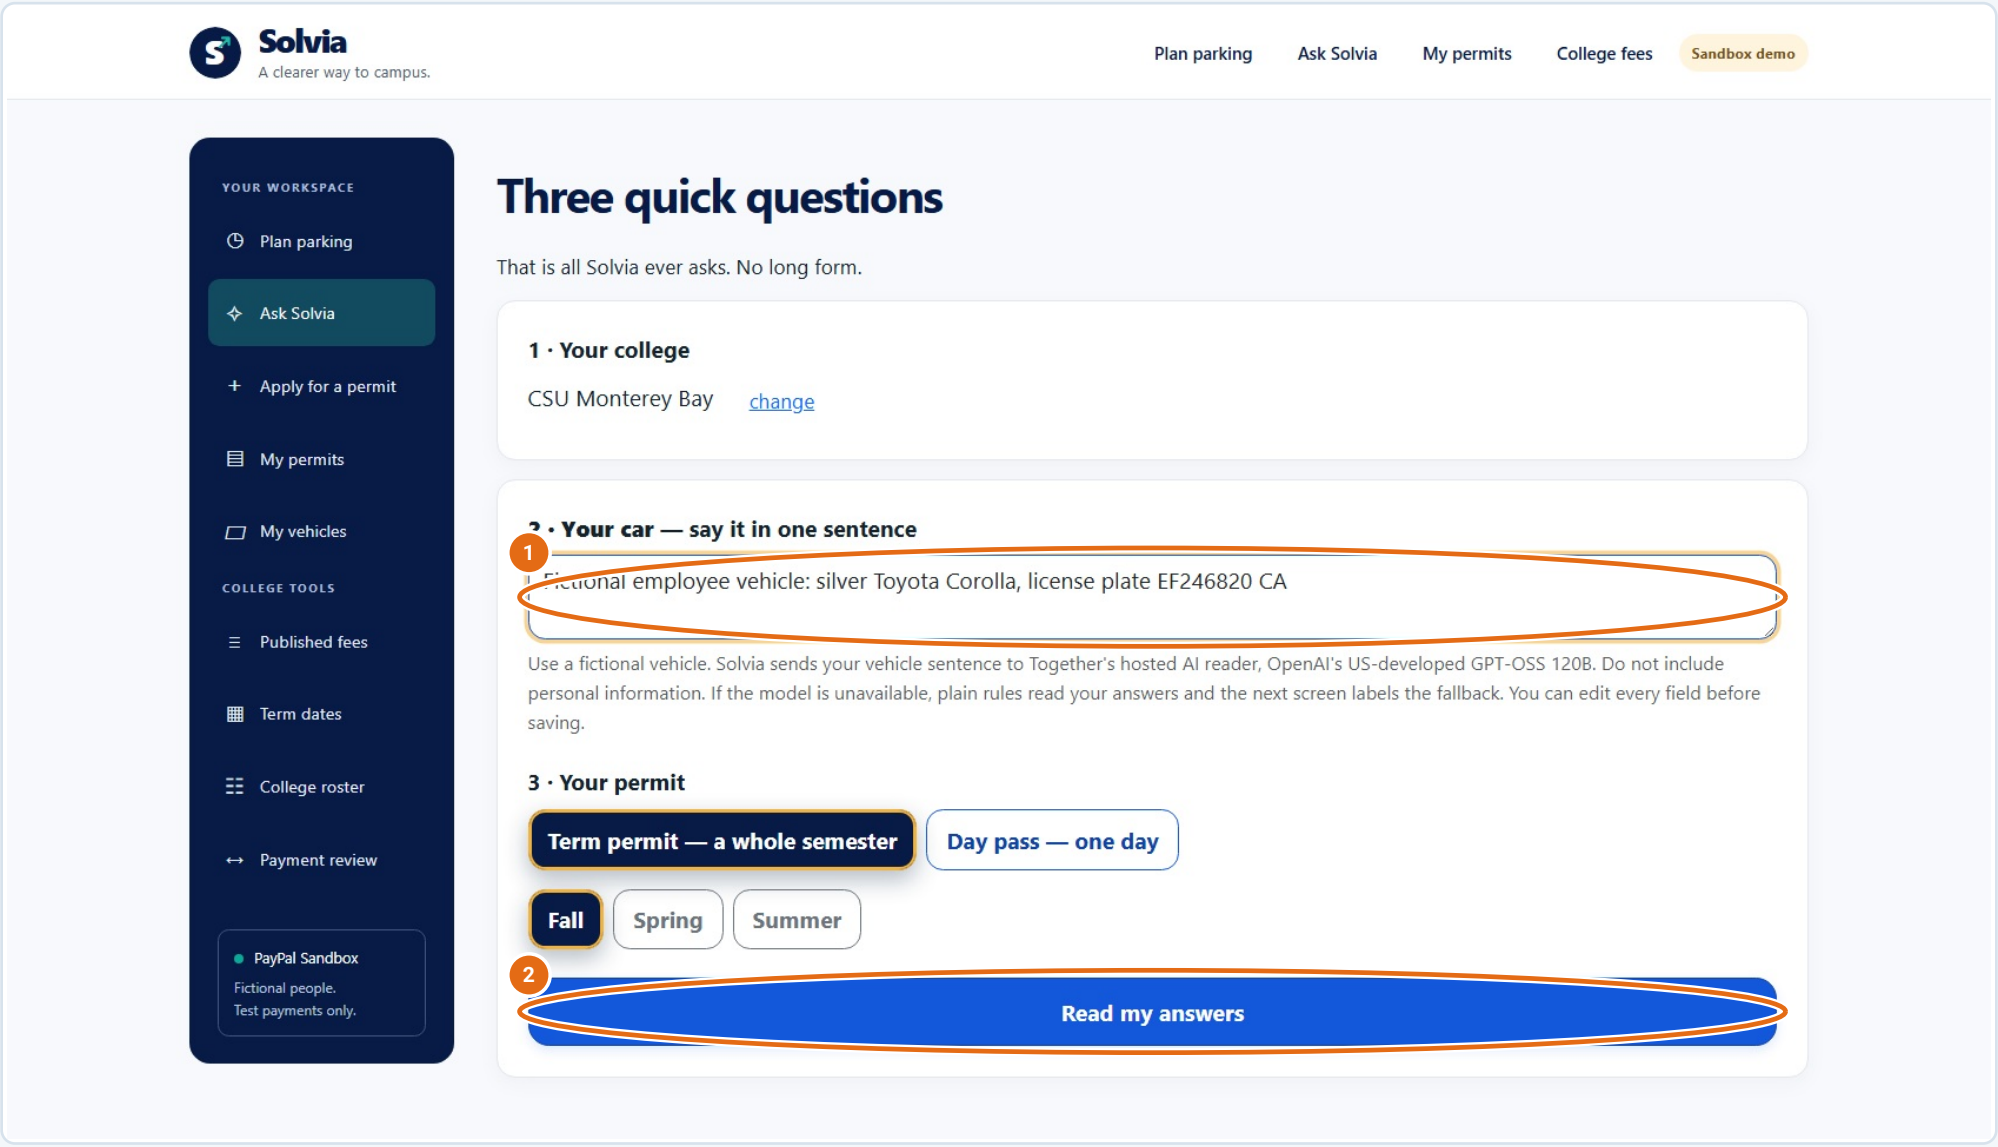

Different existing purchase: SOL-2026-502538, SB272034, $30.00. It is not the fresh VP246810 daily draft. Download only the issued historical proof.

Employee: choose Elena, then the journey

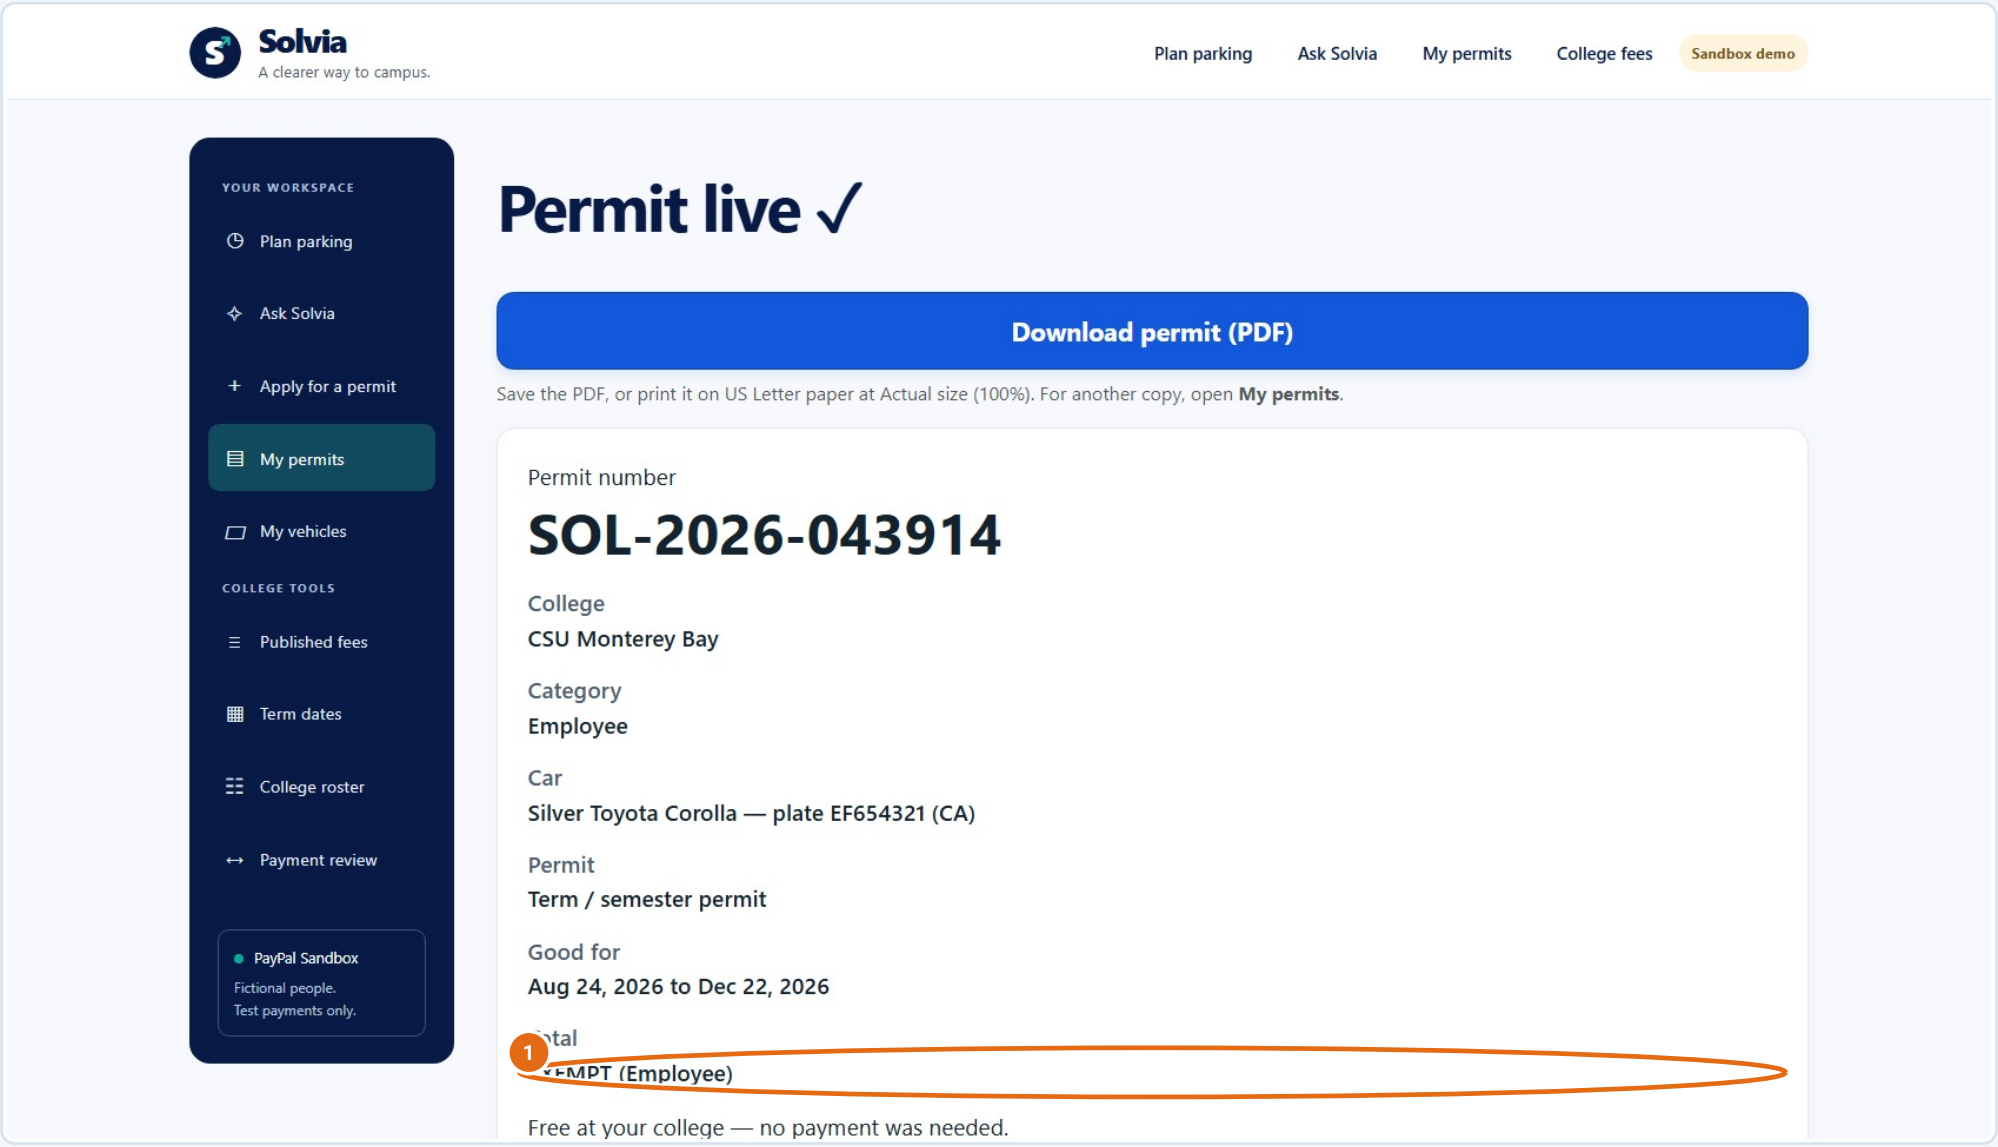

Step 1: Elena is the fictional Employee. Step 2: Ask Solvia. The exemption is a demonstration policy, not a statewide or campus-approved entitlement.

New application: Employee vehicle example

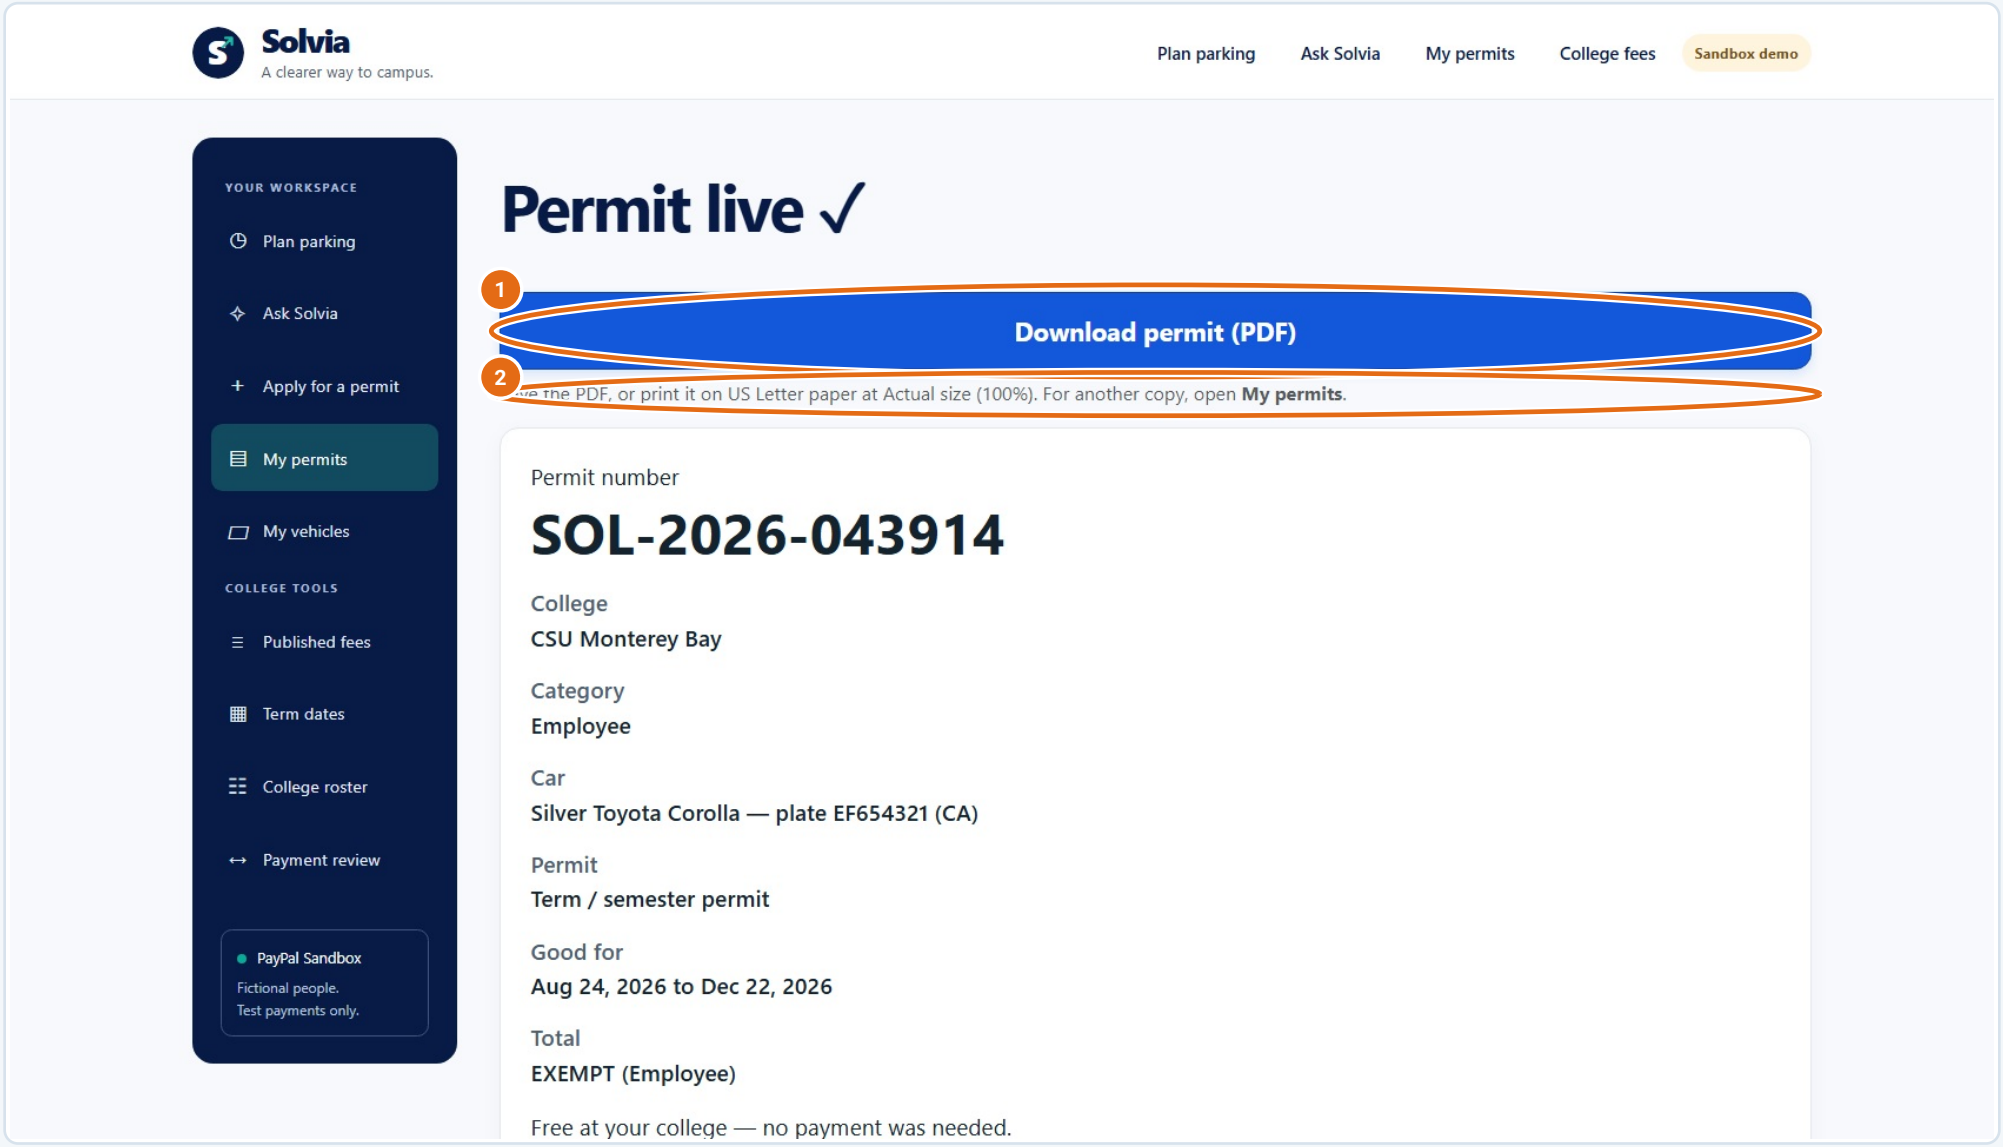

This is a fresh unsubmitted fictional example. Read my answers would draft editable fields. The following receipt is an explicitly separate existing exempt permit; no new employee permit or inference is created here.

Separate issued-exemption example: Employee

Existing fictional permit SOL-2026-043914, EF654321: EXEMPT (Employee), with no PayPal charge. Review current validity separately. This is not the unsubmitted EF246820 example.

Separate issued-exemption example: PDF

For existing SOL-2026-043914, use Download permit (PDF), or its own My permits row later. Print US Letter at Actual size/100%. No PayPal payment is needed under this demo policy.
