SOLVIA

Your permit, step by step.

A screenshot guide for students, visitors and employees

Choose your journey

1 Students

Maria - Student

Choose a day pass or a term permit. Review the campus's published fee; some campuses have a free option.

2 Visitors / public

Pat - Public

Choose a day pass or a term permit. When the total is above $0, complete the PayPal Sandbox payment.

3 Employees

Elena - Employee

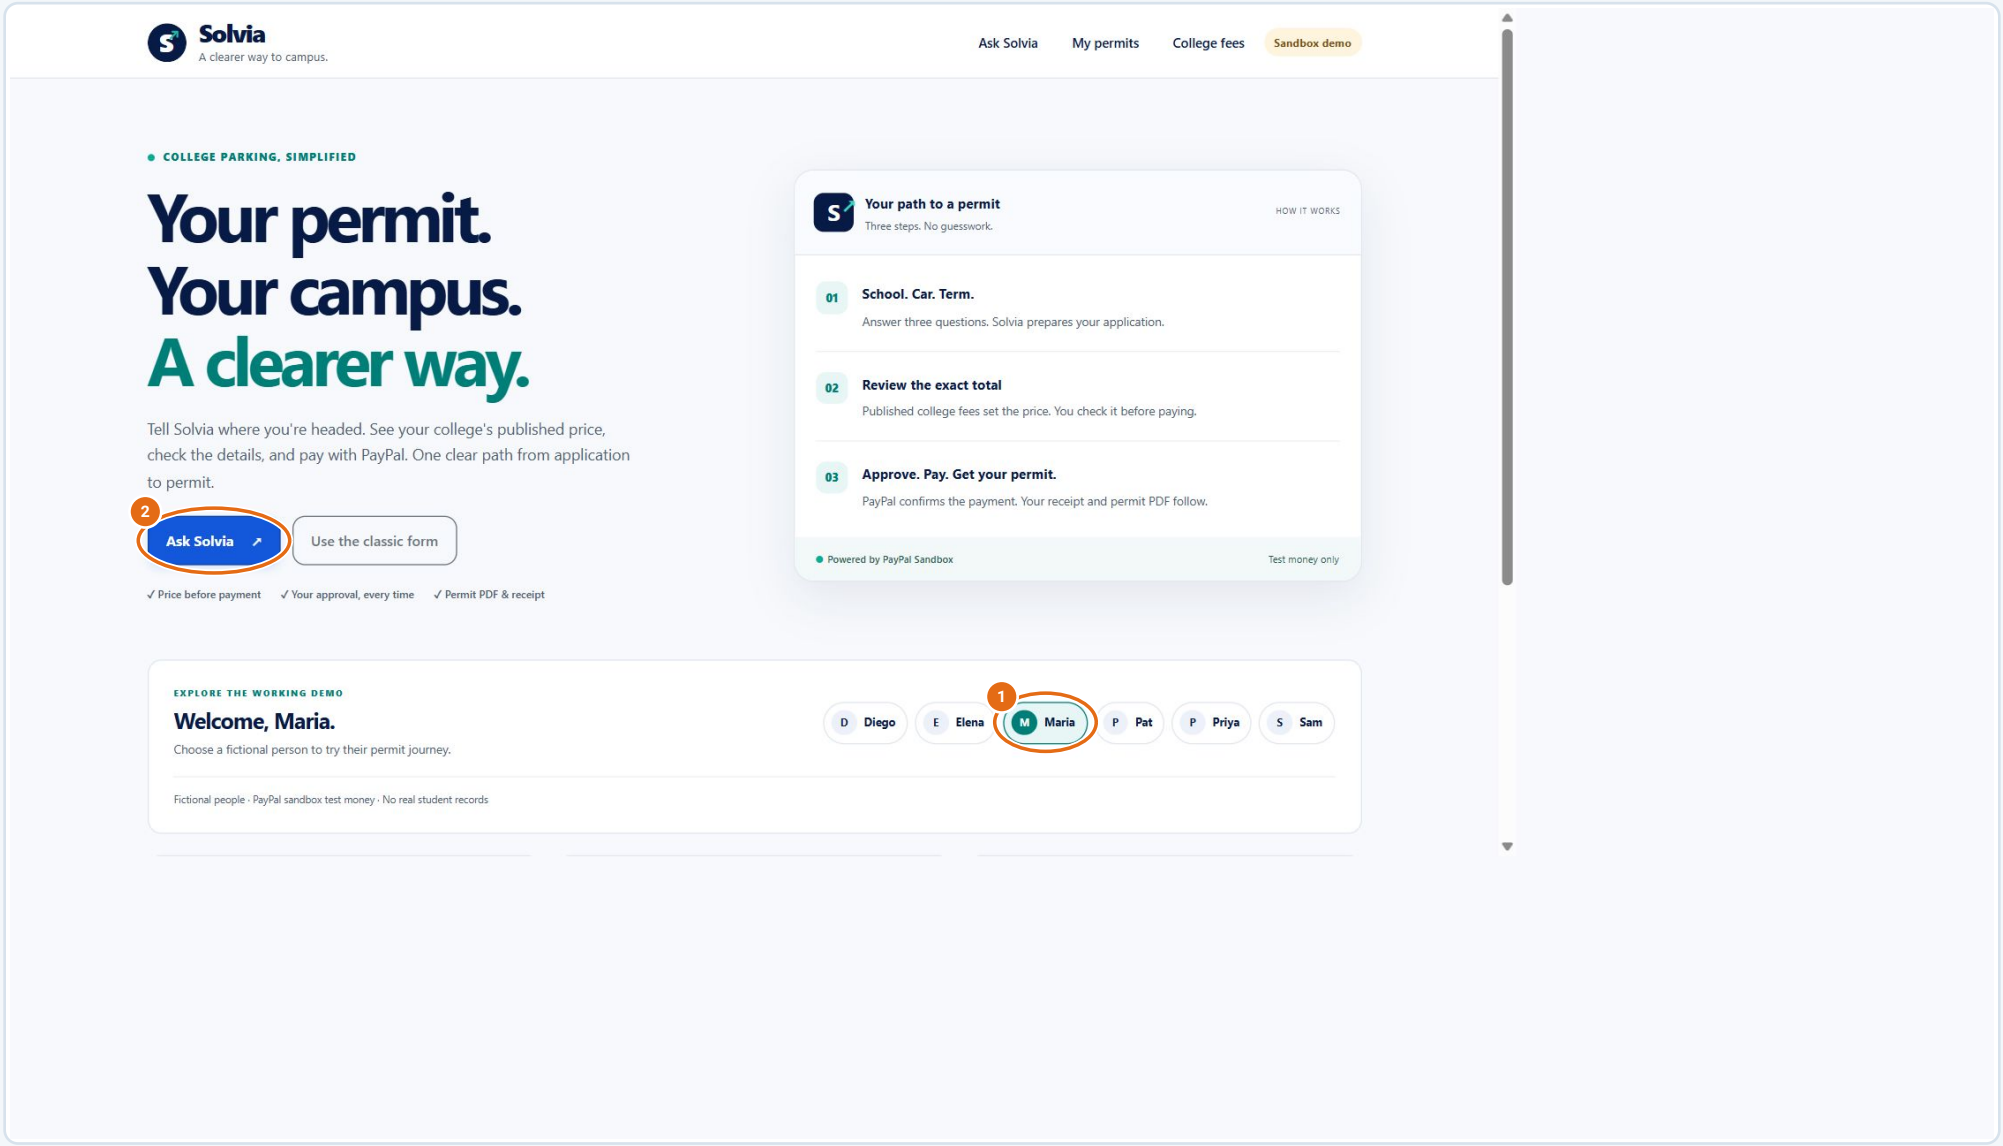

The eligible employee demo profile is exempt. Check the $0 total, then issue the permit without a PayPal payment.

Before you start

Check the details	The AI reader only pre-fills a draft. Correct the license plate, state, vehicle and dates before continuing.
Wait for confirmation	An unpaid permit has no printable permit PDF. If a payment is unfinished, use Pay now / Finish paying, then wait for confirmation.
Download again or print	Open My permits, then Permit (PDF). Save the PDF or use your PDF viewer's Print button / Ctrl+P. Check plate and validity dates first.

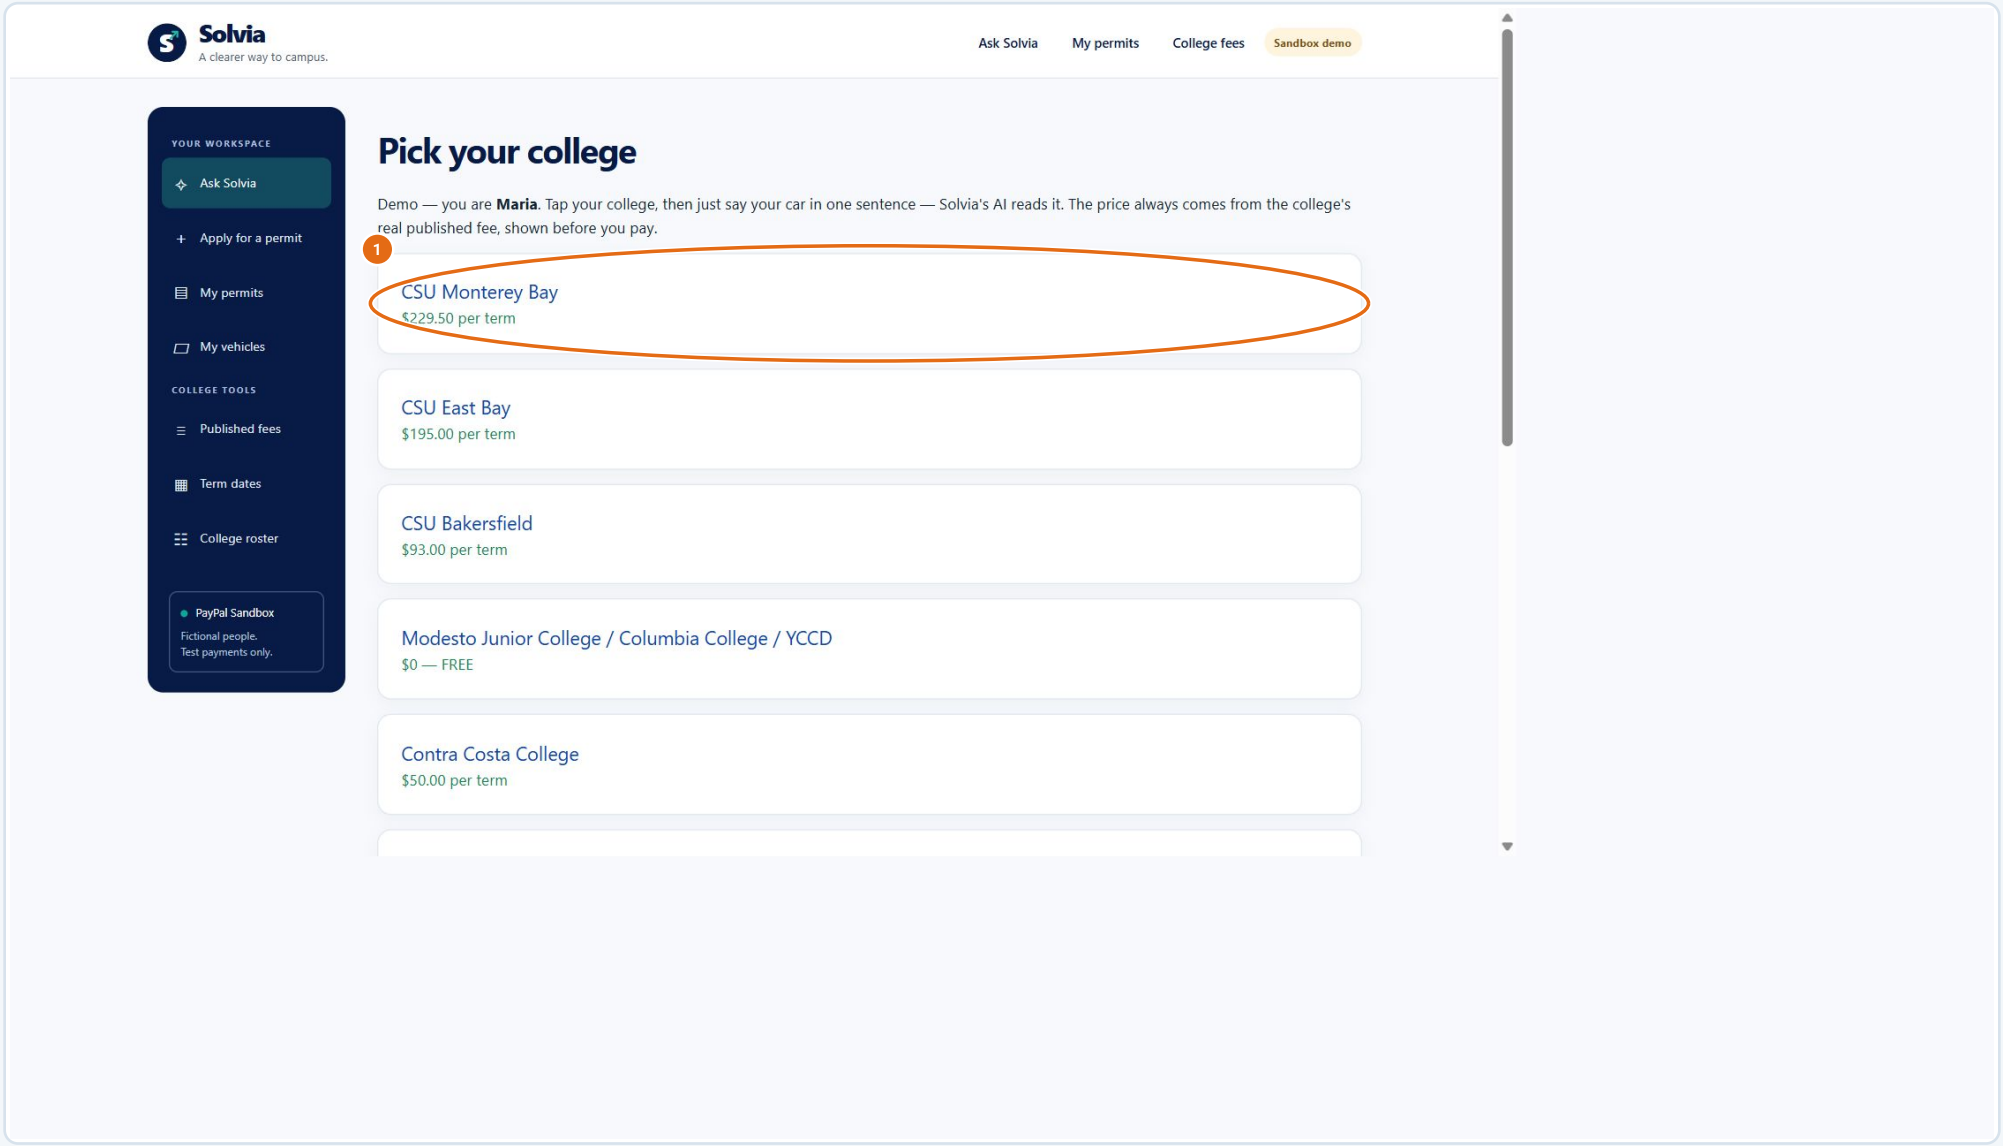

Fictional profiles and PayPal Sandbox test funds, not real campus authorization. The three vehicle-input screens show the current US-developed GPT-OSS reader (October 20); the remaining workflow and payment screens retain earlier verified demo records. Refreshing the input screens made no AI or payment requests.

Student: choose Maria, then Ask Solvia

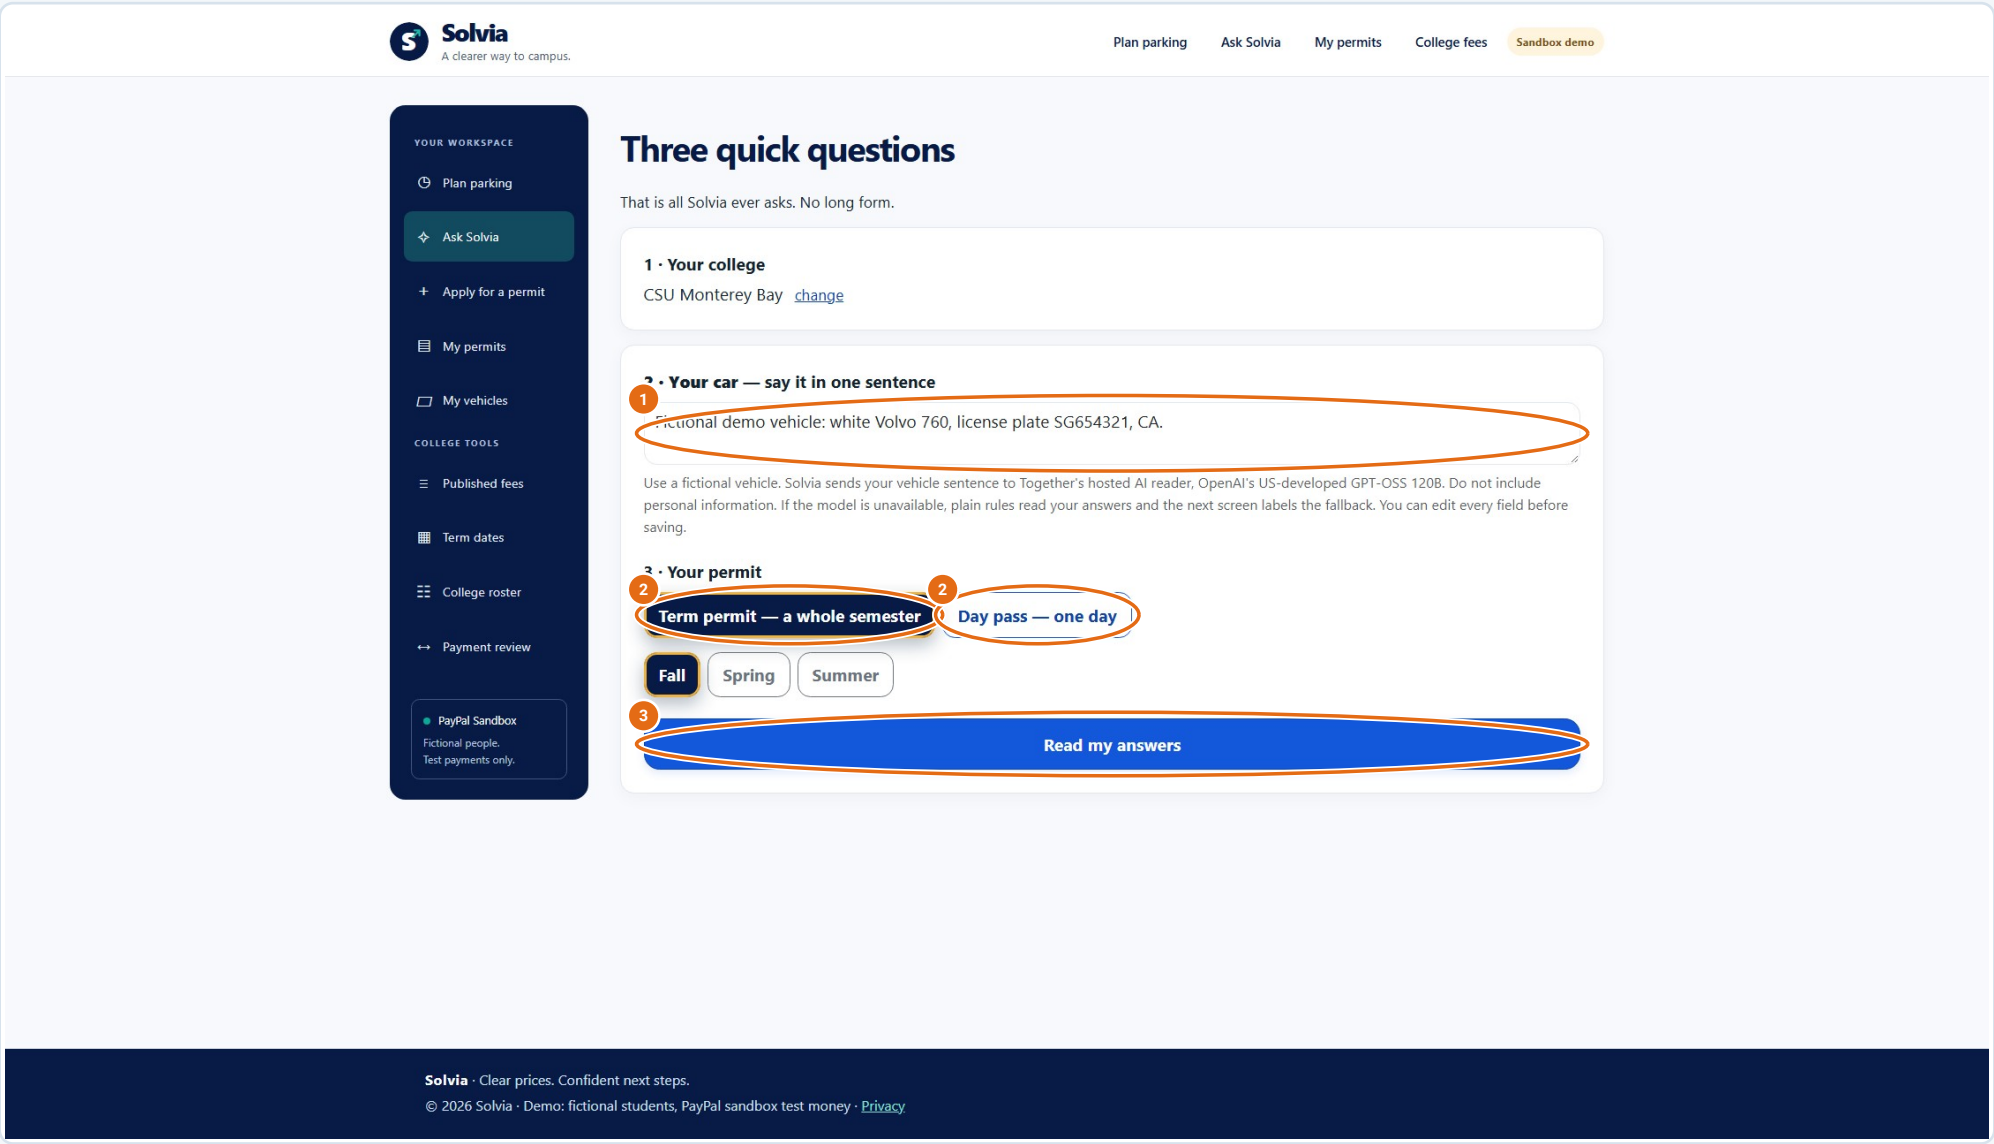

In the demo, choose Maria for the Student journey. Select Ask Solvia. The visitor uses Pat; employees use Elena. These are fictional profiles, not a production sign-in system.

Choose the college

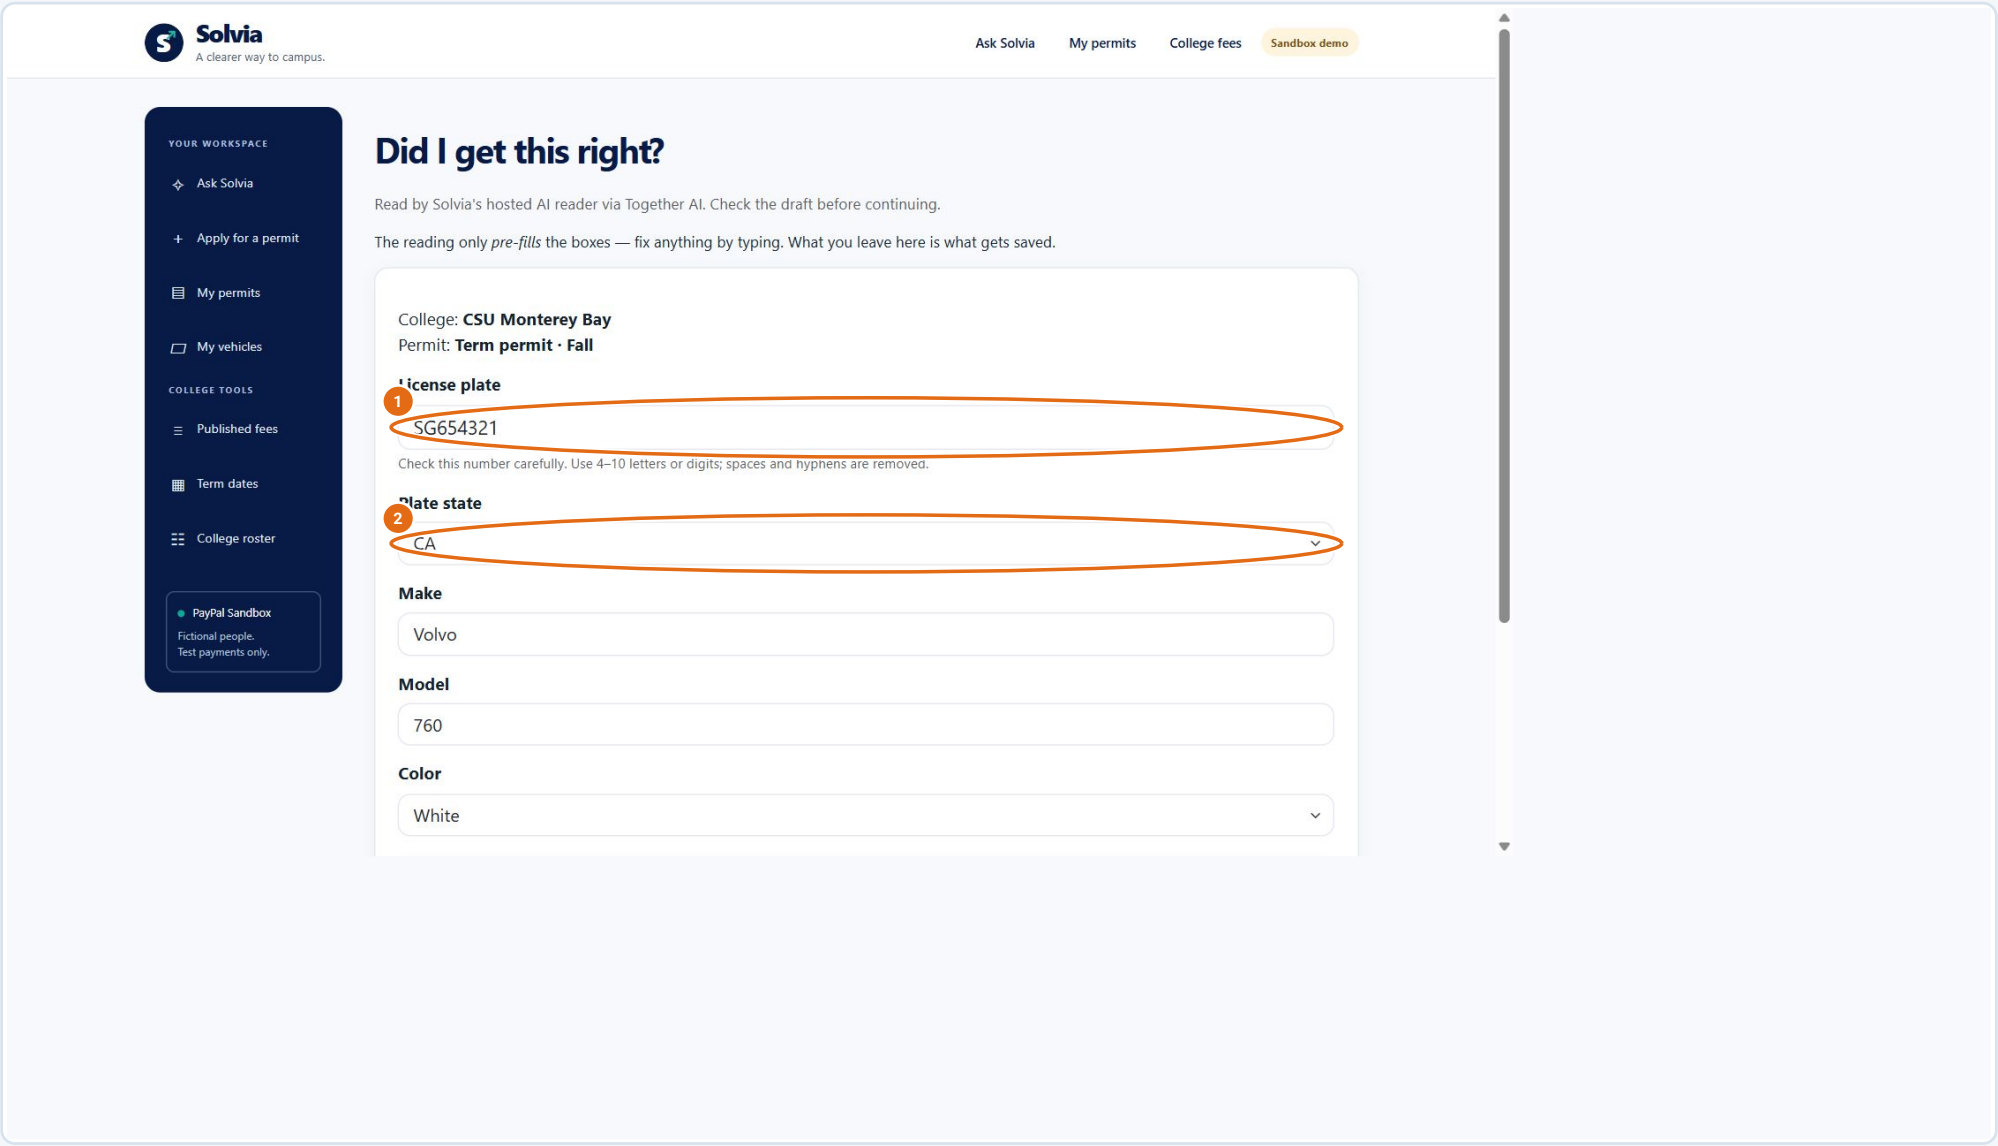

Select the campus before describing the vehicle. This walkthrough uses CSU Monterey Bay: the catalog currently shows $229.50 for a term permit. Day-pass prices are checked on the total screen.

Describe the vehicle and choose day or term

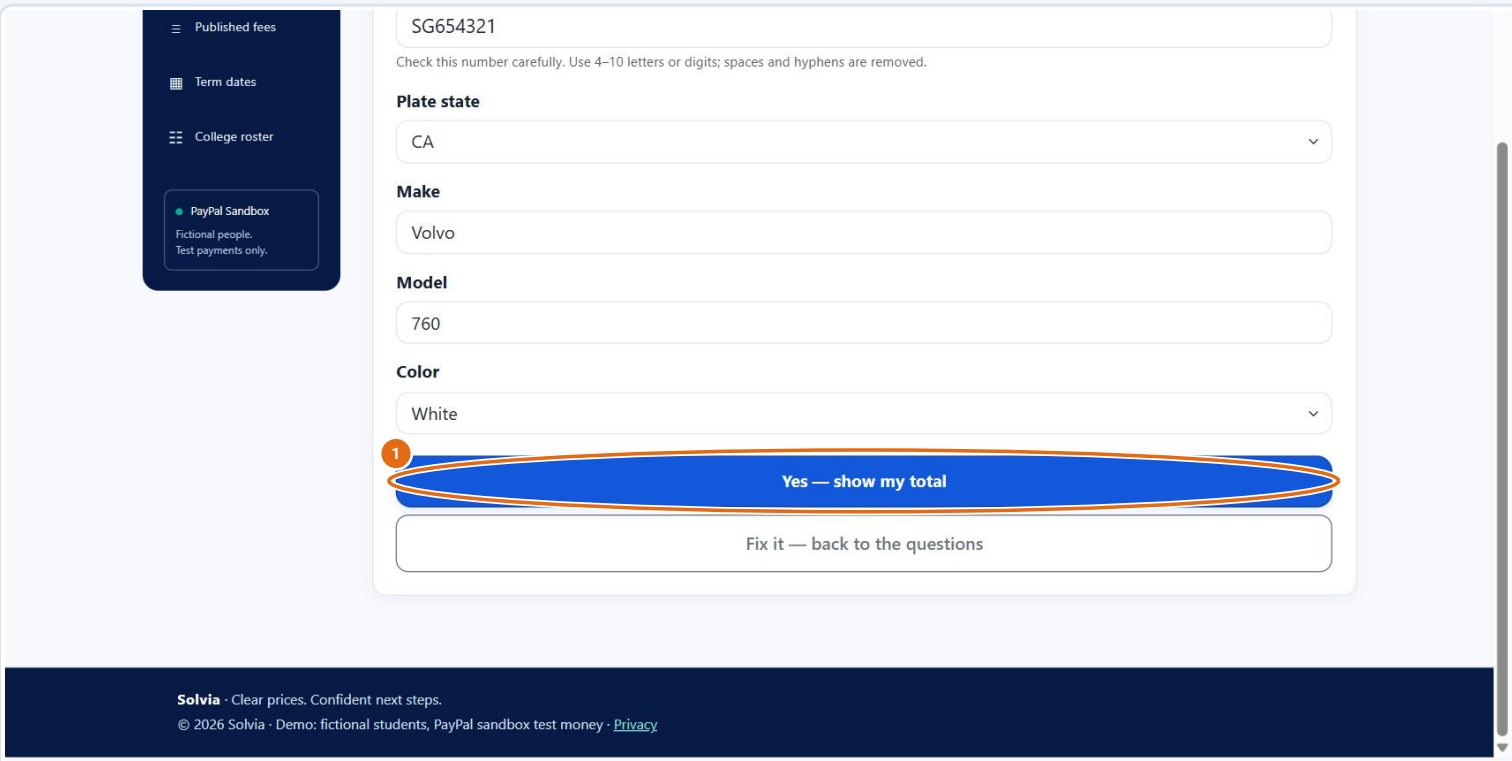

Enter the vehicle sentence. Students and visitors may choose Day pass or Term permit. This fictional student draft uses SG654321, Term permit and Fall. Read my answers starts the review. This refreshed screen shows the configured US-developed GPT-OSS reader; no model request was made for this still.

Check the plate before continuing

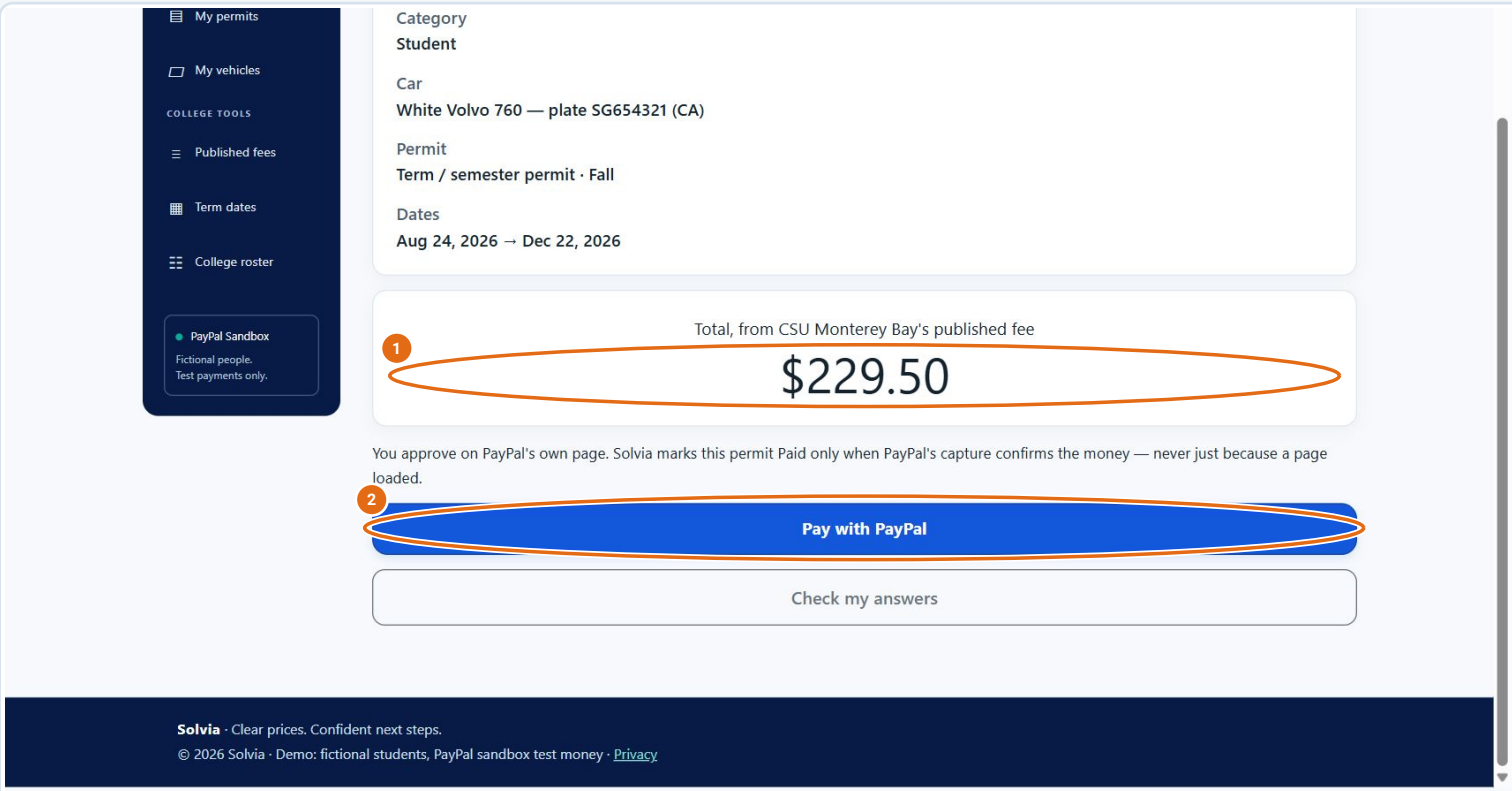

Check SG654321 and the state first, then make, model and color. Every extracted field can be corrected before it is saved. Do not continue with an incorrect or missing plate.

Confirm the corrected vehicle

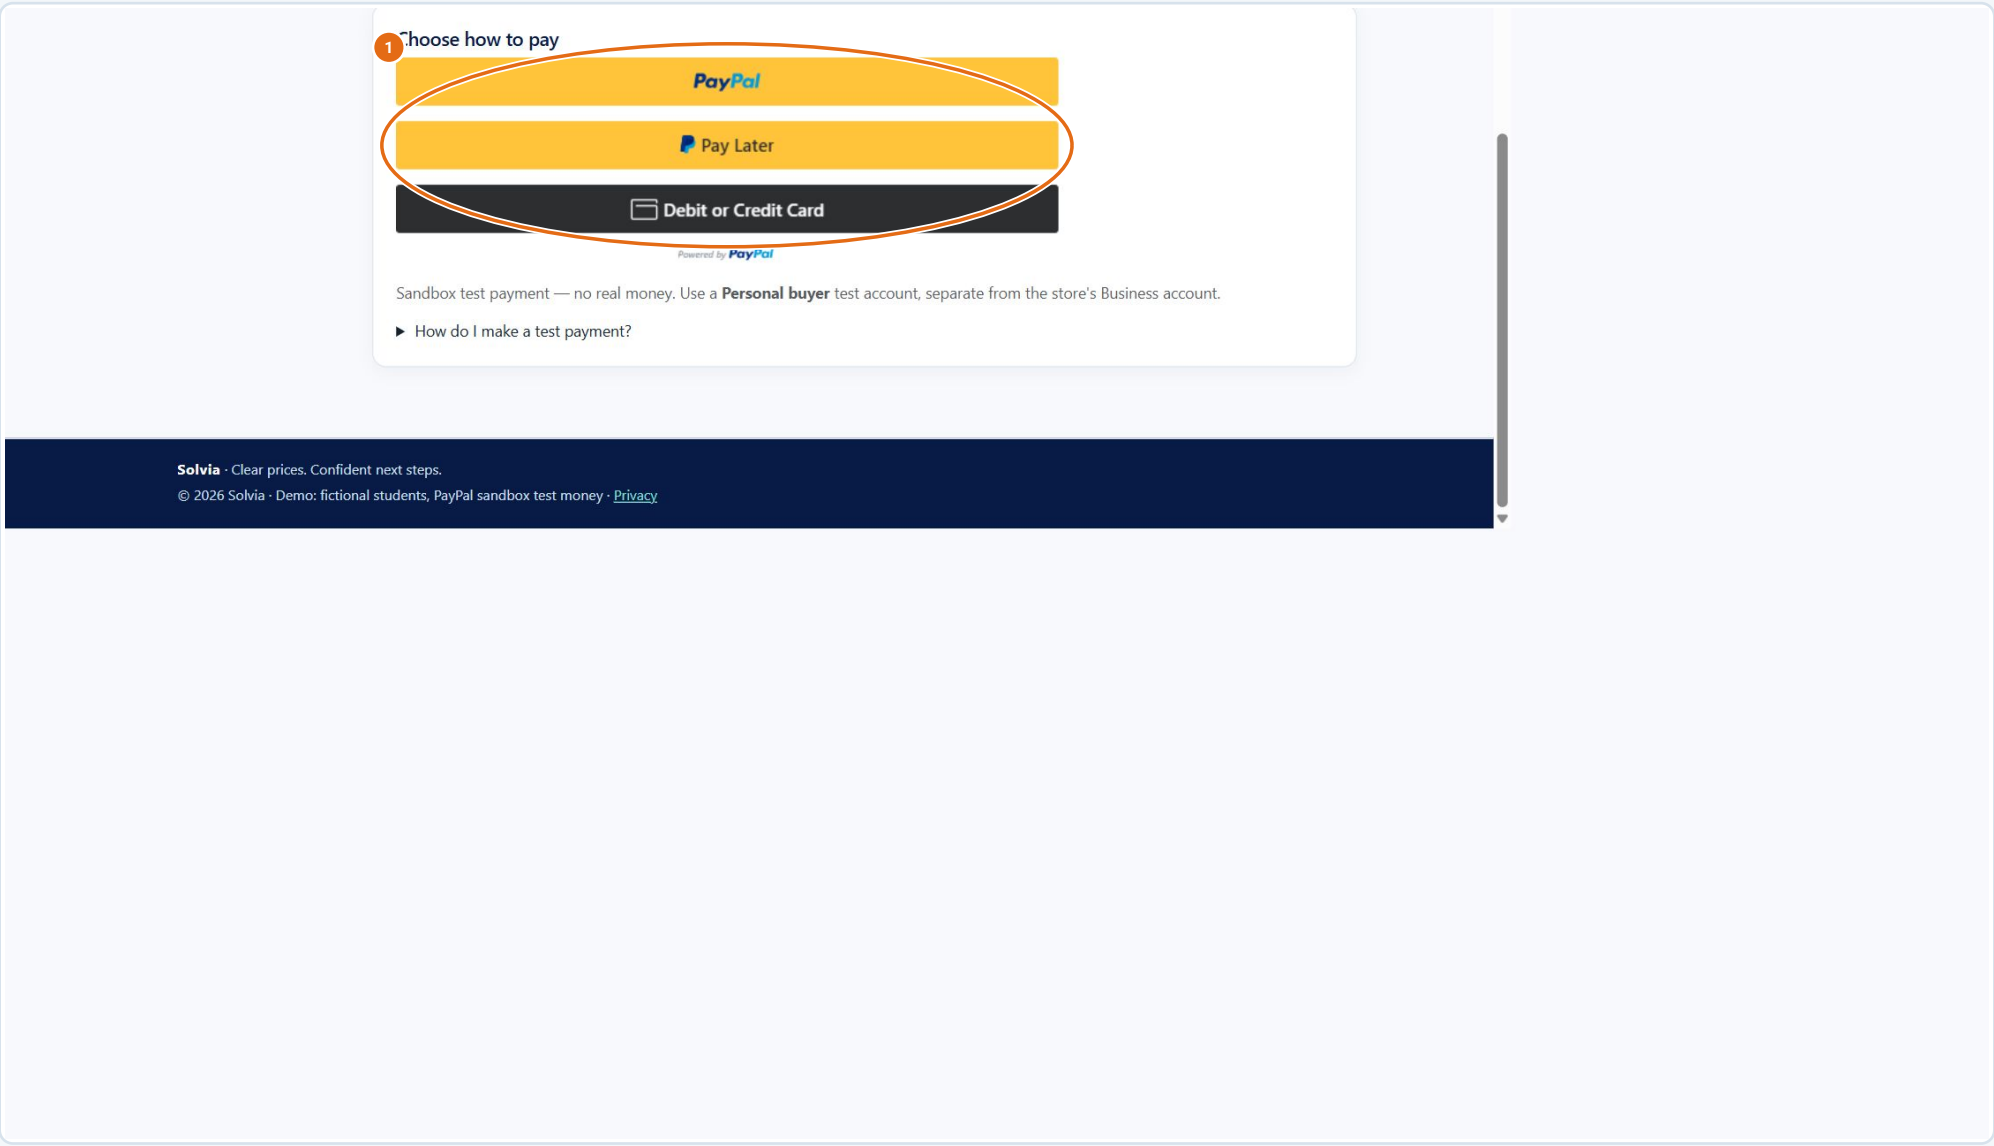

After checking all vehicle fields, select Yes - show my total. To start over, choose Fix it - back to the questions.

Student: approve the published fee

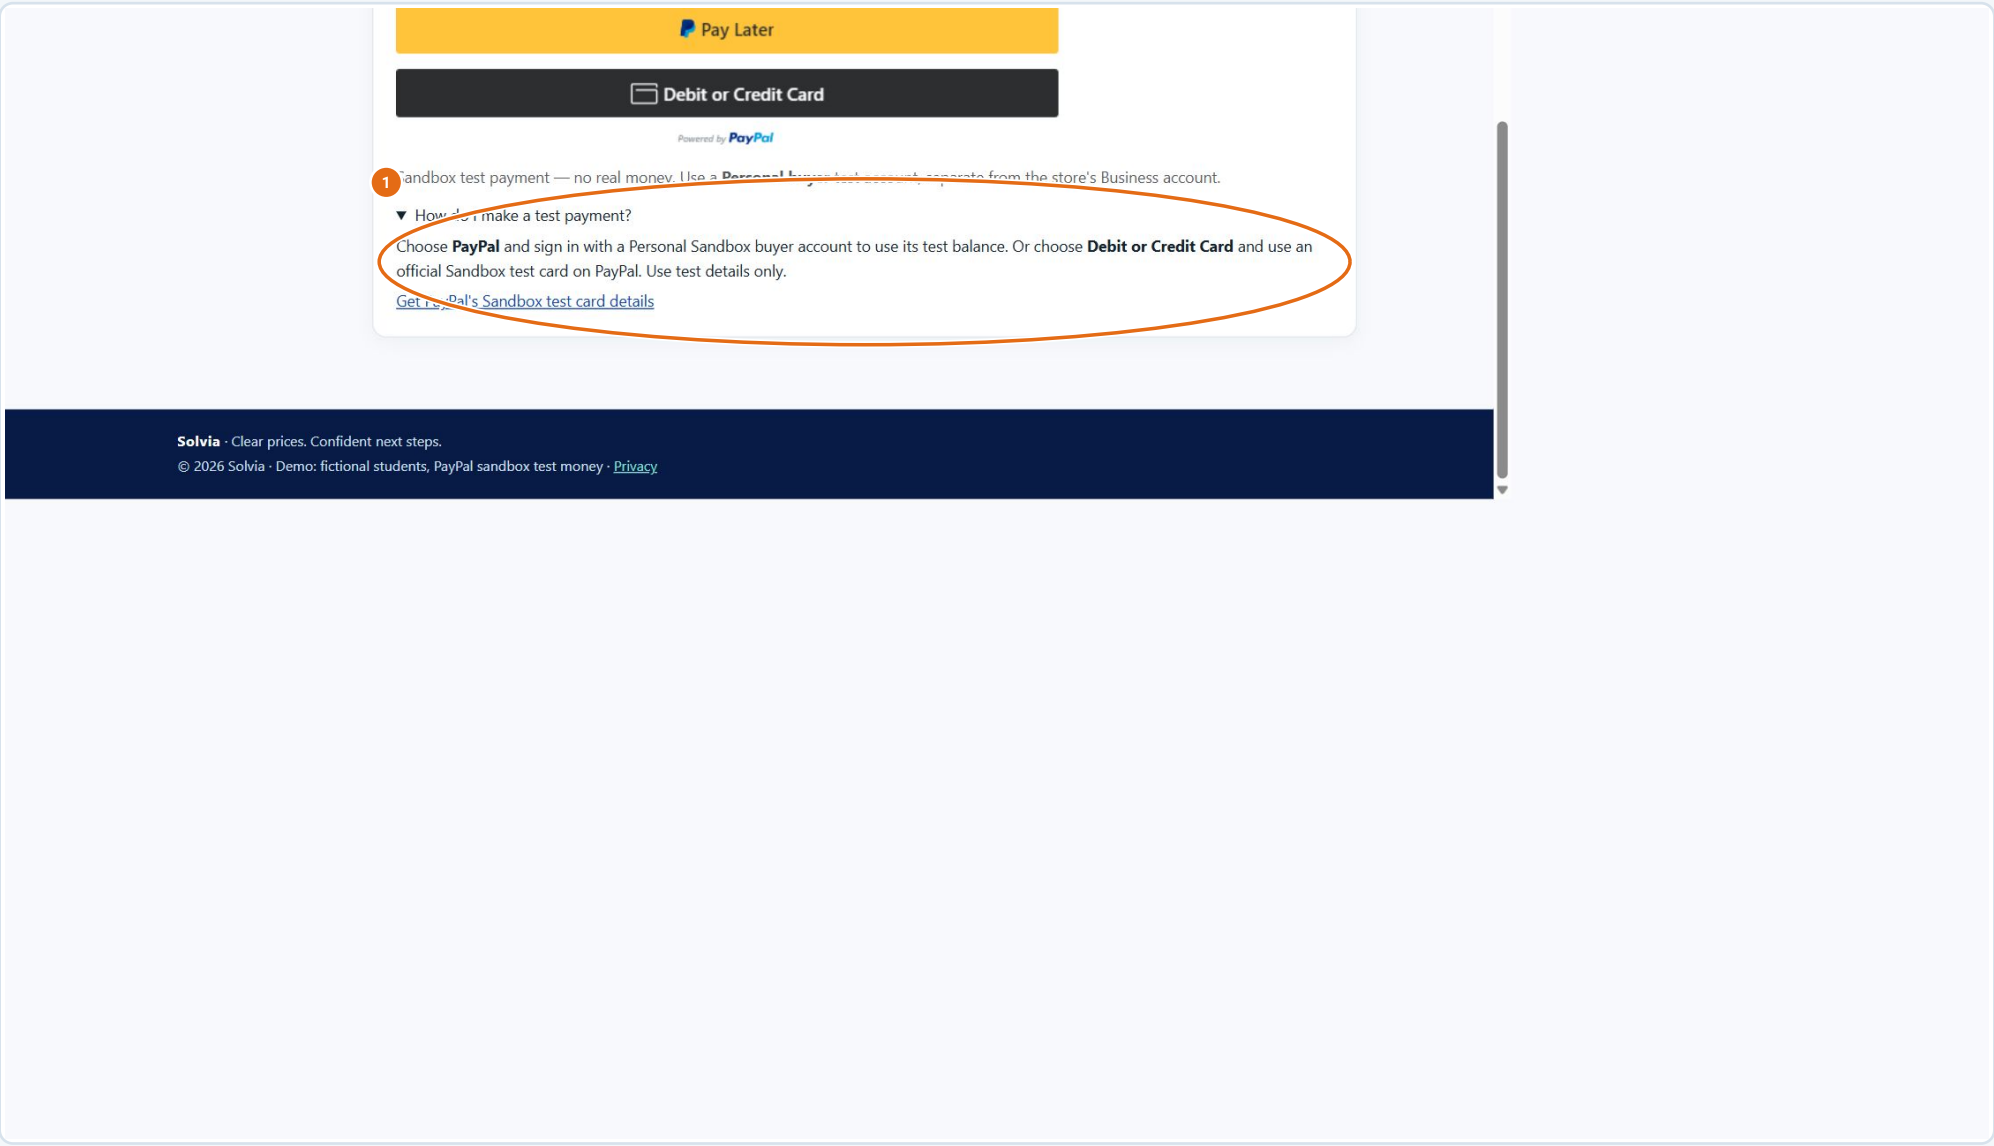

Check Student, campus, vehicle and dates. The catalog total is $229.50 for this example. Select Pay with PayPal to open checkout; this step does not itself confirm a payment.

Choose the official PayPal payment option

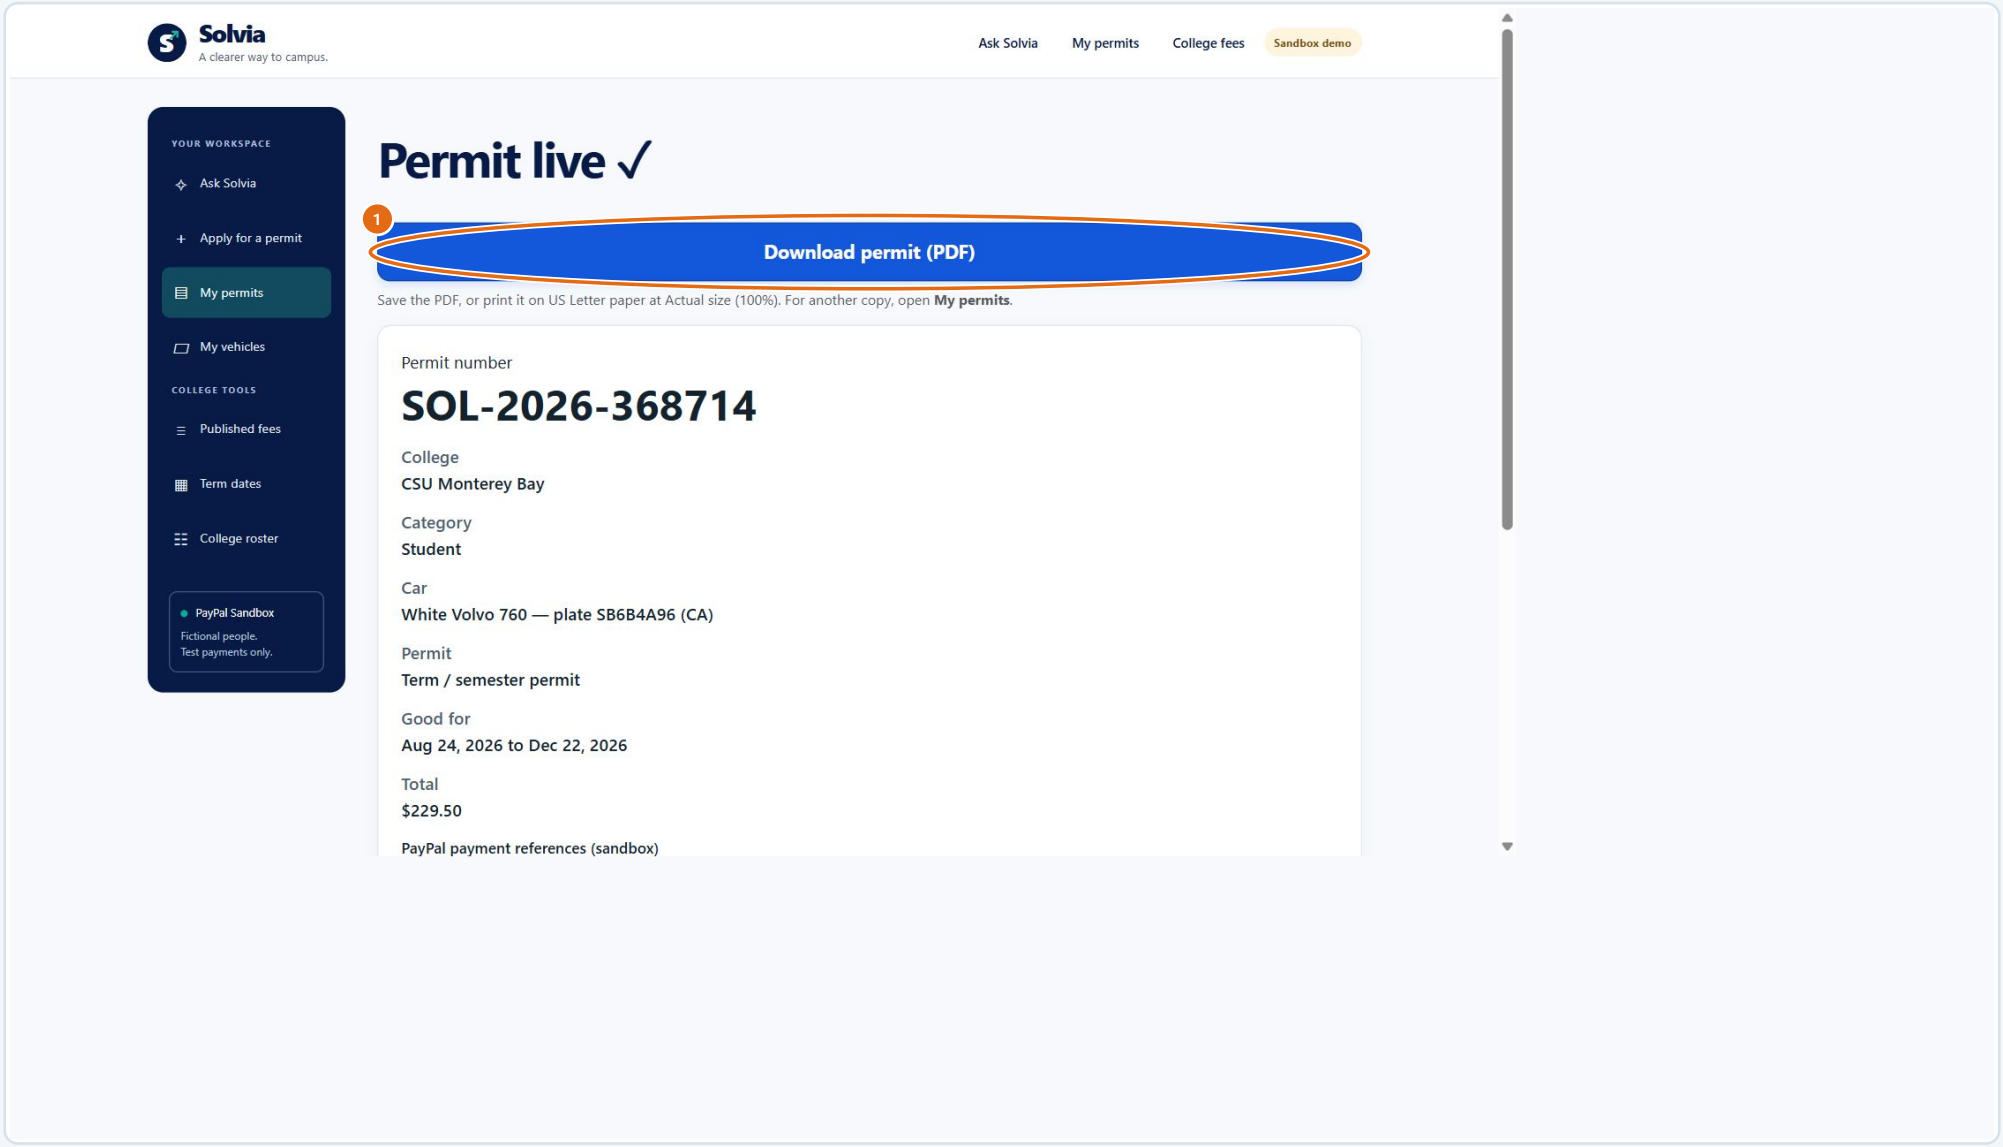

Choose the gold PayPal option to sign in with a separate Sandbox Personal buyer account and test balance. Or choose Debit or Credit Card and use an official Sandbox-generated test card. The seller Business account cannot buy from itself. No real card or real money is used.

Use Sandbox funds or an official test card

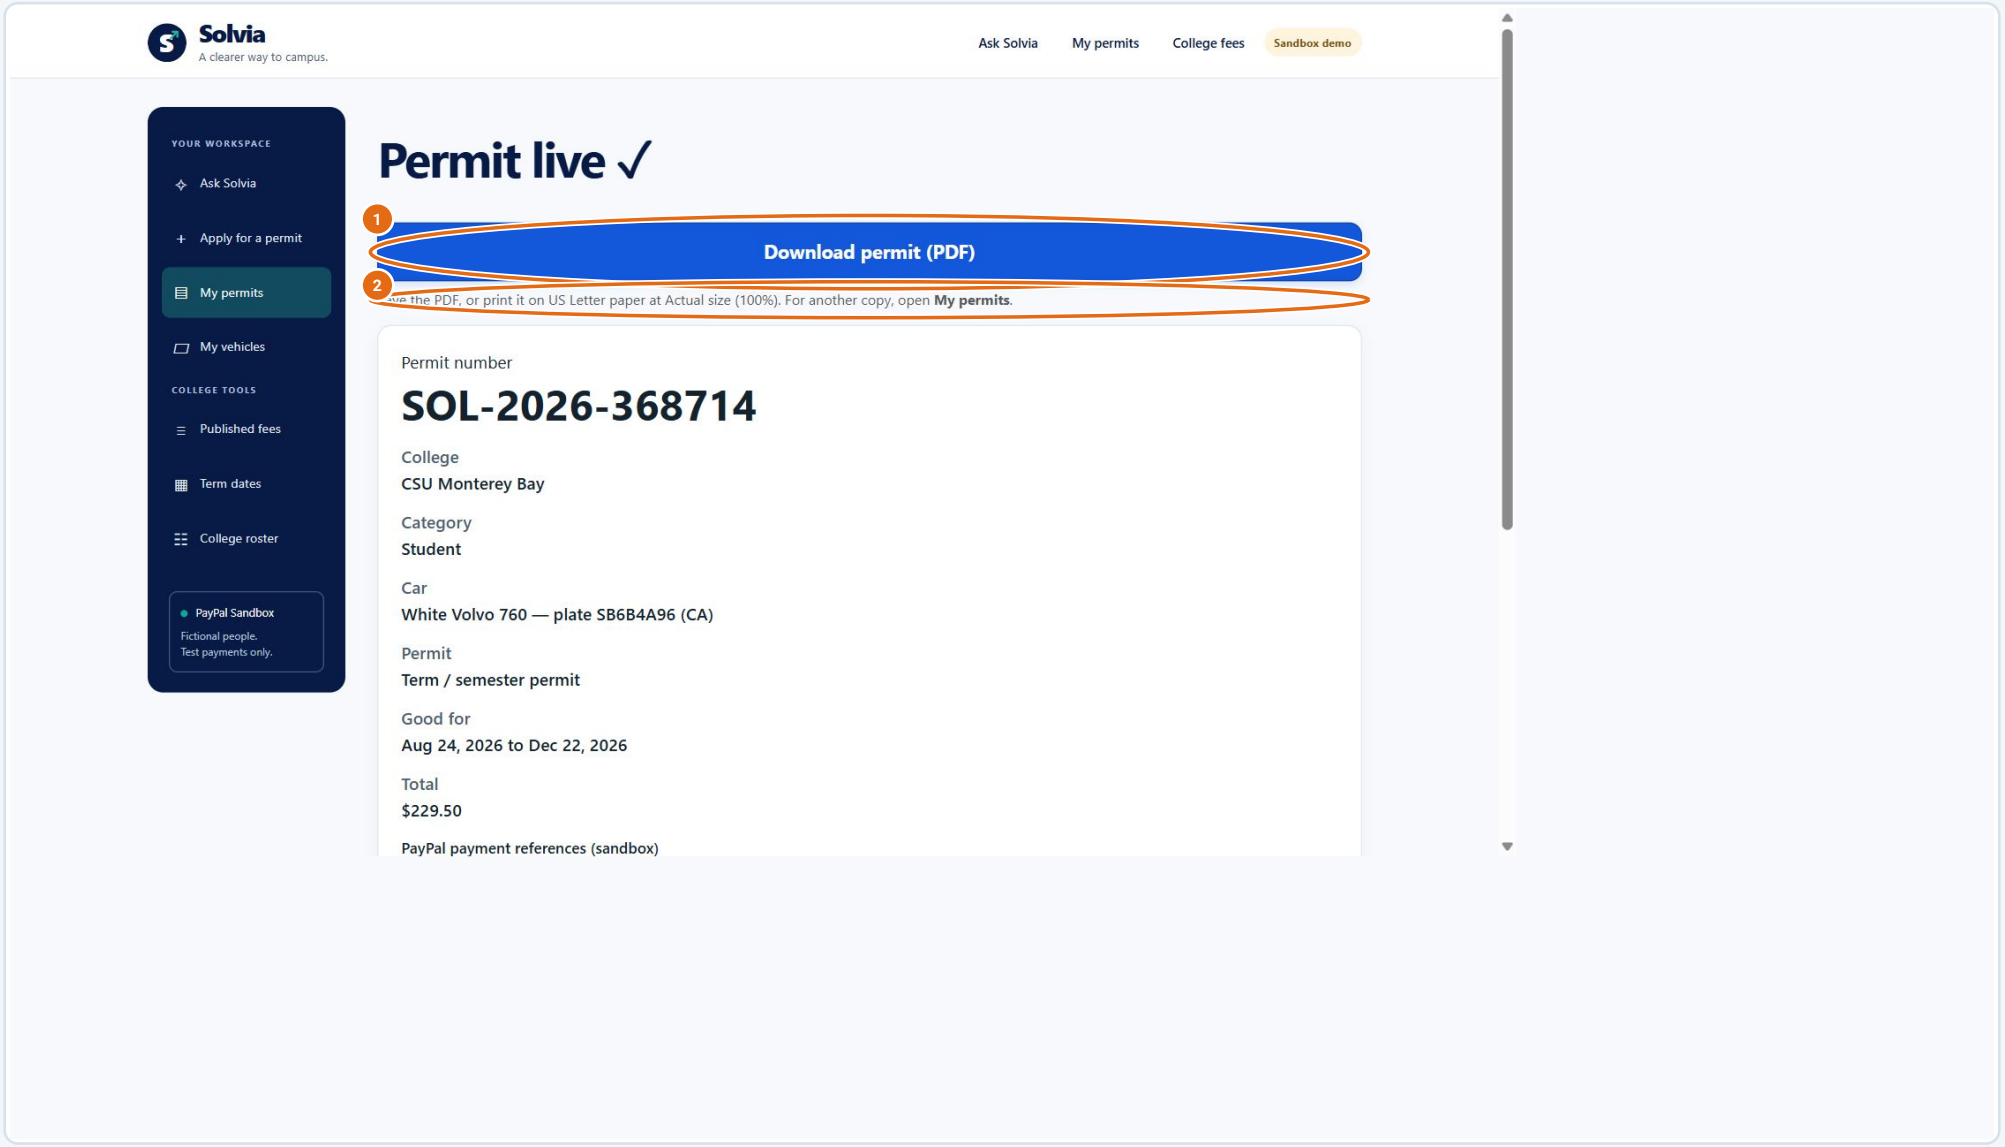

Expand How do I make a test payment? The link opens PayPal's official test-card generator. Follow PayPal's approval steps, then return to Solvia. Wait for a completed payment before expecting the PDF.

Payment confirmed: your permit is live

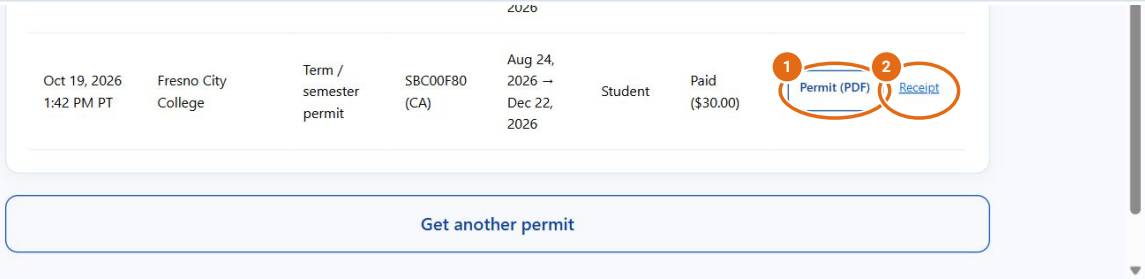

This is the earlier, independently verified $229.50 Student Sandbox purchase. The new SG654321 draft was not charged for this guide. A live permit now shows its PDF action immediately below the heading.

Download, save or print your permit

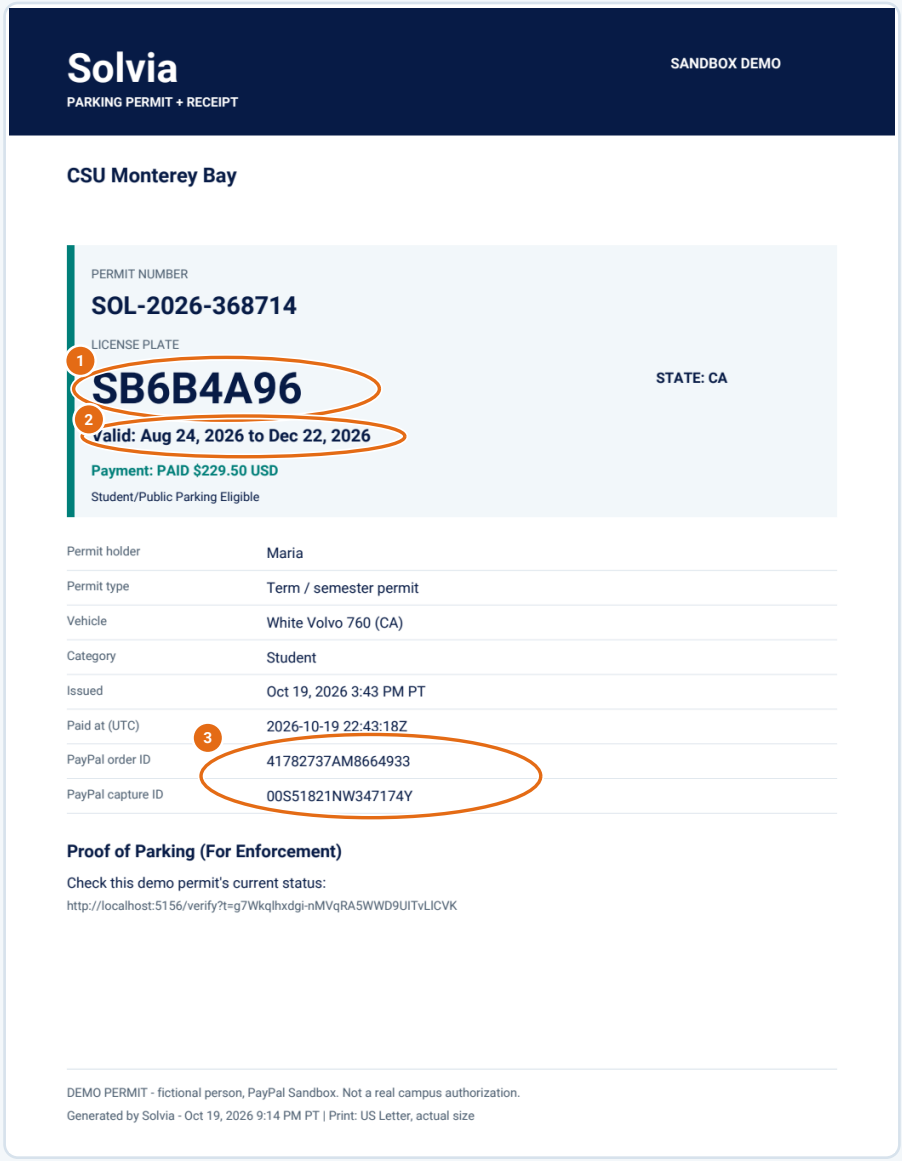

Select Download permit (PDF) at the top of the live receipt. Save it for later, or use your PDF viewer to print on US Letter paper at Actual size (100%). Check the license plate and validity dates first.

Download it again from My permits

Open My permits with the same demo person and browser. Find the paid campus/vehicle row, then select Permit (PDF). Receipt opens the payment summary. An unpaid row instead offers Pay Now. Never switch to another person expecting to see this person's permits.

Open the PDF and print it

Proof of Parking (For Enforcement)

Check this demo permit's current status:

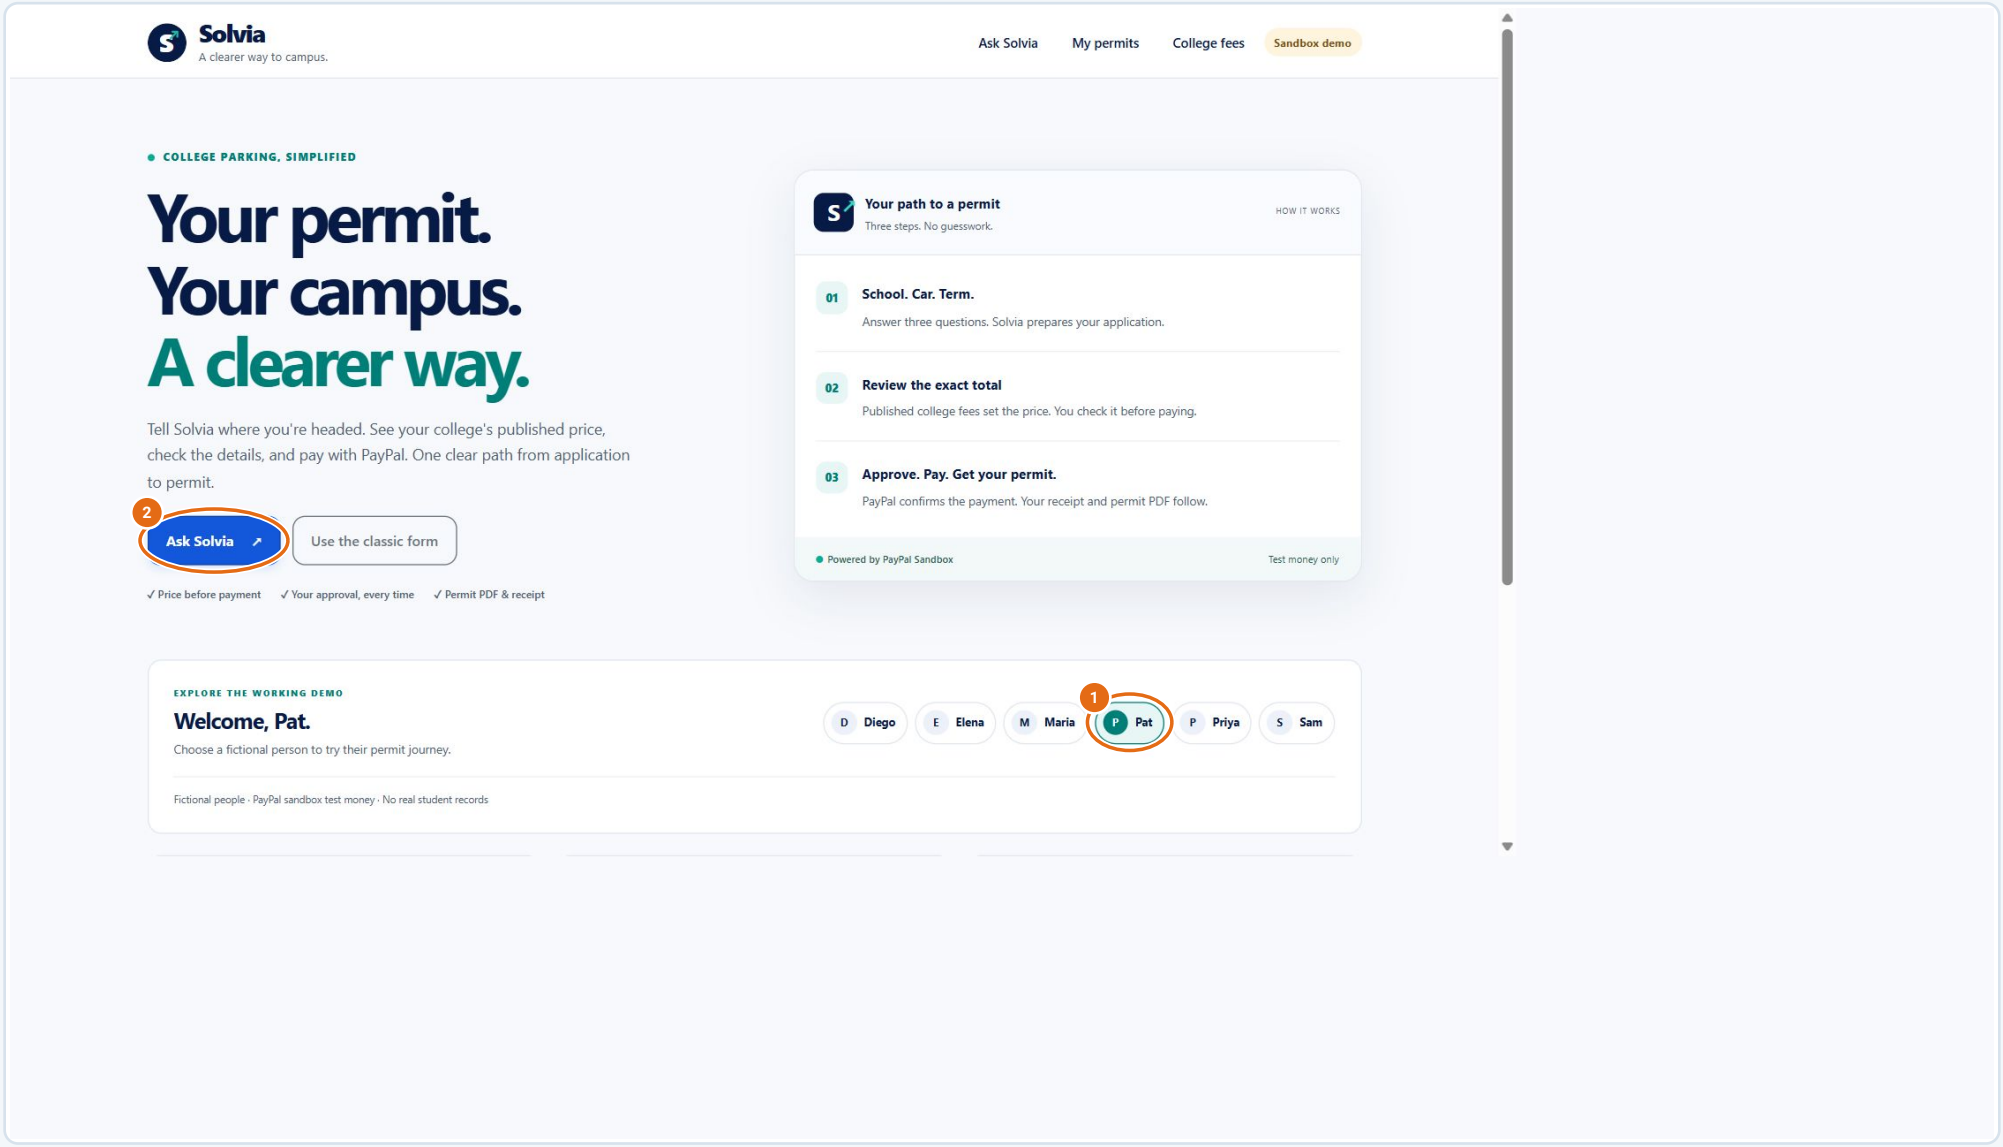

http://localhost:5156/verify?t=g7WkqIhxdgi-nMVqRA5WWD9UITvLICVK

DEMO PERMIT - fictional person, PayPal Sandbox. Not a real campus authorization.

Generated by Solvia - Oct 19, 2026 9:14 PM PT | Print: US Letter, actual size

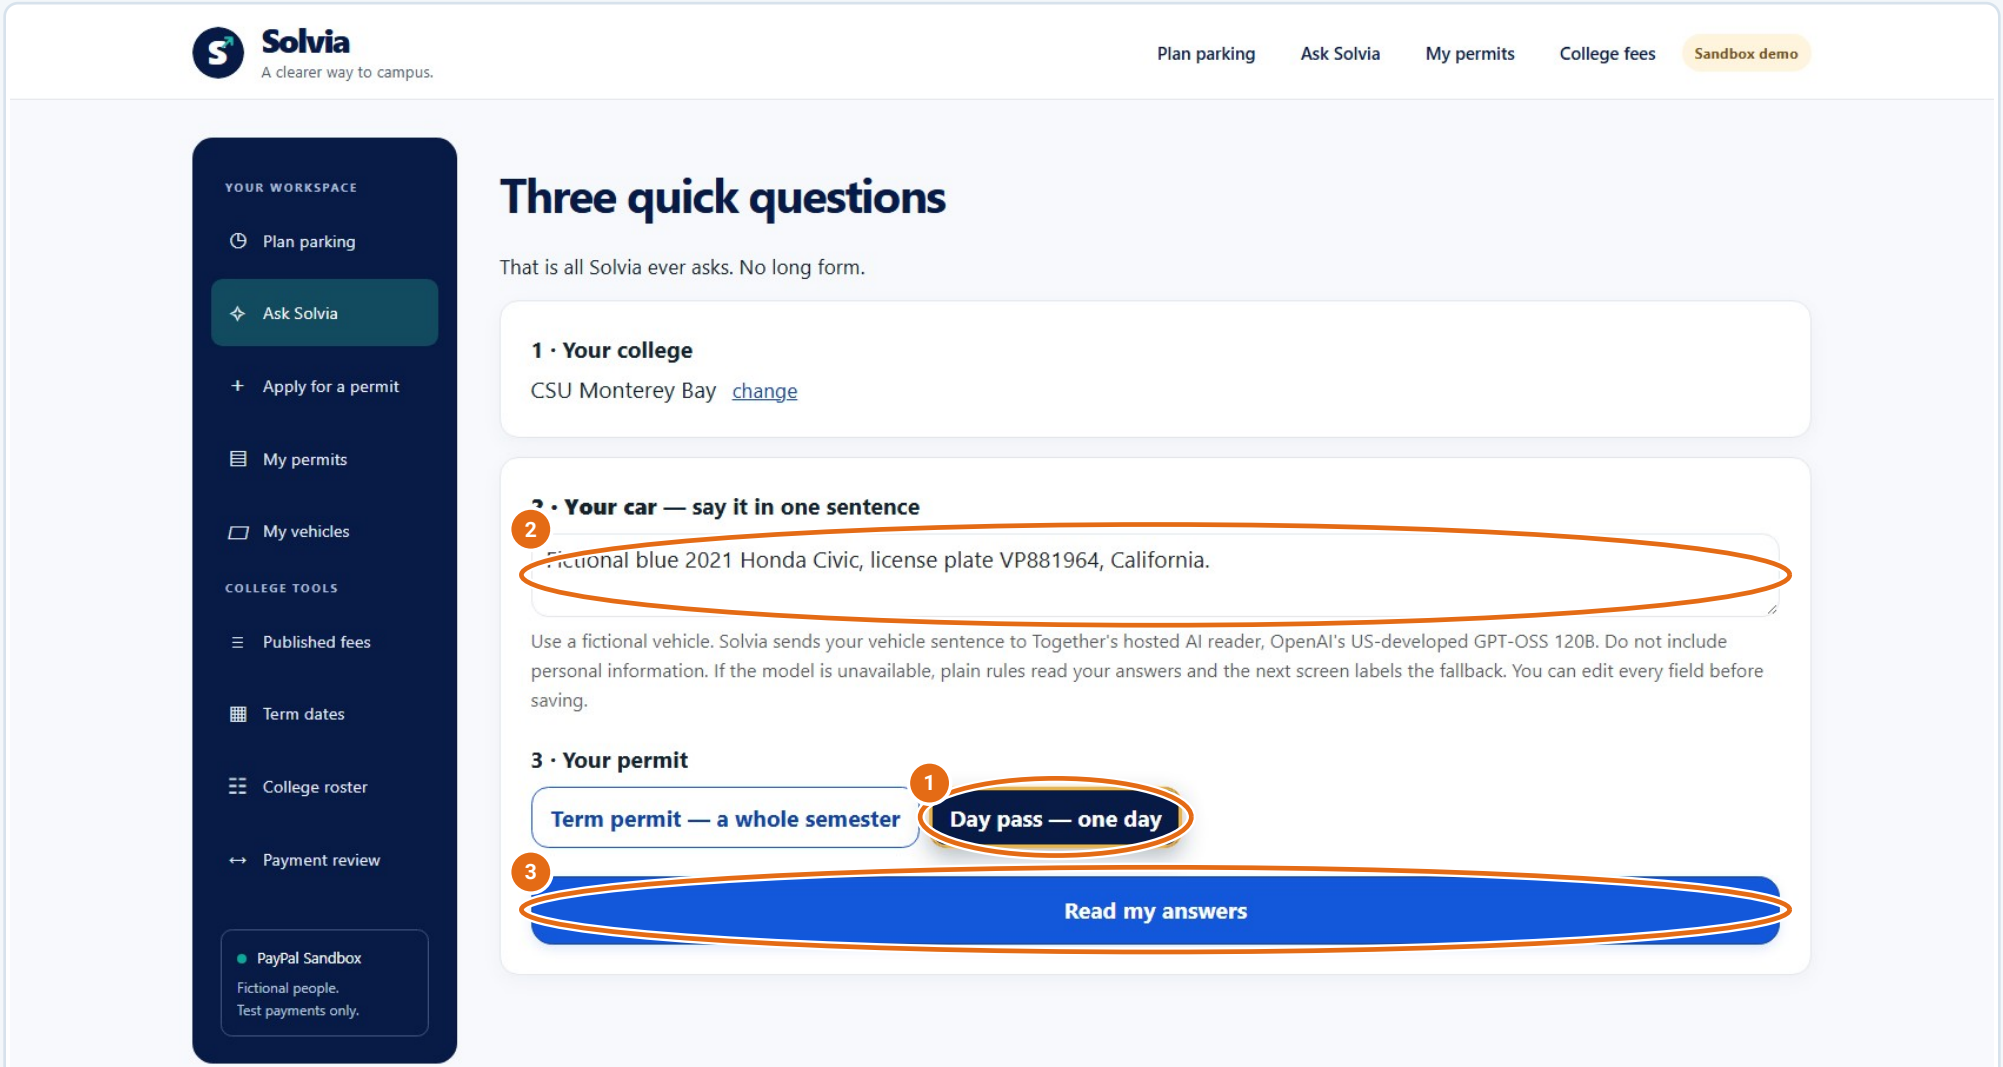

This is the actual downloaded student PDF from the earlier verified Sandbox payment. Check the plate (1), valid dates (2) and payment references (3). In your PDF viewer press Ctrl+P on Windows or Cmd+P on Mac, choose US Letter and Actual size / 100%, then print. Follow campus display rules. This demo PDF is not real parking authorization.

Visitor: choose Pat (Public)

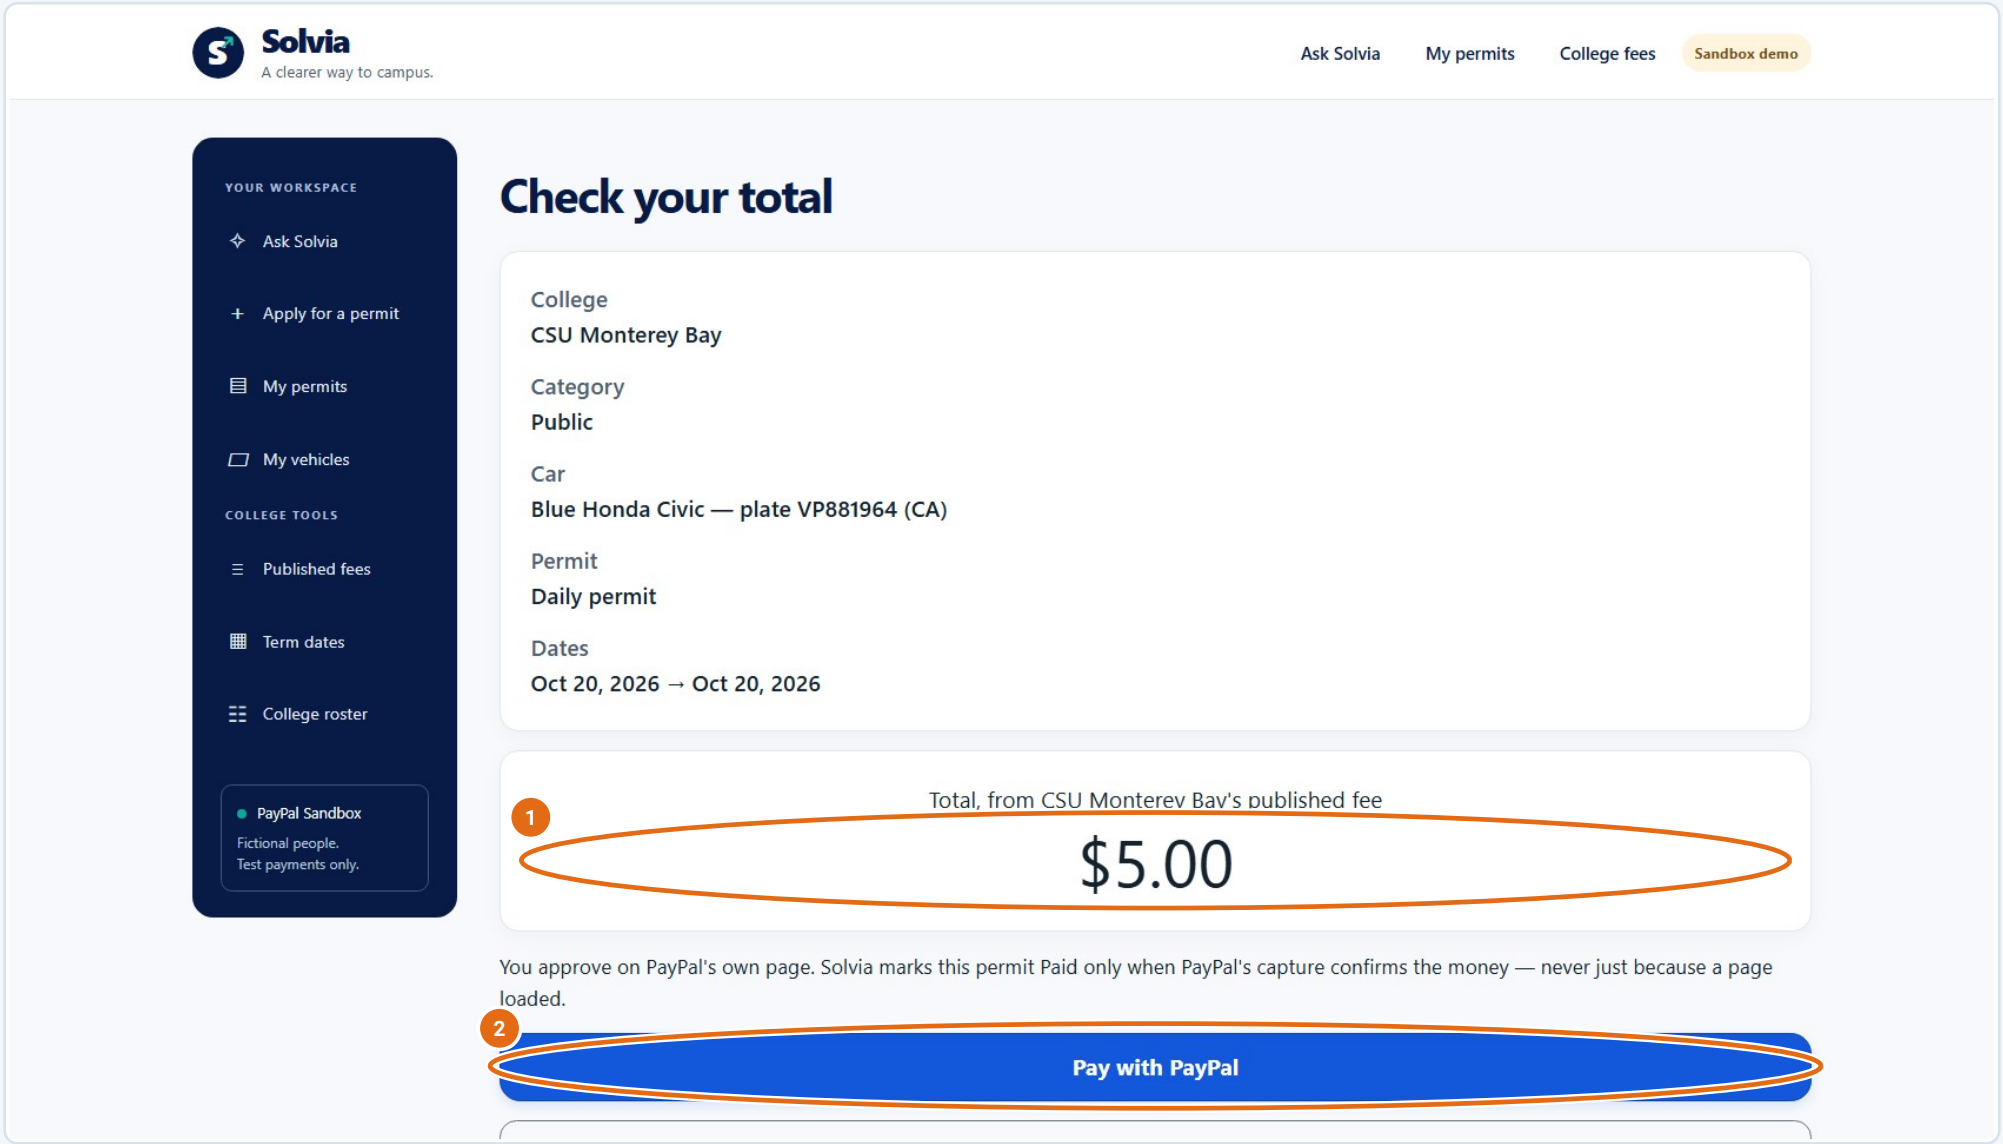

Choose Pat for the public/visitor demo. Visitors follow the same paid process as students and can buy either a day pass or a term permit. Select Ask Solvia and choose the college.

Visitor: choose a day pass or a term permit

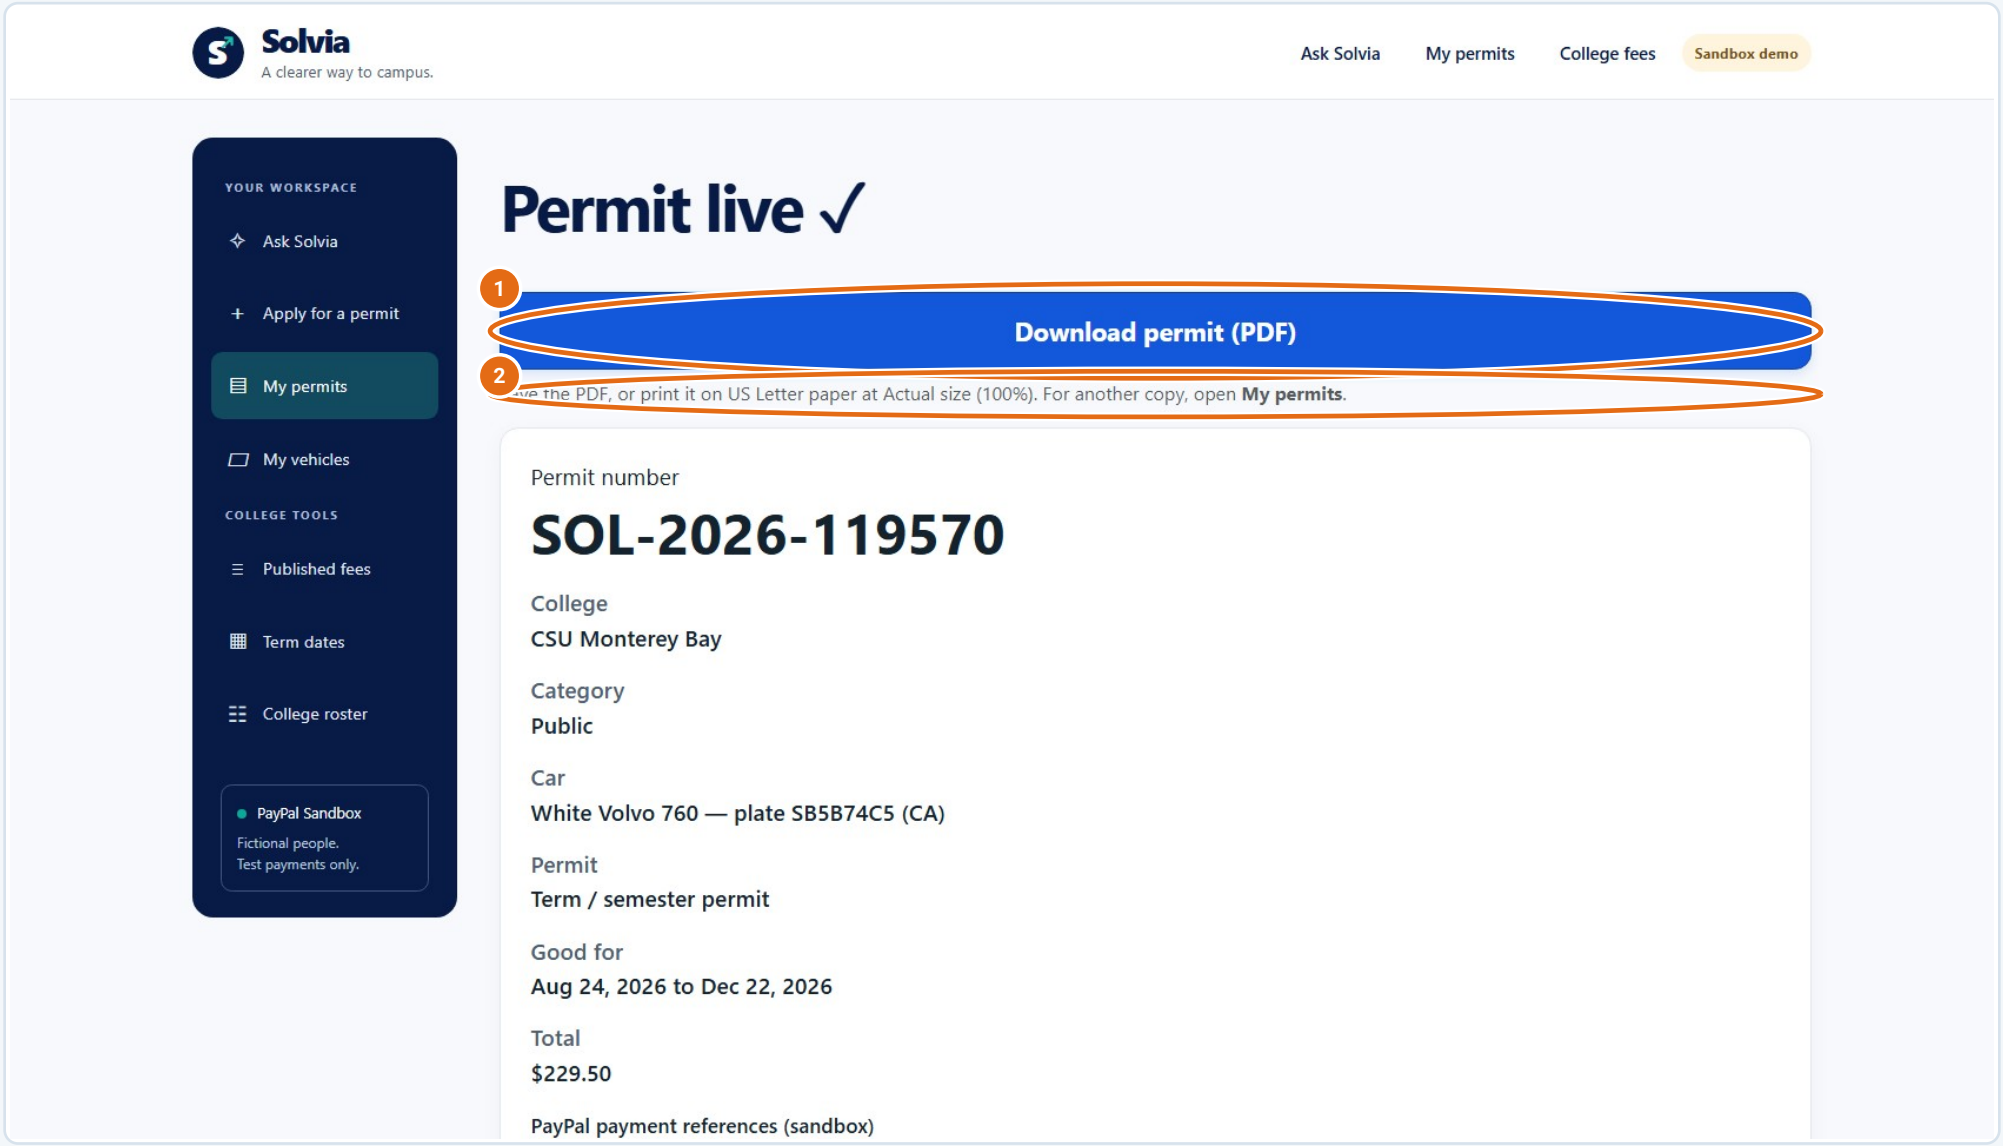

Pat is the fictional Public profile. This CSU Monterey Bay draft uses VP881964 and Day pass; semester choices are hidden. Select Read my answers to review. Choose Term permit instead for a semester. This current disclosure screen was refreshed without submitting a draft or calling AI.

Visitor: check Public and the day-pass fee

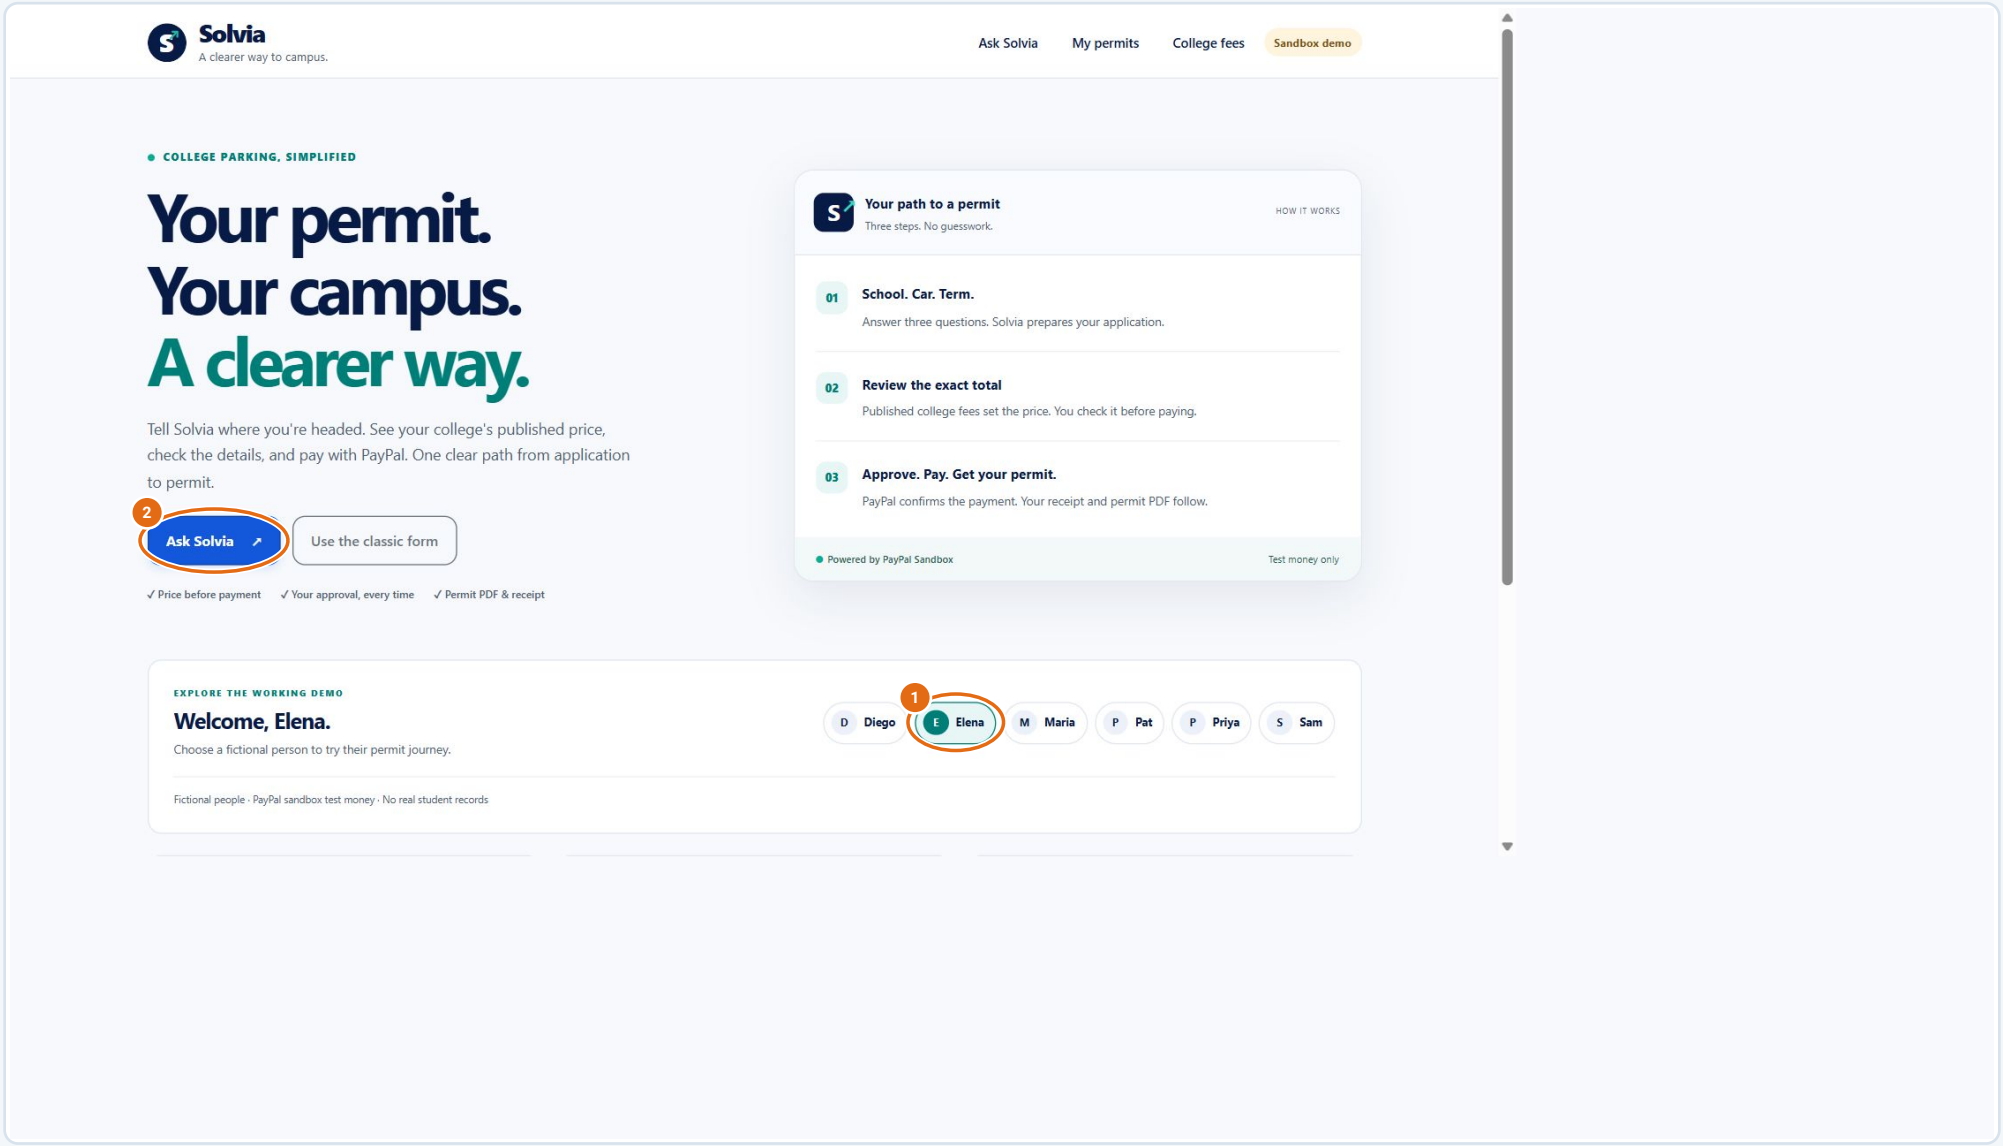

Check Public, CSU Monterey Bay, plate VP881964, the dates and the exact $5.00 day-pass total. This new draft is not paid. The next step would open PayPal for approval; this guide does not start another order or charge.

Visitor: save an issued permit PDF

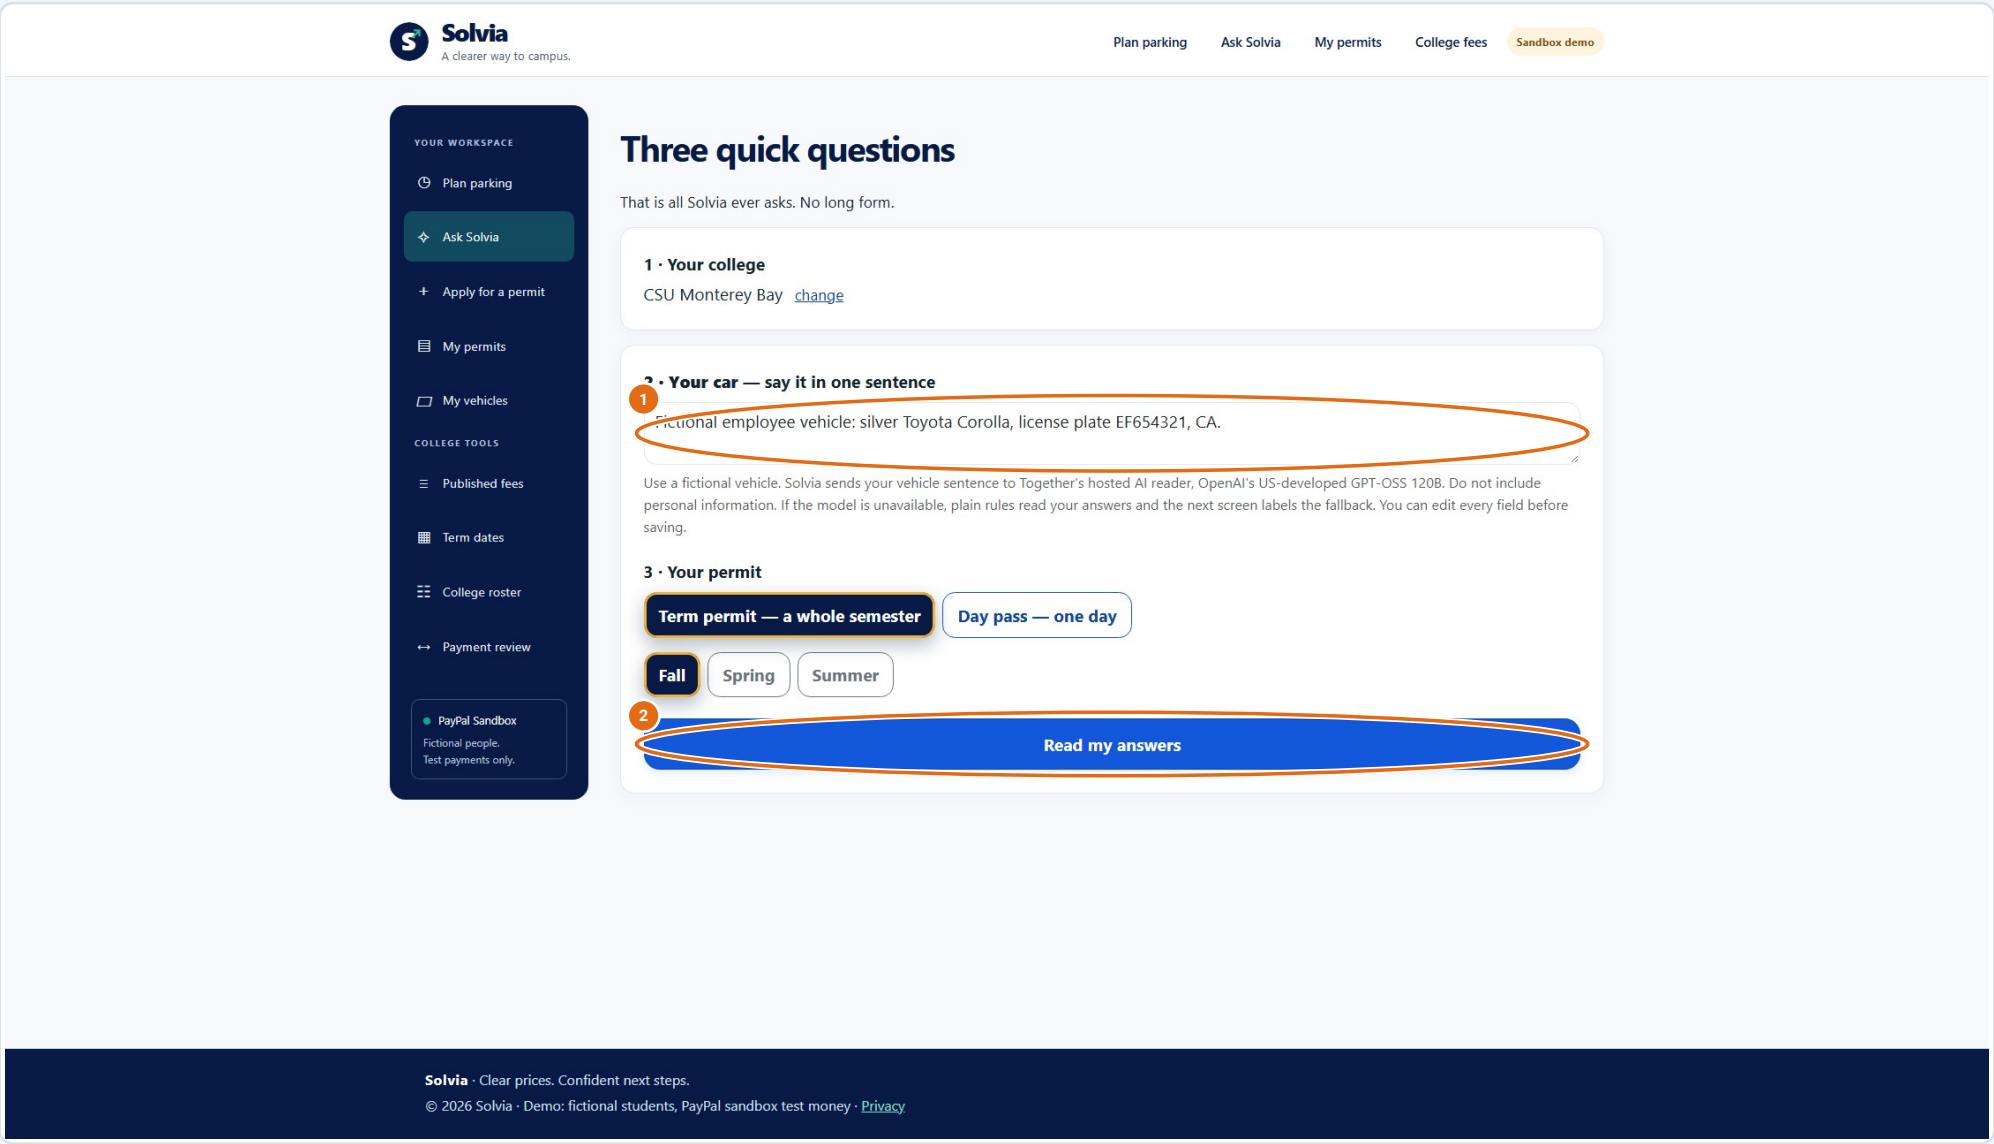

This is an earlier verified $229.50 Public term-permit Sandbox receipt, separate from the new unpaid $5.00 day-pass draft. Download permit (PDF) is immediately below the heading. Check the vehicle and validity dates before printing. The guide makes no new payment.

Employee: choose Elena

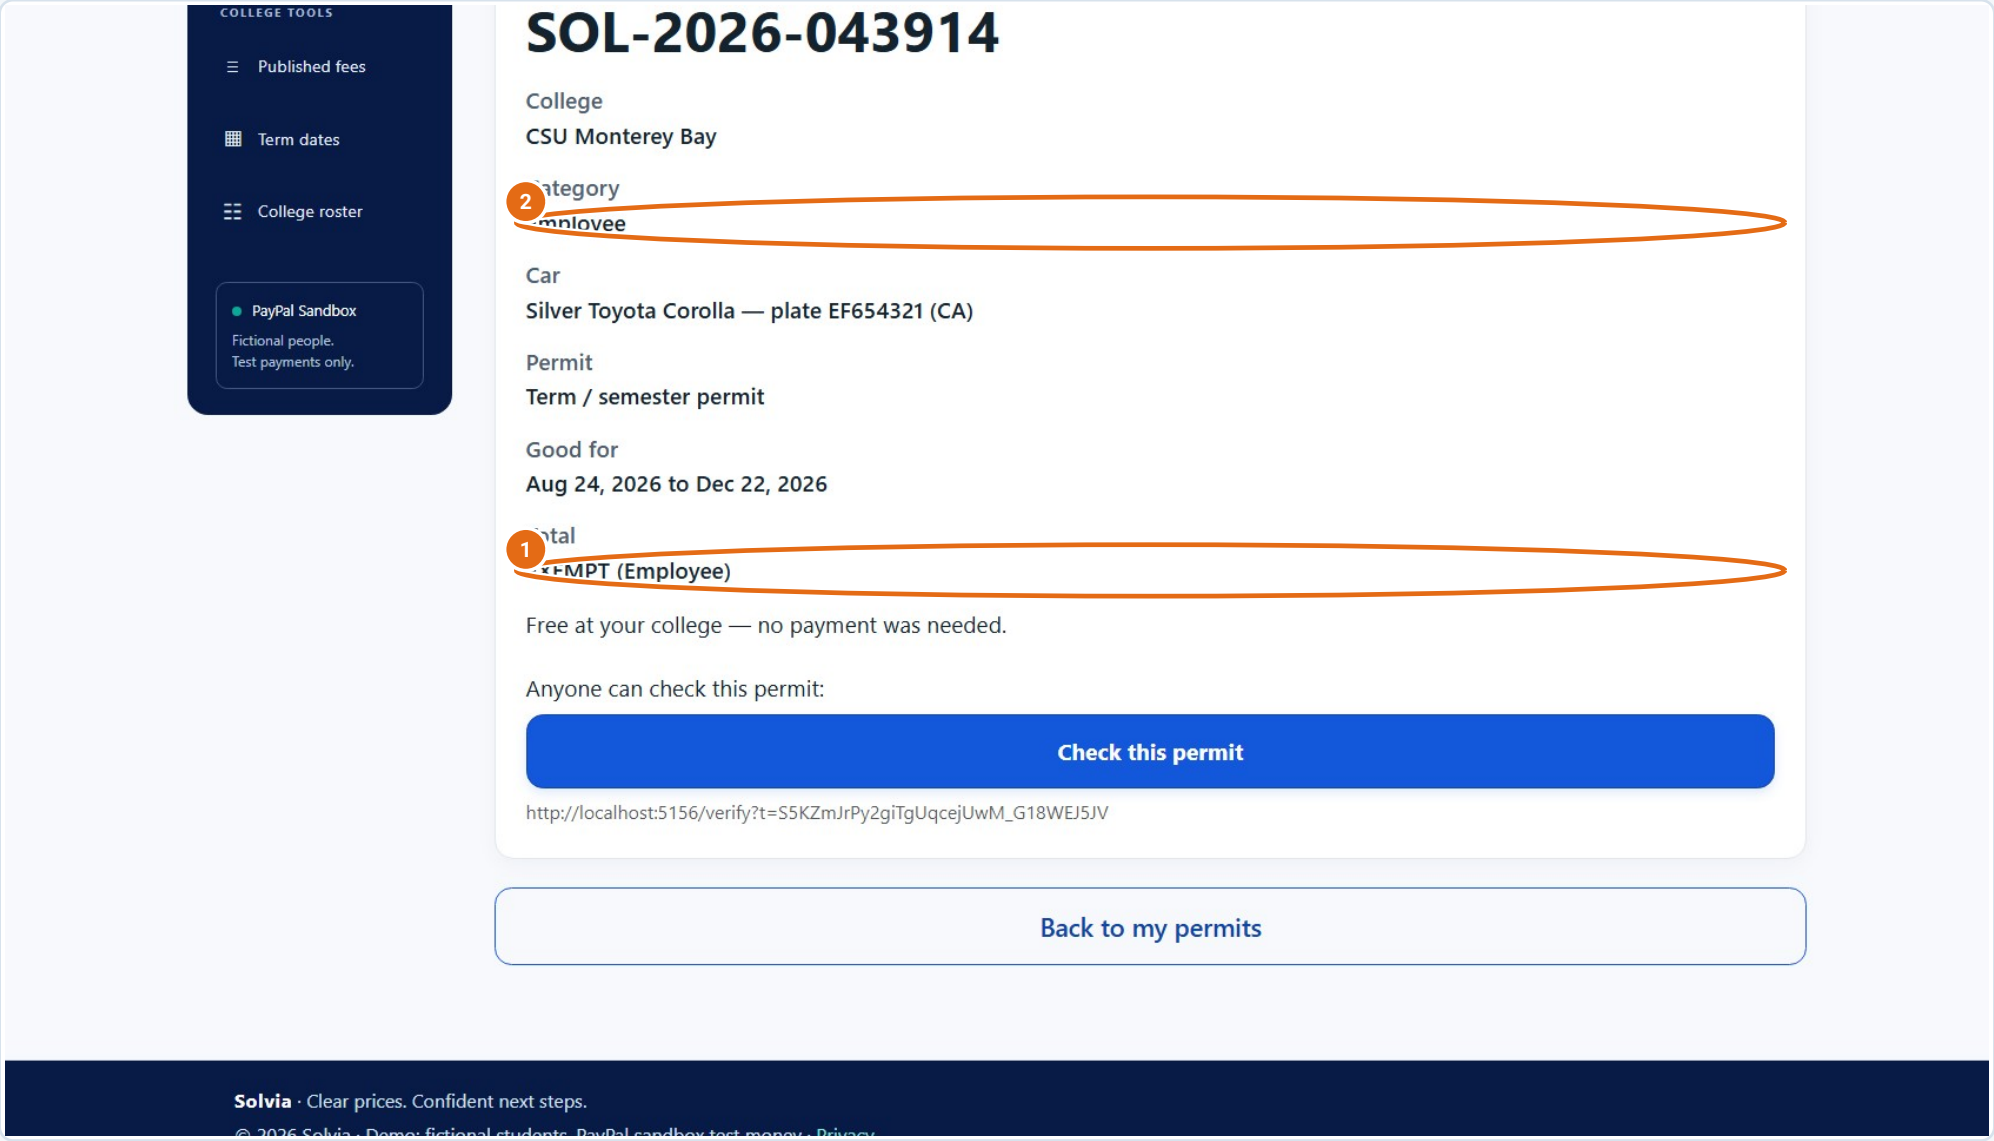

Choose Elena for the employee demo, then Ask Solvia and the college. The demo applies a $0 employee exemption; students and visitors use the paid process described first.

Employee: enter and review the vehicle

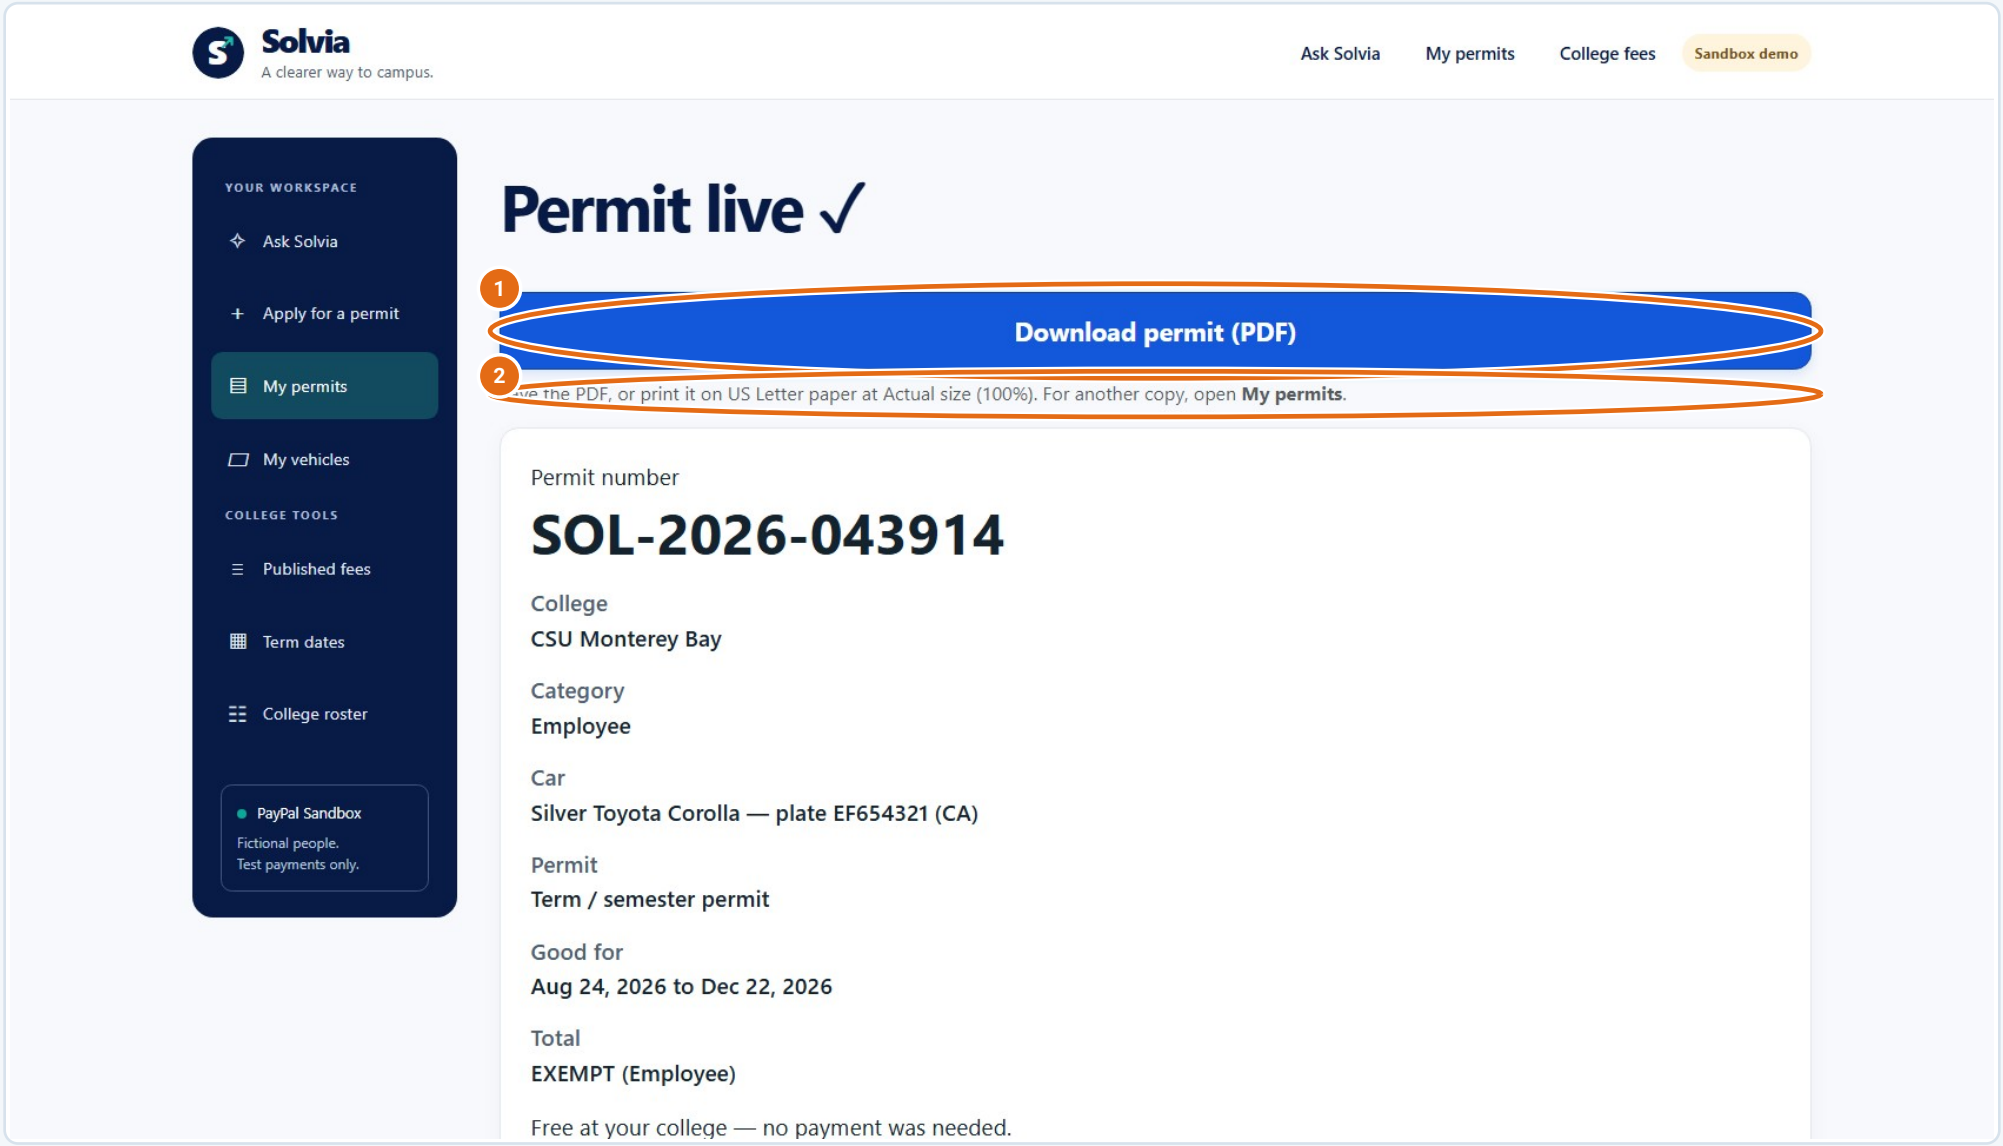

Elena follows the same vehicle review: enter the fictional vehicle, select Read my answers, then check and correct the draft. The following receipt shows an eligible employee exemption. This current US-model disclosure still was captured without calling AI or issuing a new permit.

Employee: verify the exemption

Check Employee and EXEMPT (Employee). This fictional eligible employee permit was issued without PayPal or a charge. Its PDF download is at the top of this same receipt; check the vehicle and validity dates before printing.

Employee: download and re-open the PDF

Elena is the fictional Employee profile. The issued exempt permit has Download permit (PDF) directly below its heading. Save or print on US Letter at Actual size (100%). For another copy, open My permits and select Permit (PDF). No PayPal payment is needed.
